# Tutorial Panels Uno Volta

#### UV-127

### Three-phase electric motor, two-speed

The Uno Volta tutorial panel is used to get you acquainted with several practical applications in the field of electrical engineering. The important part consists of electro-motors and their connection. The most common ones are DC motors, single-phase motors and three-phase motors. Therefore, the following electric motors are also a logical part of the offer.

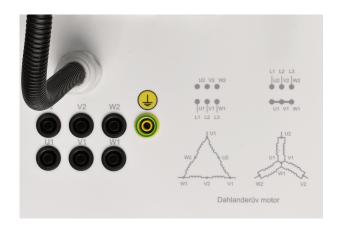

#### **Motor Parameters:**

Supply Voltage: 3x400V D/YY

Speed: 1400 / 2800 rpm.

Three-phase electric motor, two-speed with so-called

Dahlender principle of winding connection

UV-127 Uno Volta

# Examples of connections:

- Three-phase electric motor circuits with two speed of rotation, for example the electric fans.
- Electric motor at a constant low speed
- Electric motor at a constant high speed
- Electric motor with PLC control system UV-132 and panel UV-106

## Accessories:

- Power cord
- Operating Instructions

# Optional accessories

- Security patch cords
- Protective bag
- Task book
