## POWER RELAY

## 1 POLE— 5 A (MEDIUM LOAD CONTROL)

## VE SERIES

RoHS compliant

## - FEATURES

- UL, CSA, VDE, CQC recognized
- 1 form A (SPST-NO) or 1 form C (SPDT) contact
- Low cost, miniature relay with big performance in small package
-Higher surge voltage type is available ( $6,000 \mathrm{~V}$ )
-2,000 VAC between coil and contacts
- Slim type-meets high density mounting requirement
- Wide operating range
- Easy circuit design with completely separated terminal arrangement (coil and contact terminals)
- Plastic sealed type
- RoHS compliant since date code: 0434R Please see page 8 for more information
- Crepage min. 3.2 mm

## RoHS Compliance and Lead Free Relay Information

## 1. General Information

- Relays produced after the specific date code that is indicated on each data sheet are lead-free now. All of our signal and power relays are lead-free. Please refer to Lead-Free Status Info. (http://www.fujitsu.com/us/downloads/MICRO/fcai/relays/lead-free-letter.pdf)
- Lead free solder paste currently used in relays is $\mathrm{Sn}-3.0 \mathrm{Ag}-0.5 \mathrm{Cu}$.
- All signal and power relays also comply with RoHS. Please refer to individual data sheets. Relays that are RoHS compliant do not contain the 5 hazardous materials that are restricted by RoHS directive (lead, mercury, chromium IV, PBB, PBDE).
- It has been verified that using lead-free relays in leaded assembly process will not cause any problems (compatible).
- "LF" is marked on each outer and inner carton. (No marking on individual relays).
- To avoid leaded relays (for lead-free sample, etc.) please consult with area sales office.
- We will ship leaded relays as long as the leaded relay inventory exists.

Note: Cadmium was exempted from RoHS on October 21, 2005. (Amendment to Directive 2002/95/EC)

## 2. Recommended Lead Free Solder Profile

- Recommended solder paste $\mathrm{Sn}-3.0 \mathrm{Ag}-0.5 \mathrm{Cu}$.

## Reflow Solder condition

## Flow Solder condition:

Pre-heating: maximum $120^{\circ} \mathrm{C}$
Soldering: dip within 5 sec . at
$260^{\circ} \mathrm{C}$ soler bath

## Solder by Soldering Iron:

## Soldering Iron

Temperature: maximum $360^{\circ} \mathrm{C}$
Duration: maximum 3 sec .

## We highly recommend that you confirm your actual solder conditions

## 3. Moisture Sensitivity

- Moisture Sensitivity Level standard is not applicable to electromechanical realys.

## 4. Tin Whisker

- Dipped SnAgCu solder is known as low risk tin whisker. No considerable length whisker was found by our in house test.
