Safety Precautions

Be sure to read the precautions for “*Precautions for All Relays*” and “*Precautions for All Relays with Forcibly Guided Contacts*” in the website at: <http://www.ia.omron.com/>.

Precautions for Correct Use

Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.

Wiring

- Use one of the following wires to connect to the P7SA-10F/10F-ND/14F/14F-ND.
Stranded wire: 0.75 to 1.5 mm²
Solid wire: 1.0 to 1.5 mm²
- Tighten each screw of the P7SA-10F/10F-ND/14F/14F-ND to a torque of 0.78 to 0.98 N·m.
- Wire the terminals correctly with no mistakes in coil polarity, otherwise the G7SA will not operate.
- If you use the P7SA-□F-ND, the release time and the response time of the G7SA will be longer because the P7SA-□F-ND has a built-in diode to absorb coil surge. Confirm operation under actual conditions before you use the P7SA-□F-ND.

Cleaning

The G7SA is not of enclosed construction. Therefore, do not wash the G7SA with water or detergent.

Mounting

The G7S can be installed in any direction.

Direction for Inserting and Removing the Relay

When you insert the Relay into the Socket or remove the Relay from the Socket, keep the Relay perpendicular to the surface of the Socket.

If you hold the Relay at an angle when you insert or remove it, the Relay pins may be bent and Socket contact failure may occur.
