## High Frequency and

 High Power Reed Relays
## DESCRIPTION

High voltage RF Reed Relays use a patented coil encapsulation, external electrostatic shields, and magnetic shields. For this series we use a special copper-plated Form A switch with a breakdown voltage up to 10 kVDC . The contacts are suitable for carrying current up to 3 Amps (5 Amps available) at 30 MHz .

## APPLICATIONS

- Radio frequency technology
- Antenna tuning units
- Transmit / receive requirements

## FEATURES

- Normally open contacts (Normally closed contacts are available)
- 5 Amps available

* The pull-in / drop-out voltage and coil resistance will change at rate of $0.4 \%$ per ${ }^{\circ} \mathrm{C}$.
** Re-closure of Form B may occur if the max. coil voltage is exceeded. Coil polarity on Form B must be observed. Pin five is positive.
