## **Warning !**

### 1. Battery

Battery on board is consumables. We doesn't guarantee the life time of it.

### 2. Fanless solution with HDD

Please be aware of specification & limitation for HDD when fanless solution is implemented.

3. We will not give further notification if there is any change about the product information and the manual.

4. SATA does not support Hot SWAP.

5. There would be  $\pm 20\%$  difference of WDT at room temperature.

6. Please make sure the voltage specification meet the requirement of the equipment before plugging into the power.

7. SSD has 2 types, commercial grade and industrial grade, which provide different read/write speed, operation temperature and life cycle.  
Please contact sales for further information before ordering.

8. Caution ! Please notice that the heat dissipation problem could cause the MB system unstable. Please handle the heat dissipation properly when buying single MB.

9. Please avoid to approach the heat sink area and prevent being scalded when using the Fanless products.

10. If the users repair, modify or destroy any component of product unauthorized, We would not take responsibility or provide warranty.

11. DO NOT apply any other material onto the thermal pad in case reducing cooling performance.

12. It is important to install a System Fan toward the CPU to prevent the possibility of overheating / system hang up issues from Cedar view-D series of motherboard or else customer is required to have well cooling system to dissipate heat from CPU.

## \* Hardware Notice Guide

1. Before installing the power supply with this motherboard, please attach the 12V/DC ( 2 pin connector ) of the adapter to motherboard first.  
After that, plug the adapter power to AC outlet.  
Always normally shut down the computer before you move the system unit or remove the power supply from the motherboard.  
Please unplug the 12V/DC ( 2 pin connector ) of the adapter from motherboard first.  
Then unplug the adapter from the AC outlet.  
Please refer to procedure from the photo 1
2. There will be high possibility to burn out the CPU if you change/ modify any parts of the CPU cooler.
3. Please wear wrist strap and attach it to a metal part of the system unit before handling a component.  
You can also touch an object that is of ground connection or with metal surface if you don't have wrist strap.
4. Please be careful when you handle this product. Pay attention to & don't touch the sharp-pointed components at the bottom PCB .
5. Please pay attention to this: Remove or change any components form the motherboard will VOID the warranty of the motherboard you purchased .
6. Before you install/remove any components or make any jumper setting on the motherboard, please make sure to disconnect the power first.  
( Please follow the instructions as of this guide )
7. Please only use single side Mini PCIe card, do not use the double side Mini PCIe card which is not suitable.
8. Please follow this instruction carefully when using the "POWERON after PWR-Fair" function.  
When the DC power adaptor runs out of power, unplug it from the DC current;  
when power returns plug it back in only after 5 seconds. If there is a power outage, unplug it from the AC current, when power returns plug it back in only after 30 seconds.  
Otherwise it will cause system locking or serious damage.

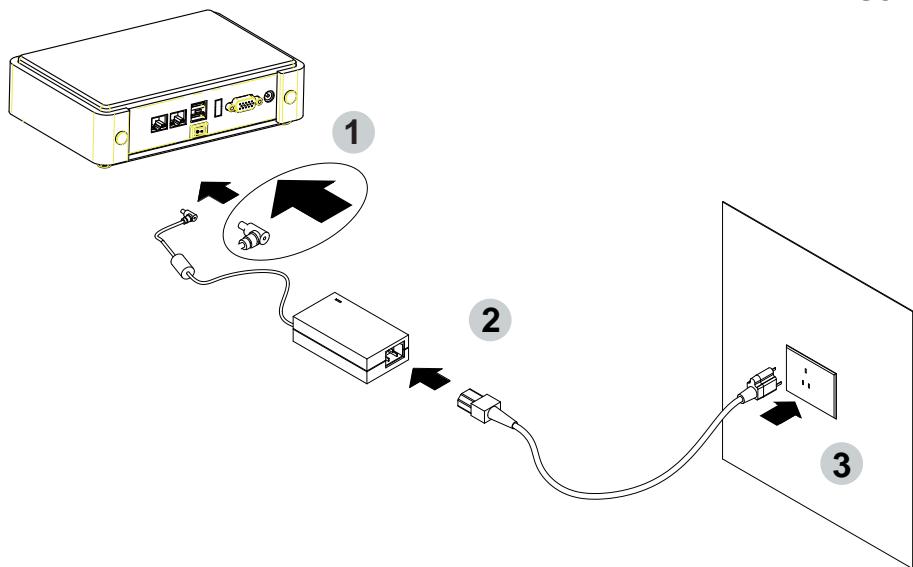

### Remark 1:

**Always insert/unplug the 12V/DC ( 2 pin connector ) horizontally & directly from the motherboard.**

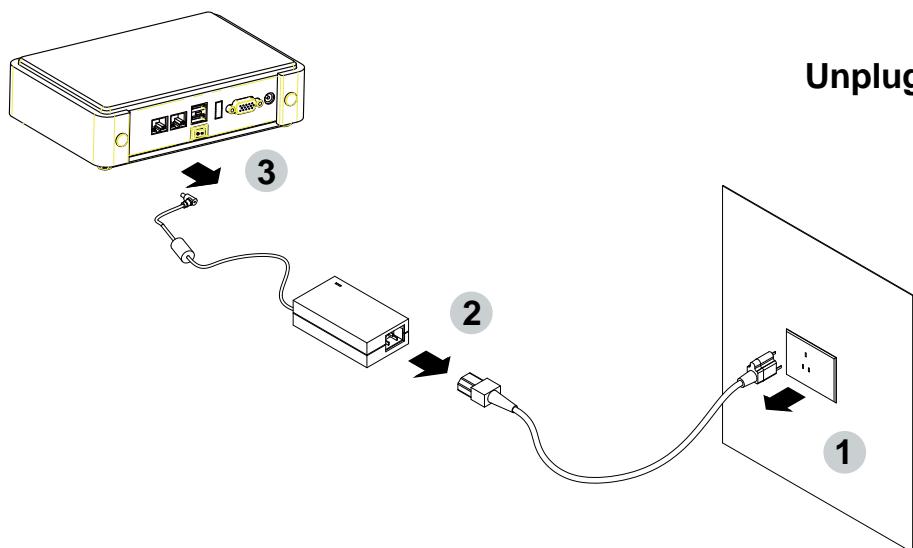

**DO NOT twist the 12V/DC ( 2 pin connector ) gently, it is designed to fit snugly .  
Moreover, erratic pull / push testing with the DC Jack might cause the unpredictable damage to the component & system unit.**

# **Chapter-1**

## **General Information**

The 3I847AW/CW is a 3.5-inch compact embedded system board that features Intel® 1. Mobile Ivy Bridge 1047UE/i3/i5/i7 Processor paired with HM76 chipset to support two super speed USB 3.0 ports, and one DDR3 SO-DIMM memory socket up to 8GB DDR3 SDRAM/ 1600MHz.

High-performance and power-efficient communication platform, the embedded motherboard of 3I847AW/CW is specially designed for advanced embedded car PC or POS system applications where the economical use of power is in high demand. Also, there is a sizable on board DDR3 memory from 3I847AW/CW motherboards which will provide more stability to the system. This motherboard will ensure the high performance levels required for today's most popular POS/Automation control applications including Embedded Car PC, POS, ATM, Kiosk and Panel PC applications.

The 3I847AW/CW integrates with Intel® HD graphics engine to support OGL 3.0, dual displays of CRT resolution up to 1920x 1200, single/dual channel 18-/ 24- bit LVDS (3I847CW) and HDMI 1080p. Besides, 3I847AW/CW has Intel LAN chipset with 10/100/1000 Mbps Ethernet for seamless broadband connectivity. With the Wake-On LAN function and the PXE function in BIOS for Intel LAN chipset, it is perfect control board for networking devices.

3I847AW/CW also supports multiple COM ports of five RS232/485 and one RS422/485 to meet the needs of connectivity for multiple COM ports. In addition, there are multi-ports of Hi-Speed USB 3.0 and USB 2.0 to enhance the host controller interface which will ensure the high performance level and flexible expansion. A single Flash chip holds the system BIOS, and you can change the Flash BIOS by the Utility Update.

The 3I847AW/CW is All-In-One board which could apply to the use of Networking, POS or Automation Control Board. It is designed to combine all necessary input and output affects interfaces, which makes it to be ideal All-In-One control board for the demand of Networking, POS and Automation Control applications. 3I847AW/CW is the perfect platform for a whole range of small form factor.

## **1-1 Major Feature**

1. Mobile Ivy Bridge 1047UE/i3/i7 Processor
2. Intel® HM76 Express Chipset
3. DDR3 up to 8GB; data transfer rates of 1333MT/s and 1600 MT/s
4. 2 x Intel® Giga LAN
5. On board SSD 2/4/8/16/32/64 GBytes (Option)
6. Support expanded PCIe Mini card for PCIe x1 and USB interface,  
PCIe Mini card for PCIe x1 or mSATA and USB interface
7. Support up to 4 SATA ports
8. Hardware digital Input & Output, 8 x DI / 8 x DO  
Hardware Watch Dog Timer, 0~255 sec programmable
9. On board DC +12V
10. PCB Dimension: 146 x 102 mm
11. Up to 2 SIM card sockets
12. 3I847C: USB /COM interface Touch screen controller, support 4- , 5- , 8- wire Analog  
Resistive touch screen. Resolution is up to 2048 x 2048

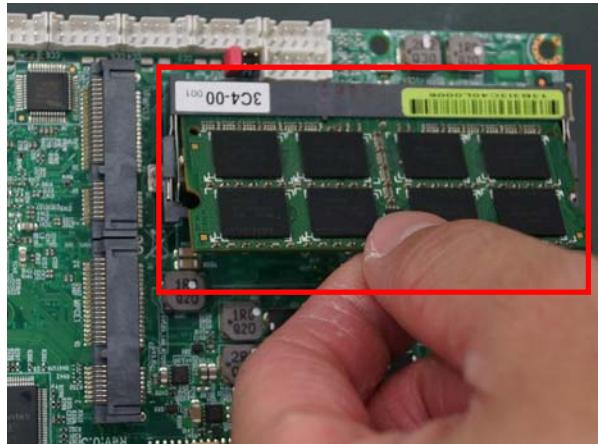

---

## 1-2 Specification

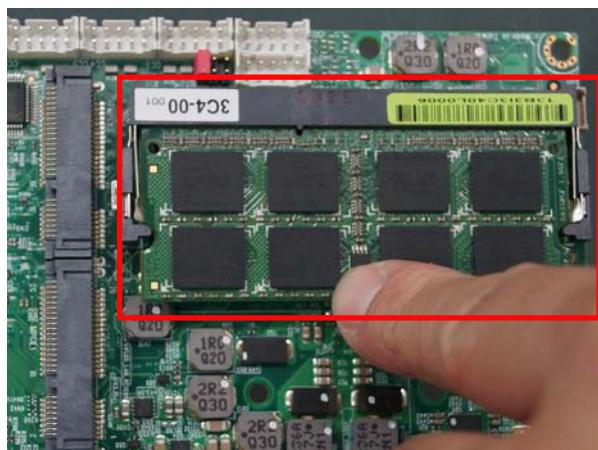

1. **CPU+Chipset:** 1. Intel Chief River platform; the two-chip platform consists of a Mobile Ivy Bridge 1047UE/i3/i5/i7 Processor and the Platform Controller Hub (PCH)  
Panther Point HM76 chipset
2. **Memory:** Single Channel DDR3 SODRAM 204pin, Max. 8GB,  
DDR3 data transfer rates of 1600 MT/s
3. **VGA:** Intel Mobile Ivy Bridge 1047UE Processor Integrated Graphics
4. **SATA:** Integrated Serial ATA Host Controller Up to 4 SATA ports: 1 SATA port 3.0 Data transfer rates up to 6.0 Gb/s (600 MB/s), 1 SATA ports 2.0 Data transfer rates up to 3.0 Gb/s (300 MB/s), 1 mini card socket for mSATA Data transfer rates up to 6.0 Gb/s (600 MB/s), 1 on board NAND drive (Option)
5. **LAN:** Intel 82579LM Gigabit Ethernet PHY & Intel 82574L PCIe LAN NIC
6. **Serial Port:** 5 x RS232 (Internal); 1 x 422/485 (Internal)
7. **USB:** 2 x USB 3.0 (external) on board; 2 x USB 2.0 on board; 5 x USB 2.0 (internal)
8. **Sound:** Intel High Definition Audio Interface
9. **Audio Amplifier:** 2 channel Class D Audio Amplifier; 2.57W/Ch (Typ.) into a 4ΩLoad,  
1.46 W/Ch (Typ.) into a 8ΩLoad
10. **WDT/DIO:** Hardware digital Input & Output, 8 x DI / 4 x DO (Option)  
Hardware Watch Dog Timer, 0~255 sec programmable (Option)
11. **Expansion interface:** 1 PCIe Mini card for PCIe x1 and USB interface,  
1 PCIe Mini card for PCIe x1 or mSATA and USB interface, up to 2 SIM card sockets  
(1 socket is optional and share on board SSD).
12. **BIOS:** AMI UEFI BIOS
13. **Dimension:** 145 x 102 mm
14. **Power:** On board DC +12V
15. **Power Consumption:** Please refer to Page. 84
16. **3G Wireless:** 3G SIM card reader
17. **LVDS:** 1 LVDS 2x15 pin (1.25mm) connector for 24bits/2ch LVDS interface
18. **Touch function:** 3I847C: USB /COM interface Touch screen controller,  
support 4- , 5- , 8- wire Analog Resistive touch screen. Resolution is up to 2048 x 2048

## 1-3 Installing the SO-DIMM

1. Align the SO-DIMM with the connector at a 45 degree angle.

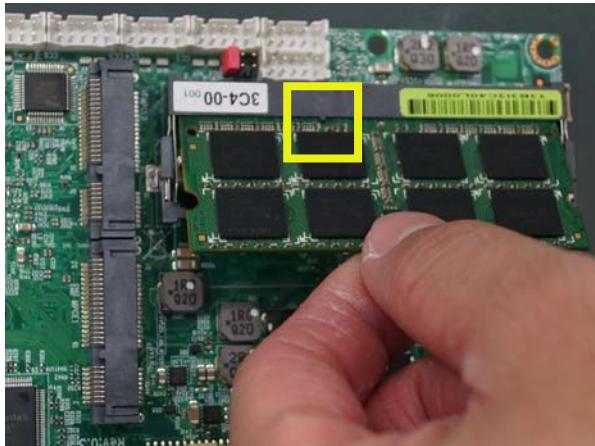

2. Press the SO-DIMM into the connector until you hear a click.

Notices:

- 1.The connectors are designed to ensure the correct insertion. If you feel resistance, check the connectors & golden finger direction, and realign the card.

2. Make sure the retaining clips (on two sides of the slot) lock onto the notches of the card firmly.

### 1-3-1.1 Removing the SO-DIMM

1. Release the SO-DIMM by pulling outward the two retaining clips and the SO-DIMM pops up slightly.

2. Lift the SO-DIMM out of its connector carefully.

## 1-4 Directions for installing the Mini Card

1. Unscrew the screw on the board

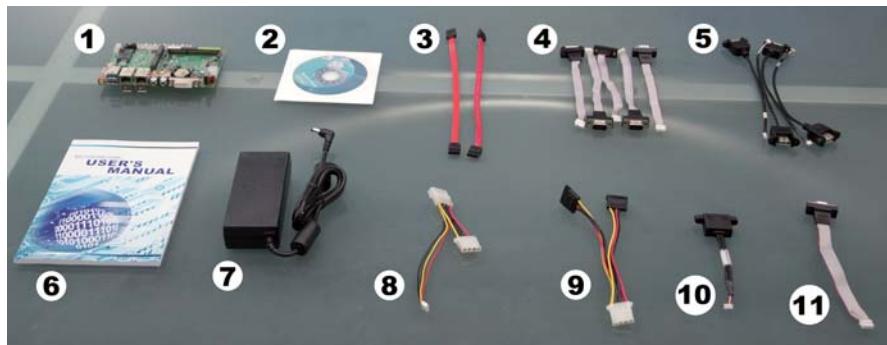

2. Plug in the Mini Card in a 45° angle

3. Gently push down the Mini Card and screw the screw back.

\*The packing list above is for the users who purchase single motherboard. The users who purchase the board with chassis may refer to the packing list in the Assembly Guide.

Please contact with your dealer if any of these items is missing or damaged on delivery. And please keep all parts of the delivery package with packing materials in case if you need to deliver or store the product in the future.

# **Chapter-2**

## **Hardware Installation**

This chapter provides the information how to install the hardware of 3I847AW/CW. Please follow section 1-6, 2-1 and 2-2 to check the delivery package and unpack carefully. Please follow the jumper setting procedure.

### **2-1 Unpacking Precaution**

The 3I847AW/CW board has been well packed with an anti-static bag to protect its sensitive components and circuitry from damage due to static electric discharge.

#### **NOTE!**

1. Do not touch the board or any other sensitive components without all necessary anti-static protection.
2. Please pay attention to the voltage limitation of DC-IN12 V ± 5 %. Overuse of DC-IN voltage limitation or change to another power adapter (not provided with this system) will VOID warranty.

You should follow these steps to protect the board from the static electric discharge whenever you handle the board:

1. Ground yourself by a grounded wrist strap at all times when you handle the 3I847AW/CW. Well secure the ALLIGATOR clip of the strap to the end of the shielded wire lead from a grounded object. Please put on and connect the strap before handling the 3I847AW/CW for harmlessly discharge any static electricity through the strap.
2. Please use anti-static pad to put any components, parts, or tools on the pad whenever you work on them outside the computer. You may also use the anti-static bag instead of the pad. Please ask your local supplier for necessary parts on anti-static requirement.
3. Do not plug any connector or set any jumper when the power is on.

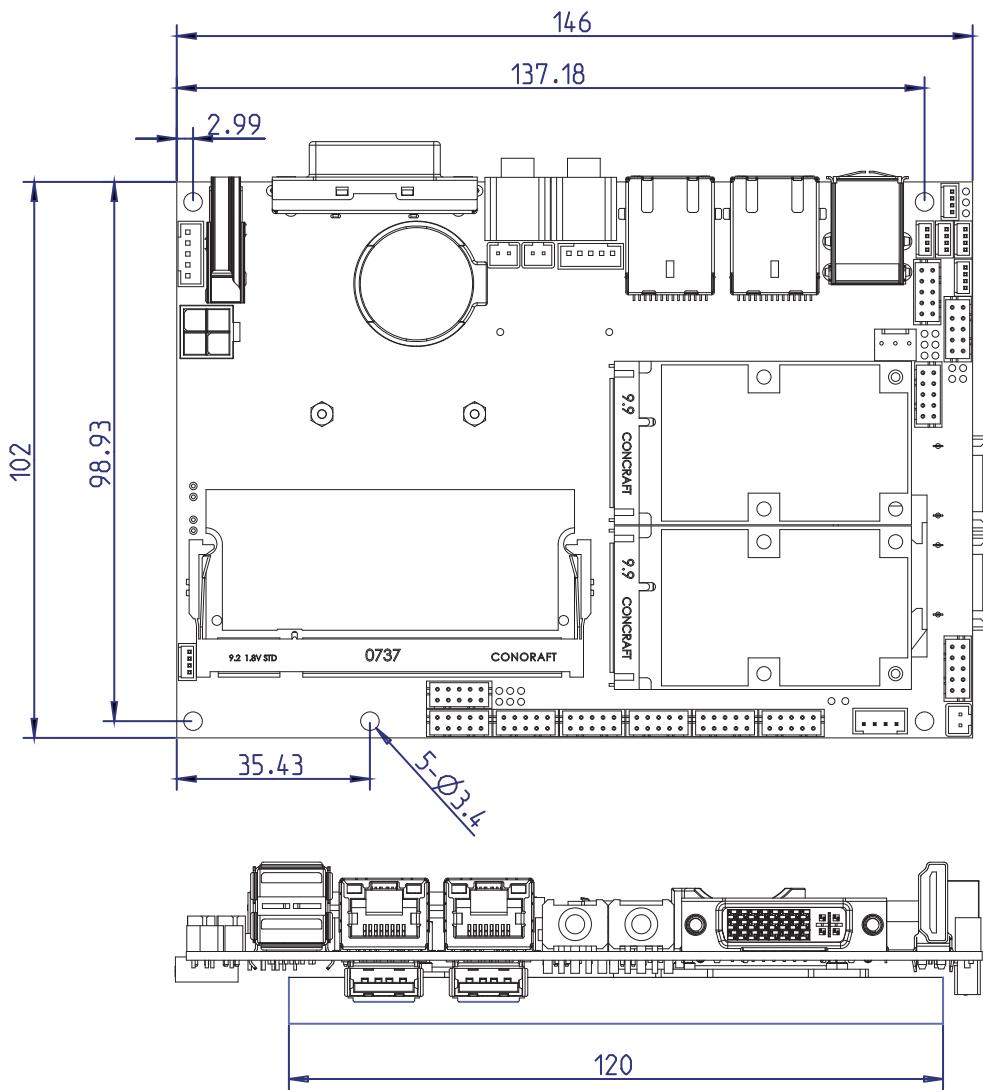

---

## **2-2 Unpacking checkup**

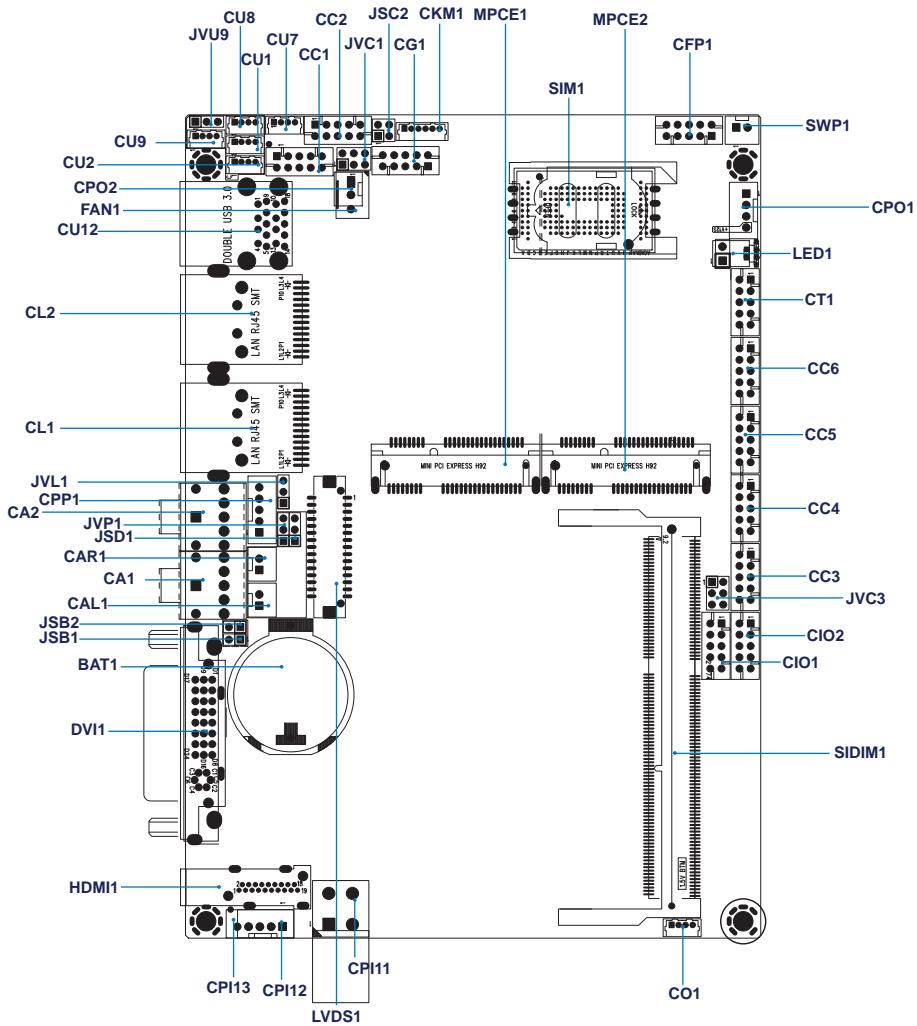

First of all, please follow all necessary steps of section 2-1 to protect 3I847AW/CW from electricity discharge. With reference to section 1-6 / 1-7 / 1-8, please check the delivery package again with following steps:

1. Unpack the 3I847AW/CW board and keep all packing material, manual and driver disc etc, do not dispose !
2. Is there any components lose or drops from the board?  
DO NOT CONTINUE TO INSTALL THIS BOARD!  
CONTACT THE DEALER YOU PURCHASED  
THIS BOARD FROM, IMMEDIATELY.
3. Is there any visible damage on the board?  
DO NOT CONTINUE TO INSTALL THIS BOARD!CONTACT  
THE DEALER YOU PURCHASED THIS BOARD FROM, IMMEDIATELY.
4. Check your optional parts (i.e. DDR, CF etc.), all necessary jumpers setting to jumper pin-set, and CMOS setup correctly.  
Please also refer to all information of jumper settings in this manual.
5. Check your external devices (i.e. Add-On-Card, Driver Type etc.) for complete add-in or connection and CMOS setup correctly.  
Please also refer to all information of connector connection in this manual.
6. Please keep all necessary manual and driver disc in a good condition for future re-installation if you change your Operating System.

## 2-6 Install Memory

This motherboard provides one 204-pin Small Outline Dual In-line Memory Module (SODIMM) socket for memory expansion available maximum to of 2GB/4GB/8GB DDR3 SDRAM.  
DDR3 clock supports: DDR3 1333/1600MT/S

### Valid Memory Configurations

DIMM1	System Accept or Not	Total Memory
		Max.
DS/SS	Accept	8GB

DS: Double Sided DIMM

SS: Single Sided DIMM

#### NOTE!

The detected memory size is less than actual installed memory size since  
some memory has been allocated for system use.  
That's how PC works with system memory.

Please refer to page 9 for installation of memory module.

---

**NOTE!**

**When you install SODIMM module fully into the SODIMM socket,  
the eject tab should be locked into the SODIMM module  
very firmly and fit into its indentation on both sides.**

**WARNING!**

**Once you hear " Beep Beep Beep" sounds after turning on the power ,  
please check if the DRAM is installed properly or not.**

## **2-7 List of Jumpers**

- JSB1 : CMOS clear select
- JSB2 : ME RTC clear select
- JSC2 : COM2 RS422/RS485 select
- JSD1 : DPC Duty select
- JVC1 : COM1 voltage select
- JVC3 : COM3 voltage select
- JVL1 : LCD Panel power select
- JVP1 : LVDS Panel Inverter power select
- JVU9 : USB9 voltage select

## 2-8 Jumper Setting Description

A jumper is ON as a closed circuit with a plastic cap covering two pins. A jumper is OFF as an open circuit without the plastic cap. Some jumpers have three pins, labeled 1, 2, and 3. You could connect either pin 1 and 2 or 2 and 3.

The below figure 2.2 shows the examples of different jumper settings in this manual.

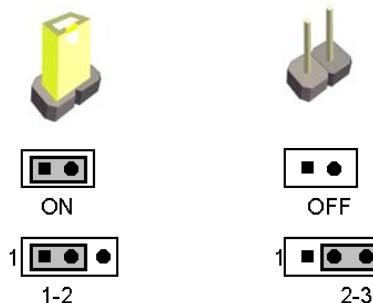

Figure 2.2

All jumpers already have its default setting with the plastic cap inserted as ON, or without the plastic cap as OFF. The default setting may be referred in this manual with a " \* " symbol .

## 2-9 CMOS Data Clear

A battery must be used to retain the motherboard configuration in CMOS RAM. Close Pin1 and pin 2 of JSB1 to store the CMOS data.

To clear the CMOS, follow the procedures below:

1. Turn off the system and unplug the AC power
2. Remove DC 12V power cable from DC 12V power connector
3. Locate JSB1 and close pin 1-2 for few seconds
4. Return to default setting by opening pin 1-2
5. Connect DC 12V power cable back to DC 12V Power connector

## JSB1: CMOS Data Clear

JSB1	Description
*open	Normal Set
short	CMOS Data clear

Note : Normal work is open jumper

Note: Do not clear CMOS unless

- 1. Troubleshooting**
- 2. Forget password**
- 3. You fail over-clocking system**

## 2-10 JSB2 : ME RTC Data clear

A battery must be used to retain the motherboard configuration in ME RAM. Close Pin1 and pin 2 of JSB2 to store the ME data.

To clear the ME, follow the procedures below:

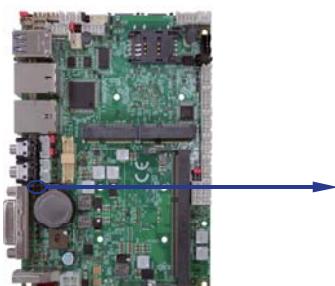

1. Turn off the system and unplug the AC power
2. Remove DC 12V power cable from DC 12V power connector
3. Locate BAT1 and Remove Li battery
4. Locate JSB2 and close pin 1-2 for few seconds
5. Return to default setting by opening pin 1-2
6. Install Li battery to BAT1 connector
7. Connect DC 12V power cable back to DC 12V Power connector

JSB2	Description

## **Connection**

This chapter provides all necessary information of the peripheral's connections, switches and indicators. Always power off the board before you install the peripherals.

### **3-1 List of Connectors**

CPI11 : DC-in internal connector (2x2pin 4.2mm ATX connector)

CPI12 : DC-in 1x4 pin (2.0mm) Red wafer connector

CPI13 : DC-in 1x5 pin (2.0mm) wafer connector ( Option )

BAT1 : Li 3V battery holder

CPO1 : DC +5/+12V output 1x4 pin(2.0mm) Black wafer connector

CFP1 : Front panel port 2x5 pin (2.00mm) wafer

SWP1 : Power On/Off switch wafer

FAN1 : CPU fan 1x3 pin (2.54mm) wafer

CG1 : VGA port 2x5 pin (2.0mm) wafer

DVI1 : DVI-D connector

HDMI1 : HDMI type A connector

LVDS1 : LVDS 2x15 pin (1.25mm) connector

CPP1 : Panel inverter power connector 1x5 pin (2.0mm) wafer

CT1 : Touch screen device 2x5 pin (2.0mm) Wafer

#### For F75111N I<sup>2</sup>C watch dog timer device :

DC spec :

Input low Voltage (VIL) : +0.8 Max

Input High Voltage (VIH) : +2V Min

Output low Current (IOL) : 10mA (Min) VOL=0.4V

Output High Current (IOH) : -10mA (Min) VOH=2.4V

Watch Dog Time value 0~255 sec

The system will be issued reset. When WDT is enable the hardware start down counter to zero.

The reset timer have 10~20% tolerance upon the Temperature.

Note : If want to SDK support. Please contact to sales window.

### How to use this Demo Application

- 1.Boot Ms-Dos Operating System
- 2.execute "75WDT.EXE" binary file
- 3.Input 1 to Enable WDT timer or input 0 to Disable it.
- 4.input numbers of second for chip countdown and Reset Computer

### Introduction

#### Enable Watch Dog Timer

```
Writel2CByte(I2CADDR, CONFIG, 0x03); //Set Watch Dog Timer function  
Writel2CByte(I2CADDR, WDT_TIMER, timer); //Set Watch Dog Timer range from 0-255.  
Writel2CByte(I2CADDR, WDT_TIMER_CTL, 0x73); //Enable Watch Dog Timer in second and pulse mode
```

#### Disable Watch Dog Timer

```
Writel2CByte(I2CADDR, WDT_TIMER_CTL, 0x00);
```

#### Time Pause for mini seconds

```
void pause(int time)  
{  
    asm mov ah,0h;          //Ah = 00 Read System Time Counter  
    asm int 1ah;           //read time from Time Counter and store it in DX register  
    asm add dx,time;  
    asm mov bx,dx;  
    label:  
    asm int 1ah;  
    asm cmp bx,dx;  
    asm jne label;  
}

How to use this Demo Application

- A Function - Enable WDT timer ,Key-in the value by seconds then system will reboot after value which you key-in in left text box !!
- B Function - Disable WDT timer ,Push down the button then WDT timer value will be clear !!
- C Function - Set DO Value ,Key-in the DO value by hex then push the button !!
- D Function - Check DI Value ,The right side two text box will display DI 1X & 2X Value when you push down the button!!

## SDK Function Introduction

# Chapter 4

## Introduction of BIOS

The BIOS is a program located in the Flash Memory on the motherboard.

This program is a bridge between motherboard and operating system.

When you start the computer, the BIOS program gains control.

The BIOS first operates an auto-diagnostic test called POST (Power on Self Test) for all the necessary hardware, it detects the entire hardware devices and configures the parameters of the hardware synchronization. After these tasks are completed, BIOS will give control of the computer back to operating system (OS). Since the BIOS is the only channel for hardware and software to communicate with, it is the key factor of system stability and of ensuring your system performance at best.

In the BIOS Setup main menu, you can see several options. We will explain these options in the following pages. First, let us see the function keys you may use here:

Press <Esc> to quit the BIOS Setup.

Press  $\uparrow\downarrow\leftarrow\rightarrow$ (up, down, left, right) to choose the option you want to confirm or modify.

Press <F10> to save these parameters and to exit the BIOS Setup menu after you complete the setup of BIOS parameters.

Press Page Up/Page Down or +/- keys to modify the BIOS parameters for the active option.

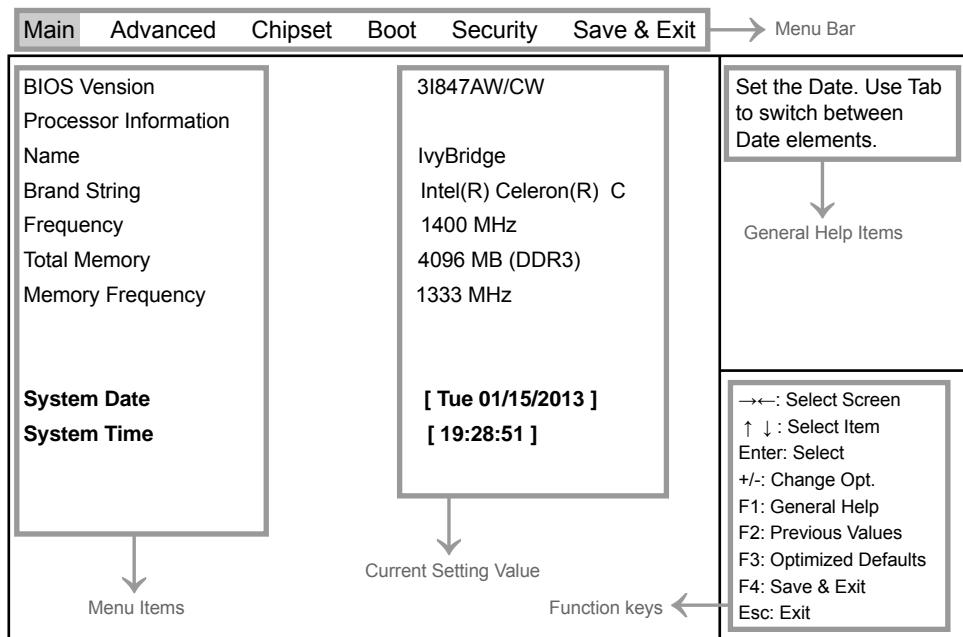

## 4-1 Enter Setup

Power on the computer and press <Del> key immediately to enter Setup.

If the message disappears before you respond but you still wish to enter Setup, restart the system by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart the system by simultaneously pressing <Ctrl>, <Alt> and <Delete> keys.

## 4-2 BIOS Menu Screen

The following diagram show a general BIOS menu screen

Version 2.14.1219. Copyright (C) 2011 American Megatrends, Inc.

## 4-3 Function Keys

In the above BIOS Setup main menu of, you can see several options.

We will explain these options step by step in the following pages of this chapter, but let us first see a short description of the function keys you may use here:

- Press ←→ (left, right) to select screen;
- Press ↑↓ (up, down) to choose, in the main menu, the option you want to confirm or to modify.
- Press <Enter> to select.
- Press <+>/<-> keys when you want to modify the BIOS parameters for the active option.
- [F1]: General help.
- [F2]: Previous value.
- [F3]: Optimized defaults.
- [F4]: Save & Exit.
- Press <Esc> to quit the BIOS Setup.

## 4-4 Getting Help

### Main Menu

The on-line description of the highlighted setup function is displayed at the top right corner the screen.

### Status Page Setup Menu/ Option Page Setup Menu

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window, press <Esc>.

## 4-5 Menu Bars

There are six menu bars on top of BIOS screen:

- Main** To change system basic configuration
- Advanced** To change system advanced configuration
- Chipset** To change chipset configuration
- Boot** To change boot settings
- Security** Password settings

**Save & Exit** Save setting, loading and exit options.

User can press the right or left arrow key on the keyboard to switch from menu bar.

The selected one is highlighted.

### USB3.0 Support

Use this item to turn on/off USB3.0 Controller support.

The optional settings are: Enabled, Disabled.

### XHCI Hand-off

This is a workaround for OSes without XHCI handoff support. The XHCI ownership change should be claimed by XHCI driver.

The optional settings are: Enabled, Disabled..

### EHCI Hand-off

This is a workaround for OSes without EHCI handoff support. The EHCI ownership change should be claimed by EHCI driver.

The optional settings are: Enabled, Disabled.

## DRIVER INSTALLATION

There is a system installation DVD in the package. This DVD does not only include all the drivers you need but also some other free application programs and utility programs.

In addition, this DVD also includes an auto detect software telling you which hardware is installed and which driver is needed so that your system can function properly. We call this auto detect software SYSTEM INSTALL.

### SYSTEM INSTALL Supports Windows XP/ Windows 7 / Windows 8 / 8.1

Insert the DVD into your DVD-ROM drive and the SYSTEM INSTALL menu should appear as below. If the menu does not appear, double-click MY COMPUTER and double-click DVD-ROM drive or click START, click RUN, and type X:\SETUP.EXE (assuming your DVD-ROM drive is X).

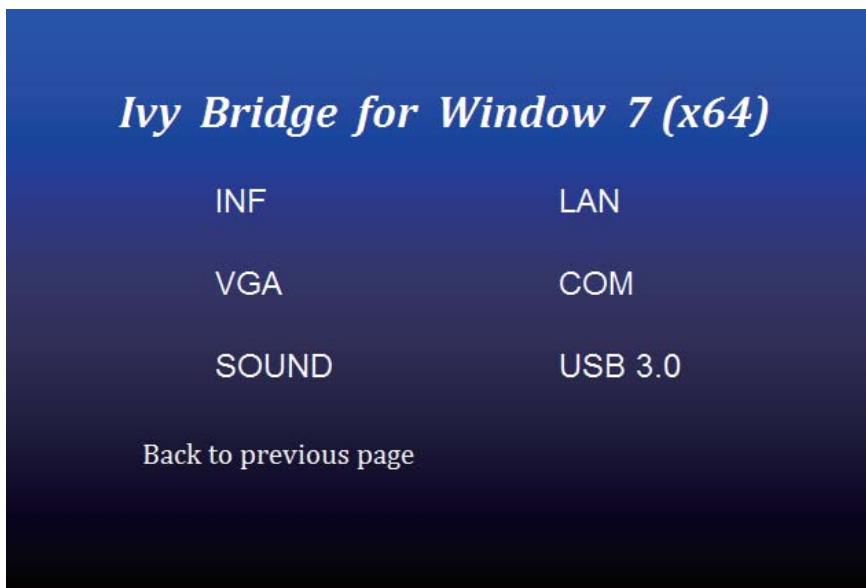

#### Make your selection from SYSTEM INSTALL menu:

1. Auto Detect Main board and OS to AUTOMATIC DRIVER INSTALLATION menu
2. Browse DVD to view the contents of the DVD
3. Exit to exit SYSTEM INSTALL menu
