

# STREET LIGHTING PHOTOCONTROLS

# A COMPREHENSIVE PORTFOLIO FOR STREET LIGHTING APPLICATIONS

For more than 50 years, TE Connectivity (TE) and its well-known ALR product line have supported utilities, city authorities and contractors with safe and reliable connection boxes and accessories for lighting poles for a variety of street lighting applications including:

- Public street lighting
- Private outdoor lights for parking lots and apartment buildings
- Industrial settings such as refineries and power plants
- Infrastructure, including harbours, airports and rail stations

# 8000 SERIES PHOTOCONTROL

## ELECTRONIC, ULTRA LONG LIFE, HIGH PERFORMANCE

TE Connectivity's (TE) advanced technology 8000 Series Photocontrol provides a unique, durable, and multi-volt control especially designed for twenty year operation.

Aluminium electrolytic capacitors have a rated lifetime of only 5000 hours at 105°C. TE has eliminated electrolytic capacitors in the 8000 series, resulting in a truly long life control. Double-sided, plated-through, glass epoxy FR4 circuit board along with a 30 Amp rated at 120VAC relay ensures that our control will surpass 20,000 ON/OFF operation cycles per ANSI C136.10.

Like all of TE's electronic controls, the 8000 Series utilises our inter-locking base/cap design for excellent environmental housing. High temperature base material, rated at a minimum 138°C, along with a UV stabilised, opaque housing ensure our control will last over 20 years without degradation.

TE uses a process of IR filtering a phototransistor which in turn gives a human eye response along with long-term, drift free light sensing for the life of the control.

### KEY FEATURES

- Multi-volt operation
- High-temperature housing and components
- 25 mm, 20 kA, 300 Joule MOV Standard
- Meets or exceeds ANSI C136.10

SPECIFICATION - DIMENSIONS IN MM	
Physical	Dimensions: approx. 83mm dia. x 45mm high (not including contacts)
	Enclosure: designed to meet ANSI C136.10
	Power consumption: less than 0.5 watts at 120 VAC
Temperature	Minus 40°C to plus 65°C at 96% RH
Control	DC Electromagnetic switch type exceeds 20,000 ON/OFF operations per ANSI C136.10
Relay Rating	30 Amp General Purpose Relay
Load Rating	1000 Watt Tungsten 1800 VA
Light Sensor	Non-drifting Phototransistor
Cover	High impact polypropylene with UV stabilised polycarbonate window
Base	High temperature polyester (PBT)
Gasket	Cross-linked polyethylene
Connection	3-pole locking-type with solid brass legs

## HOW TO SPECIFY

# D2 SERIES PHOTOCONTROL

## EXTENDED LIFE

TE Connectivity’s advanced technology Extended Life D2 Series Photocontrol provides a unique mix of low-cost, long-life, and small form factor for demanding Roadway and Specialty Lighting applications.

TE has developed a new EL (Extended Life) - series as part of the D2 offering, providing greater benefits and improved performance over the original model.

It utilises advances in ultra-low power microcontroller technology to halve power consumption from our original model while increasing load switching capability (including loads with phase correction capacitors). It also incorporates a 320J MOV for enhanced protection of the luminaire from line transients. This level of protection has only previously been available in the larger NEMA photo cells.

The new D2 photo cell improves on the performance of the original model by incorporating a heavy-duty relay manufactured by TE. This relay is assisted by a triac that eliminates contact welding when driving large luminaires with PFC capacitors. The triac conducts at the line zero-crossing point during lamp turn-on, charging any load capacitance before the relay contacts close. This also reduces sags and surges on the network caused by the luminaire switching.

### KEY FEATURES

- Premium utility grade control
- High reliability, long life
- High-temp housing and components
- 320 Joule MOV standard
- Extremely reliable versatile design applications

# SHORTING AND OPEN CAPS

## DURABLE, WEATHERPROOF, LONG LASTING

TE Connectivity (TE) offers durable weatherproof shorting and open caps. Common uses include designating fixtures for maintenance, keeping lights continually on for safety (shorting cap), or disconnecting service when lighting is no longer needed (open cap).

SC, MC and NS caps provide a convenient and economical method to close or open the primary circuit with a NEMA locking type receptacle. The MC-10 model also incorporates a 545 Joule Metal Oxide Varistor (MOV) that protects the cap and the luminaire from transient line surges.

Designating ANSI in the part number will provide a unit with a stepped housing dictated in the ANSI C136.10 specification. This unique housing makes it easier for users to distinguish visually between a standard photocontrol and a shorting or open cap.

Shorting and non-shorting models are available as well as optional surge protection (545 Joule).

# LC SERIES PHOTOCONTROL THERMAL, LOCKING STYLE, RESIDENTIAL GRADE

TE Connectivity's (TE) LC Series offers a locking style control ideal for residential lighting applications. The LC Series locking-type photocontrol offers an economical and cost-effective means of controlling residential lighting systems from dusk to dawn.

A heavy-duty thermal bi-metal switch that produces a minimum 30 - 45 second time delay, virtually eliminating unwanted OFF/ON operations that could result from lightning, car headlights or other sudden changes in the ambient outdoor light level.

LC controls are a perfect and reliable solution for lighting driveways, patios, decks, entryways or other areas around the home where security lighting is desired

# AM SERIES RECEPTACLES

## LOCKING TYPE, WEATHERPROOF, LONG LASTING

TE Connectivity (TE) offers a long life and weatherproof locking style receptacle. The AM Series is designed specifically for street, roadway and outdoor lighting applications.

This 3-pole, 3-wire locking type receptacle conforms to the ANSI, NEMA, and UL standards for lighting receptacles. The AM-1-A and AM-2-A includes mounting brackets.

Common uses for the AM Series Receptacles include roadway, park, and parking lighting.

### KEY FEATURES

# AA SERIES PHOTOCONTROL

## THERMAL, BUTTON STYLE, WIRE - IN DESIGN

TE Connectivity's (TE) AA Series offers a unique button style design for internal post fixtures or mounting applications. Common uses include decorative light fixtures, post lanterns, wall mount applications, and other commercial and residential uses. TE's innovative design with the wire leads exiting from the rear allow the control to be placed in tight locations while positioning the wiring for easy access.

The AA Series photocontrol is constructed of a high impact UV stabilised polycarbonate housing for superior quality. The 105W and 1068W controls include a brushed aluminium wall plate for installation in standard outlet boxes.

The 105M and 1068M are equipped with a 180 Joule Metal Oxide Varistor (MOV) and are designed to protect luminaries where transient voltage surges are a frequent and recurring problem.

The 105HA is a high ambient temperature photocontrol, designed specifically to last longer in today's hotter running HID luminaries. This unit incorporates insulation and heat sink to absorb the heat generated by the lamp and other components, significantly adding to the control's useful life.

### KEY FEATURES

- 3/4in long threaded nipple
- 30 - 45 second time delay
- UL and CSA Listed
- Durable polycarbonate housing
- 1800 and 1200 watt load rating
- Fail mode is ON
