## Packing List

---

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● BOXER-6313	1
● GPS antenna	1
● Screw pack	1
● Phoenix 3-pin DC-in power connector	1
● Phoenix 2-pin Remove Power Switch connector	1
● Product DVD with User's Manual (in pdf) and drivers	1

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

## About this Document

---

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the [AAEON.com](http://AAEON.com) for the latest version of this document.

## Safety Precautions

---

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. All cables and adapters supplied by AAEON are certified and in accordance with the material safety laws and regulations of the country of sale. Do not use any cables or adapters not supplied by AAEON to prevent system malfunction or fires.
3. Make sure the power source matches the power rating of the device.
4. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
5. Always completely disconnect the power before working on the system's hardware.
6. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
7. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
8. Always disconnect this device from any AC supply before cleaning.
9. While cleaning, use a damp cloth instead of liquid or spray detergents.
10. Make sure the device is installed near a power outlet and is easily accessible.
11. Keep this device away from humidity.
12. Place the device on a solid surface during installation to prevent falls
13. Do not cover the openings on the device to ensure optimal heat dissipation.
14. Watch out for high temperatures when the system is running.
15. Do not touch the heat sink or heat spreader when the system is running
16. Never pour any liquid into the openings. This could cause fire or electric shock.

17. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
18. If any of the following situations arises, please the contact our service personnel:
  - i. Damaged power cord or plug
  - ii. Liquid intrusion to the device
  - iii. Exposure to moisture
  - iv. Device is not working as expected or in a manner as described in this manual
  - v. The device is dropped or damaged
  - vi. Any obvious signs of damage displayed on the device
19. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

## FCC Statement

---

### **Warning!**

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

### **Caution:**

*There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.*

### **Attention:**

*Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.*

China RoHS Requirements (CN)

产品中有毒有害物质或元素名称及含量

AAEON Embedded Box PC/ Industrial System

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	○	○	○	○	○	○
外部信号 连接器及线材	○	○	○	○	○	○
外壳	○	○	○	○	○	○
中央处理器 与内存	○	○	○	○	○	○
硬盘	○	○	○	○	○	○
电源	○	○	○	○	○	○

○: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 标准规定的限量要求以下。

X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 标准规定的限量要求。

备注:

一、此产品所标示之环保使用期限，系指在一般正常使用状况下。

二、上述部件物质中央处理器、内存、硬盘、电源为选购品。

Product Specifications

## 1.1 Specifications

### System

- **Processor** Intel® Atom™ E3845 1.91 GHz Processor
- **System Memory** 204 pins DDR3L 1333MHz SODIMM x 1, up to 8 GB
- **Display Interface** DB-15 x 1 for VGA  
HDMI x 1
- **Storage** Front access lockable 2.5" SATA HDD bay x 2  
(optional mSATA)
- **Front I/O Panel** DB-15 x 1 for VGA  
HDMI x 1  
Power switch (w/ LED) x 1  
2-pin remote reset switch connector x 1  
Antenna holes x 4 (GPS x 1 Wi-Fi x 1, 2G/ 3G/ 4G x 3)  
CAN Bus x 2 (Raw and open CAN supported)  
Front access lockable 2.5" SATA HDD bay x 2  
System power LED x 1 (Green)  
HDD active LED x 1 (Red)  
Power status LED (Green)
- **Rear I/O Panel** USB 3.0 x 1  
USB 2.0 x 3  
10/100/1000 Mbps GbE RJ-45 x 2  
Full size MiniCard connector x 3 (one support USB only, optional mSATA)  
RS-232 x 2  
RS-232/422/485 x 2 (Select with BIOS)  
Line-out x 1

	Mic-in x 1
	3-pin terminal block power input x 1
● Expansion Slot	Full size MiniCard slot x 3
	SIM slot x 3
● OS Support	Windows® 8.1 32/64-bit
	Windows® 7 32/64-bit
	Windows® Embedded Standard 7 32/64-bit
	Windows® Embedded Standard 8 32/64-bit
	Linux
● Power	DC 12 V or 24 V w/ 3-pin terminal block

## Mechanical

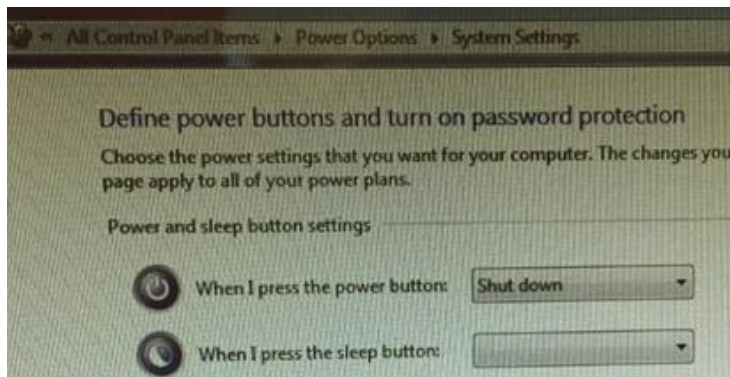

● Operating Temperature	-15 ~ 65°C (-5°F ~ 149°F) with 0.5m/s Airflow, E3845 processor, wide Temp. DRAM & Wide Temp. HDD. MiniCard not included
● Storage Temperature	-40 ~ 80°C (-40 ~ 176°F)
● Storage Humidity	5~90% @40°C, non-condensing
● Anti-Vibration	1 Grms / 5~ 500Hz / operation – Automotive HDD
● Anti-Shock	15G peak acceleration (11 msec. duration) –HDD
● EMC	CE /FCC class A
● Vehicle Certification	ISO-7636 E-13

## 1.2 Note for Windows® 7 Users

---

For Windows® 7 users, please set the power button from “Do Nothing” to “Shut down” when pressed to prevent problems during shut down or other errors (such as the Windows Error Recovery error message).

To perform this change, please follow the steps below:

- 1) Go to Control Panel
- 2) Open Power Options and select “Change what the power buttons do” option
- 3) Select “Shut down” from the drop-down list for the power buttons
- 4) Save changes and exit

# Chapter 2

Hardware Information

## 2.2 List of Jumpers

---

Please refer to the table below for all of the system's jumpers that you can configure for your application

Label	Function
JP2	Clear CMOS
JP9	COM3 +5V/+12V RING selection
JP10	COM2 +5V/+12V RING selection

### 2.2.1 Clear CMOS (JP2)

---

### 2.2.2 COM3 +12V/+5V/Ring Selection (JP9)

---

Pin	Signal
1-2	+12 V
3-4	Ring (Default)
5-6	+5 V

### 2.2.3 COM3 +12V/+5V/Ring Selection (JP10)

---

Pin	Signal
1-2	+12 V
3-4	Ring (Default)
5-6	+5 V

### 2.3 List of Connectors

Please refer to the table below for all of the system’s connectors that you can configure for your application

Label	Function
CN1	RTC connector
CN5	Display Port connector
CN13	SATA power connector (+5V/12V)
CN15	MiniCard 1 connector w/ onboard SIM (Full size MiniCard)
CN16	SIM 1 socket
CN17	MiniCard 2 connector w/ onboard SIM (Full size MiniCard)
CN18	SIM 2 socket
CN19	MiniCard 3 connector w/ onboard SIM (Full size MiniCard)
CN20	SIM 3 socket
CN21	Dual stack USB connector (2.0/3.0)
CN22	Dual stack USB connector (2.0)
CN24	Remote switch connector
CN26	5-wire touch connector
CN30	SPI connector
CN37	LAN1 connector
CN38	LAN2 connector
CN39	DC-in
CN45	External DC power in Connector
CN53	SATA Port1 connector
CN54	SATA Port2 connector
CN60	MCU Delay ON/OFF/Voltage Select
CN62	HDMI connector
CN63A	COM1 connector

CN63B	COM2 connector
CN64A	COM4 connector
CN64B	COM3 connector
CN66	SATA Power connector (+5V/12V/G-Sensor)
CN69	VGA connector
DIMM1	DDR DIMM slot
SW1	HW reset connector

2.3.1 SATA power connector (+5V/12V) (CN13)

Pin	Signal
1	+12 V
2	GND
3	GND
4	+5 V

2.3.2 MiniCard 1 connector (Full size) w/ onboard SIM (CN15)

Pin	Pin Name	Signal Type	Signal Level

Pin	Pin Name	Signal Type	Signal Level
1	GND	GND	

2	SATA_TX+	DIFF
3	SATA_TX-	DIFF
4	GND	GND
5	SATA_RX-	DIFF
6	SATA_RX+	DIFF
7	GND	GND

### 2.3.7 Input Voltage Selection (CN60)

The BOXER-6313 has special vehicle Power Supply Unit (PSU) that can provide the following power management for vehicular applications.

- Over voltage protection
- Under voltage protection
- Reverse protection
- Load dump protection
- Programmable ACC power on/off delay time

#### Setting DC input mode

##### DC Input Mode Options

Location	CN60 PIN13 and pin14	Mode	Operating Voltage	Start Voltage (Refer to the note below)
CN60				
	OPEN	12V	9V~18V	11V +/- 0.2V
	SHORT	24V	18V~36V	22V +/- 0.4V

**Note:**

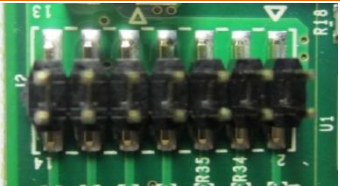

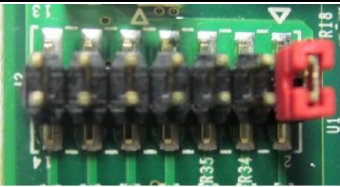

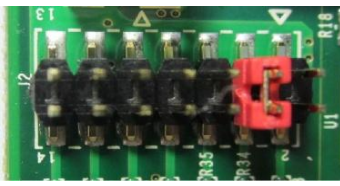

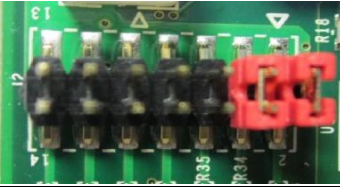

Usually, the voltage of a car battery stays at 13.5 ~15V (@ 12V Mode), or at 27 ~30V (@ 24V Mode) while the engine is running. Thus, the voltage of the battery can

provide enough energy to prevent a cold crank from starting a car engine when it is higher than 11V (@ 12V Mode) or 22V (@ 24V Mode).

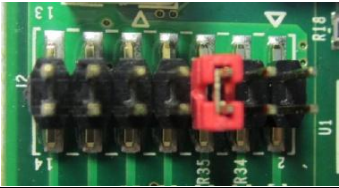

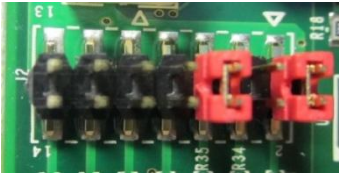

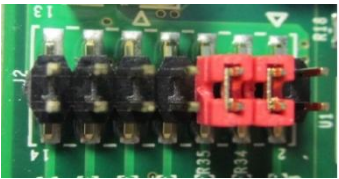

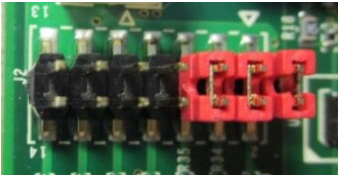

A cold crank will cause the voltage of the battery to drop to 6V (@ 12V mode) or lower, making it difficult to maintain a stable +12V power output to the BOXER-6313 and causing it to cold boot.

For the Initial Start Voltage, the input voltage will offer over 11V (@12V mode) or 22V (@ 24V mode) to the PSU. The PSU will operate at 9 ~18V (@12V mode) or 18 ~36V (@24V mode) after the ACC ON.

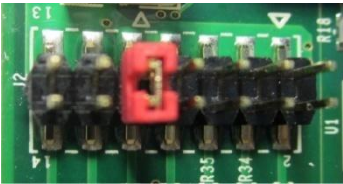

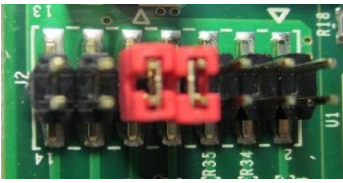

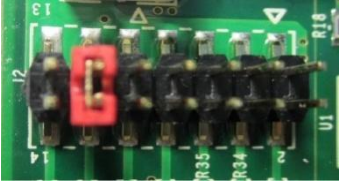

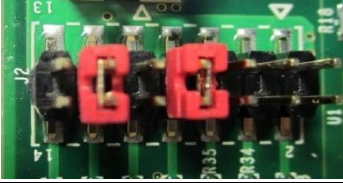

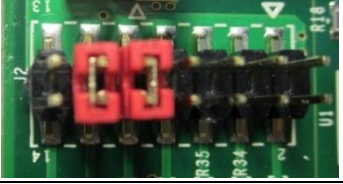

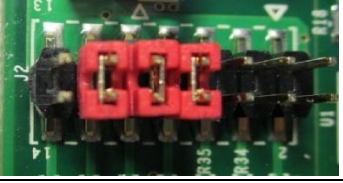

2.3.8 Delay ON/OFF/Voltage Selection (CN60)

Function	Location	Pin	Set Time
ACC Delay		1, 2, 3, 4, 5, 6 opened	1 sec
		1, 2 shorted	3 sec
		3, 4 shorted	5 sec
		1, 2, 3, 4 shorted	10 sec

	5, 6 shorted	15 sec
	1, 2, 5, 6 shorted	20 sec
	3, 4, 5, 6 shorted	25 sec
	1, 2, 3, 4, 5, 6 shorted	30 sec

Function	Location	Pin	Set Time
ACC Delay	Off	7, 8, 9, 10, 11, 12 opened	1 min
		7, 8 shorted	3 min

	9, 10 shorted	5 min
	7, 8, 9, 10 shorted	10 min
	11, 12 shorted	30 min
	7, 8, 11, 12 shorted	60 min
	9, 10, 11, 12 shorted	120 min
	7, 8, 9, 10, 11, 12 shorted	0 min

9	N/C		

## 2.4 Installing RAM and MiniCard

To install RAM and MiniCard, remove the highlighted screws to access the system's interior.

## Installing RAM

To install RAM, remove the RAM cover and slot in the RAM to the RAM slot. After that, place two thermal pads (part number 1998666630) on the RAM and secure the cover.

### Installing MiniCard

To install MiniCard, simply slot the MiniCard into the card slot and secure with screws.

# Chapter 3

---

AMI BIOS Setup

## 3.1 System Test and Initialization

---

The system uses certain routines to perform testing and initialization. If an error, fatal or non-fatal, is encountered, a few short beeps or an error message will be outputted. The board can usually continue the boot up sequence with non-fatal errors.

The system configuration verification routines check the current system configuration against the values stored in the CMOS memory. If they do not match, an error message will be outputted, in which case you will need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

- You are starting your system for the first time
- You have changed your system's hardware
- The CMOS memory has lost power and the configuration information is erased

The system's CMOS memory uses a backup battery for data retention, which is to be replaced once emptied.

## 3.2 AMI BIOS Setup

---

The AMI BIOS ROM has a pre-installed Setup program that allows users to modify basic system configurations, which is stored in the battery-backed CMOS RAM and BIOS NVRAM so that the information is retained when the power is turned off.

To enter BIOS Setup, press <Del> or <F2> immediately while your computer is powering up.

The function for each interface can be found below.

**Main** – Date and time can be set here. Press <Tab> to switch between date elements

**Advanced** – Enable/ Disable boot option for legacy network devices

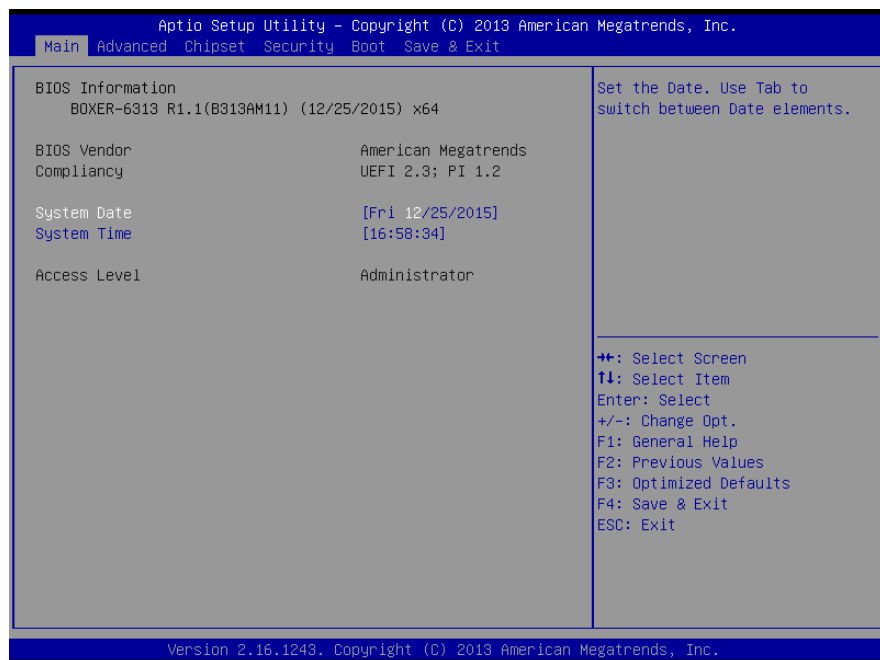

**Chipset** – For hosting bridge parameters

**Boot** – Enable/ Disable quiet Boot Option

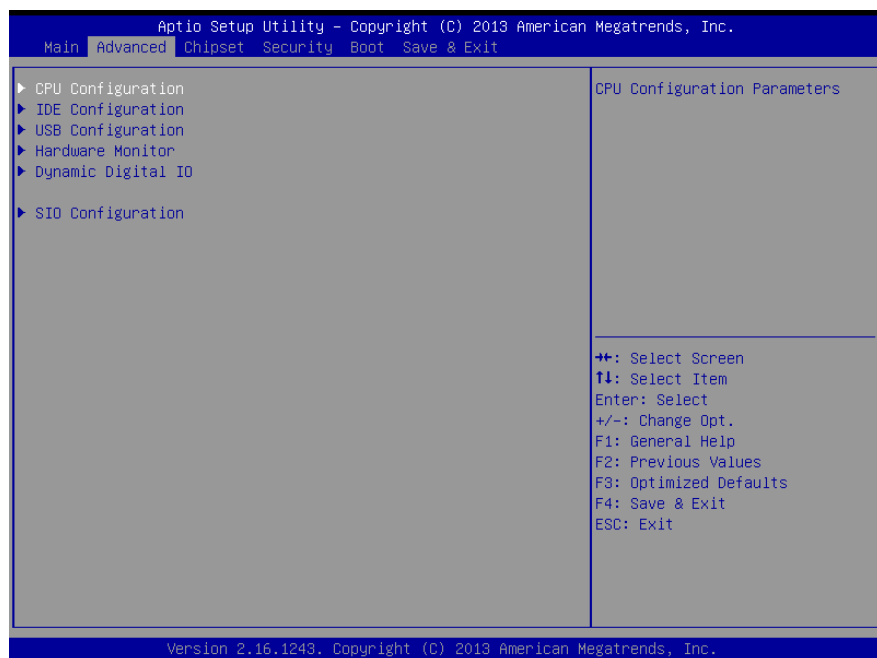

**Security** – The setup administrator password can be set here

**Save & Exit** – Save your changes and exit the program

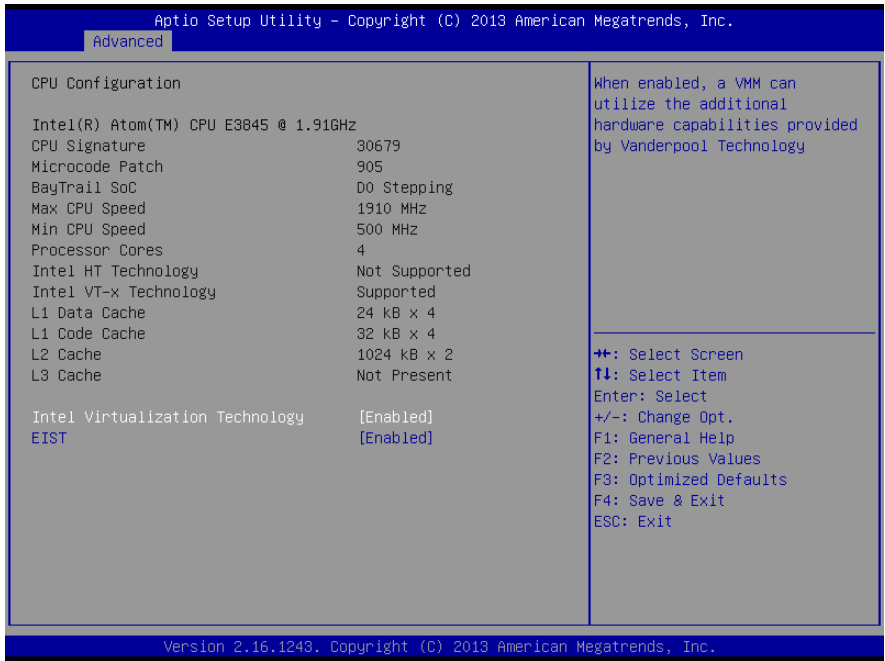

### 3.3 Setup Submenu: Main

### 3.4 Setup Submenu: Advanced

### 3.4.1 Advanced: SATA Configuration

Options summary:

Intel Virtualization Technology	Disabled	
	Enabled	Optimal Default, Failsafe Default
When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.		
EIST	Disabled	
	Enabled	Optimal Default, Failsafe Default
Enable/Disable Intel SpeedStep		

### 3.4.2 Advanced: IDE Configuration (IDE)

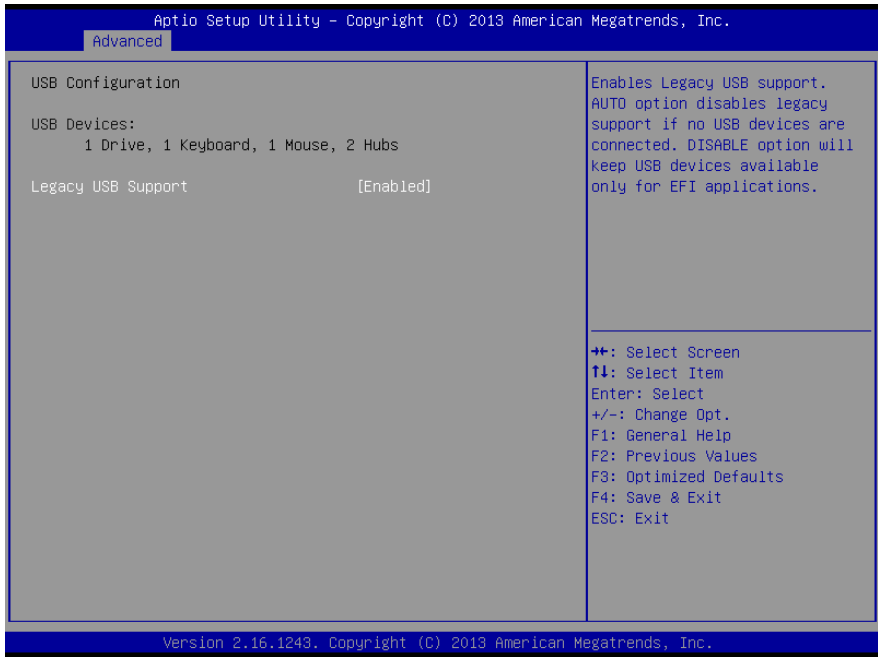

Options summary:

SATA Mode	IDE Mode	
	AHCI Mode	Optimal Default, Failsafe Default
Select IDE / AHCI		

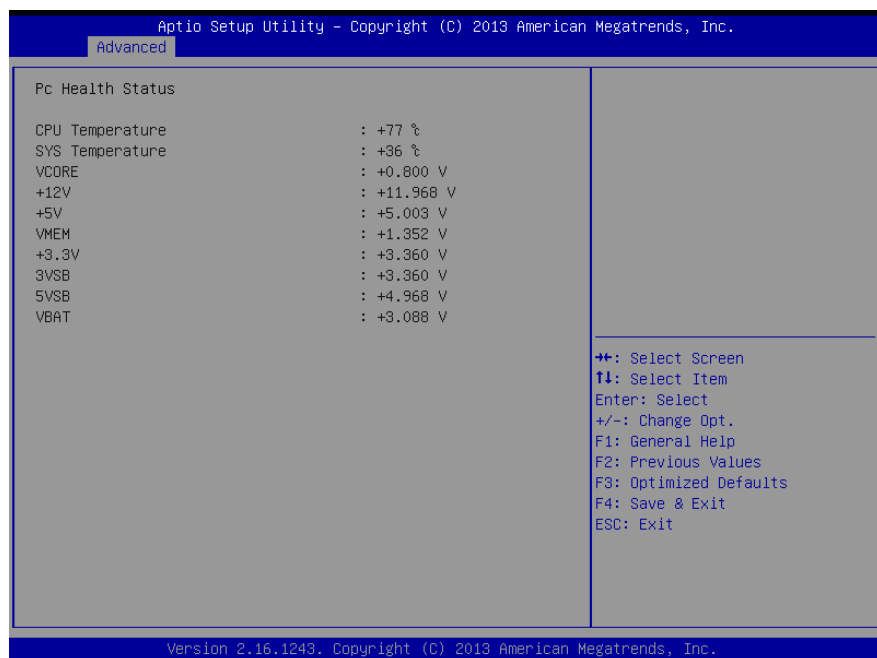

### 3.4.3 Advanced: USB Configuration

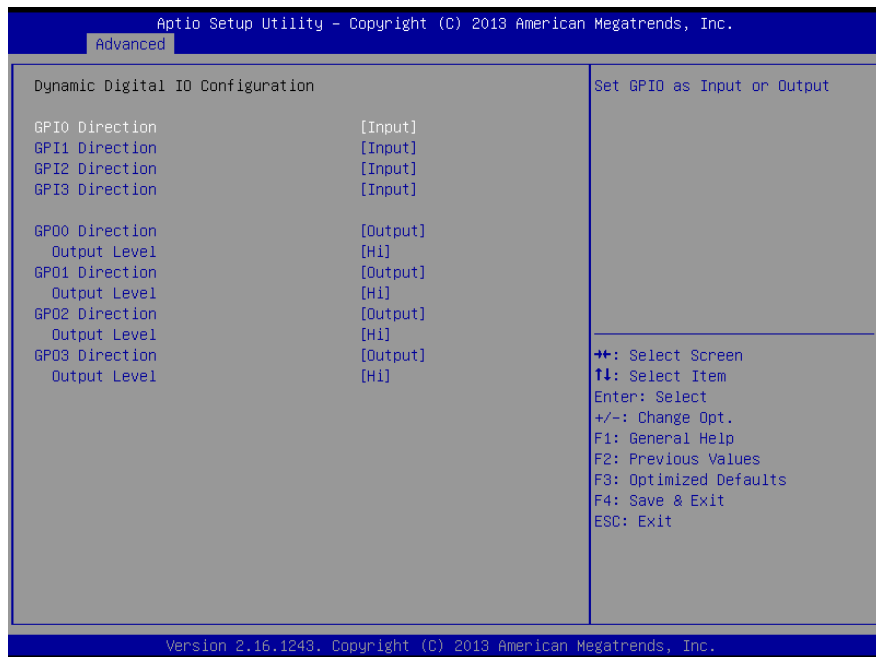

Options summary:

Legacy USB Support	Enabled	Optimal Default, Failsafe Default
	Disabled	
	Auto	
Enables BIOS Support for Legacy USB Support. When enabled, USB can be functional in legacy environment like DOS. AUTO option disables legacy support if no USB devices are connected		

### 3.4.4 Advanced: Hardware Monitor

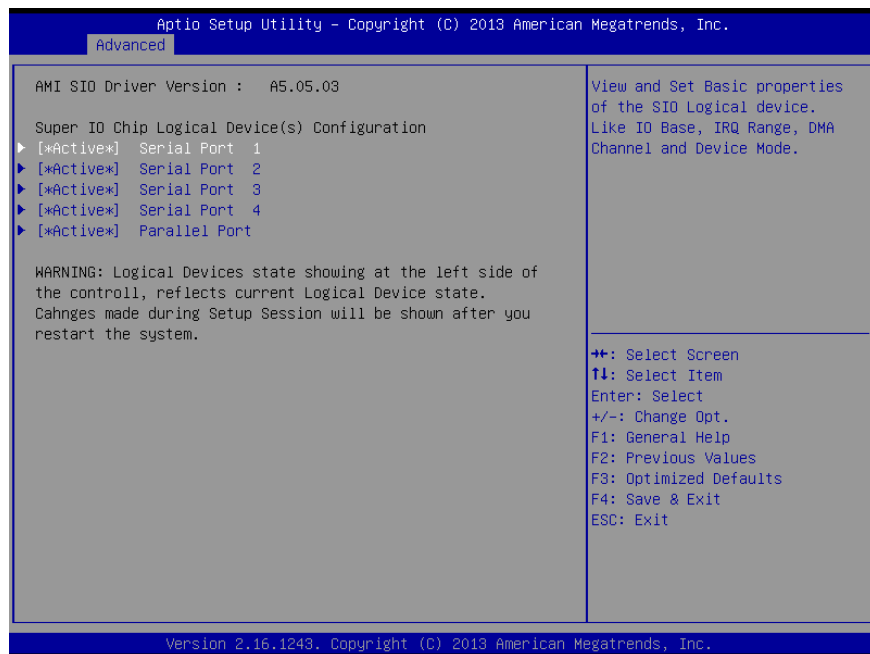

### 3.4.5 Advanced: Dynamic Digital IO Configuration

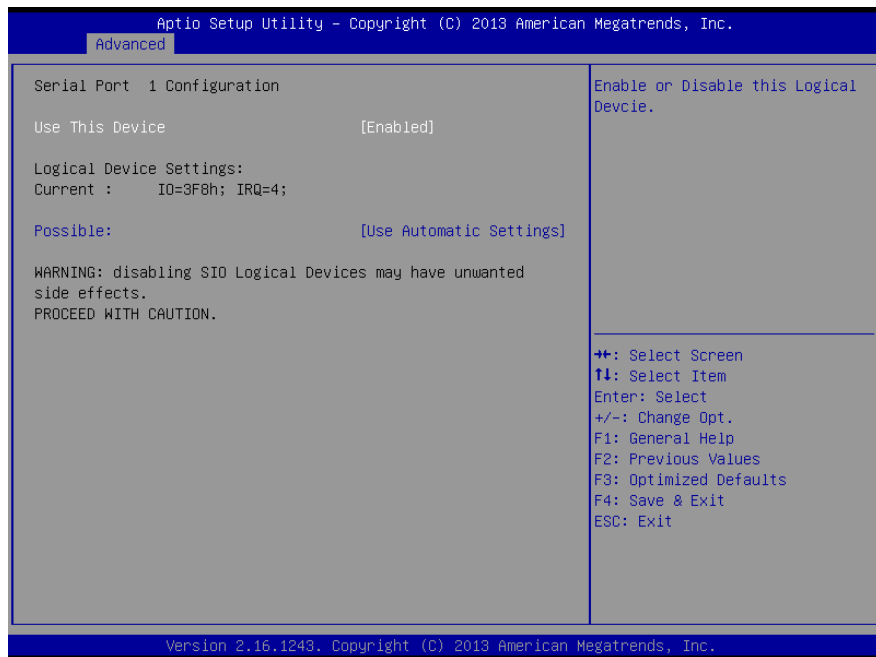

Options summary:

GPI[3:0] Direction	Input	Optimal Default, Failsafe Default
	Output	
Set GPIO as Input or Output		
GPI[3:0] Output Level	Hi	Optimal Default, Failsafe Default
	Low	
Set GPI[3:0] Output as Hi or Low		
GPO[3:0] Direction	Input	Optimal Default, Failsafe Default
	Output	
Set GPIO as Input or Output		
GPO[3:0] Output Level	Hi	Optimal Default, Failsafe Default
	Low	
Set GPO[3:0] Output as Hi or Low		

### 3.4.6 Advanced: SIO Configuration

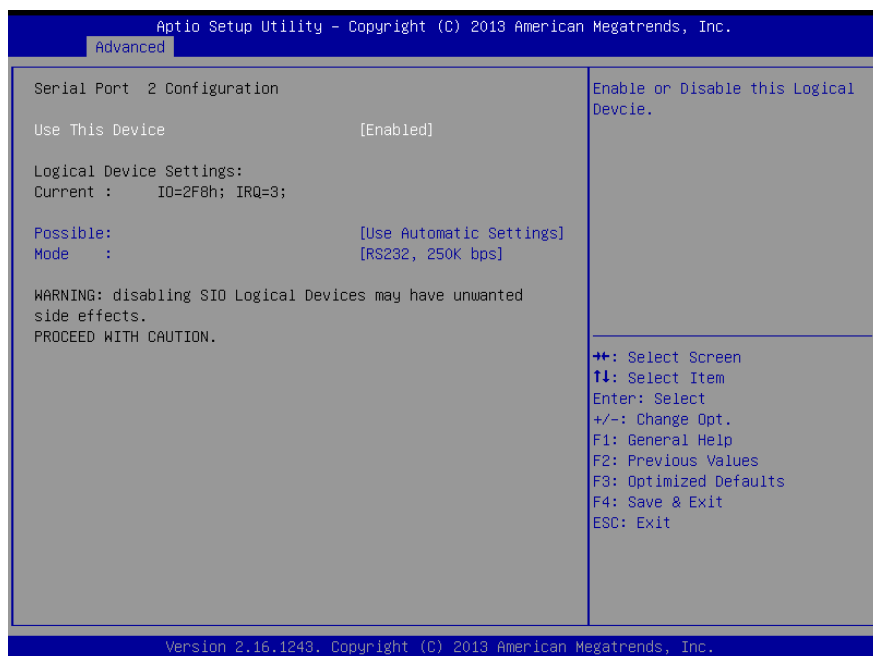

### 3.4.6.1 SIO Configuration: Serial Port 1 Configuration

Options summary:

Use This Device	Disabled	Optimal Default, Failsafe Default
	Enabled	
En/Disable Serial Port (COM)		
Possible:	Use Automatic Settings	Optimal Default, Failsafe Default
	IO=3F8; IRQ=4;	
	IO=2F8; IRQ=3;	
Select an optimal setting for IO device		

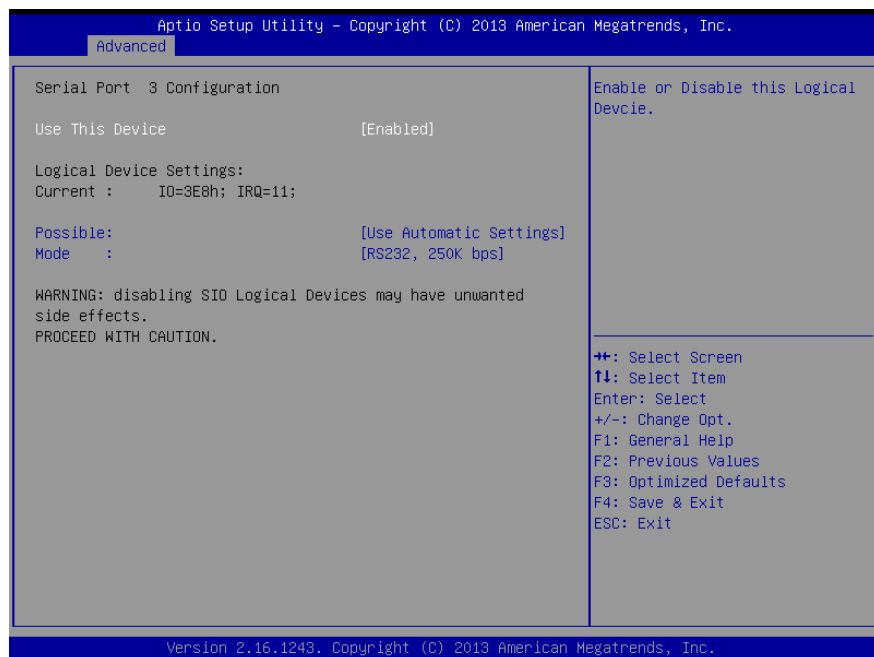

### 3.4.6.2 SIO Configuration: Serial Port 2 Configuration

Options summary:

Use This Device	Disabled	Optimal Default, Failsafe Default
	Enabled	
En/Disable Serial Port (COM)		
Possible:	Use Automatic Settings	Optimal Default, Failsafe Default
	IO=2F8; IRQ=3;	
	IO=3F8; IRQ=4;	
Select an optimal setting for IO device		
Mode	RS232, 250K bps	Optimal Default, Failsafe Default
	RS422, 250K bps	
	RS485, Driver Half Duplex, 250K bps	
	RS485, Receiver Half Duplex, 250K bps	
	Shut Down Mode	
UART RS232, 422, 485 selection		

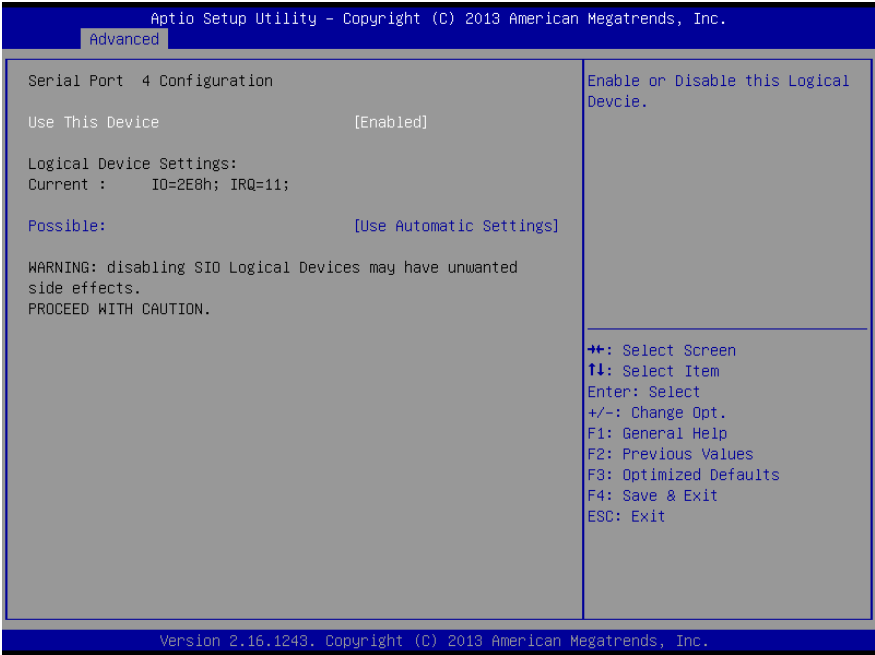

### 3.4.6.3 S IO Configuration: Serial Port 3 Configuration

Options summary:

Use This Device	Disabled	Optimal Default, Failsafe Default
	Enabled	
En/Disable Serial Port (COM)		
Possible:	Use Automatic Settings	Optimal Default, Failsafe Default
	IO=3E8; IRQ=11;	
	IO=2E8; IRQ=11;	
Select an optimal setting for IO device		
Mode	RS232, 250K bps	Optimal Default, Failsafe Default
	RS422, 250K bps	
	RS485, Driver Half Duplex, 250K bps	
	RS485, Receiver Half Duplex, 250K bps	
	Shut Down Mode	
UART RS232, 422, 485 selection		

### 3.4.6.4 S IO Configuration: Serial Port 4 Configuration

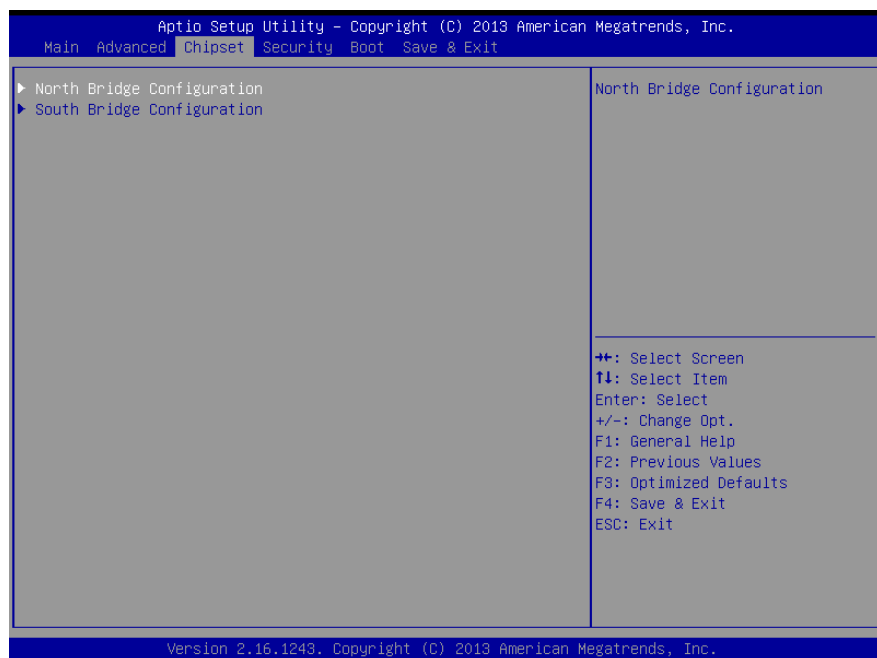

Options summary:

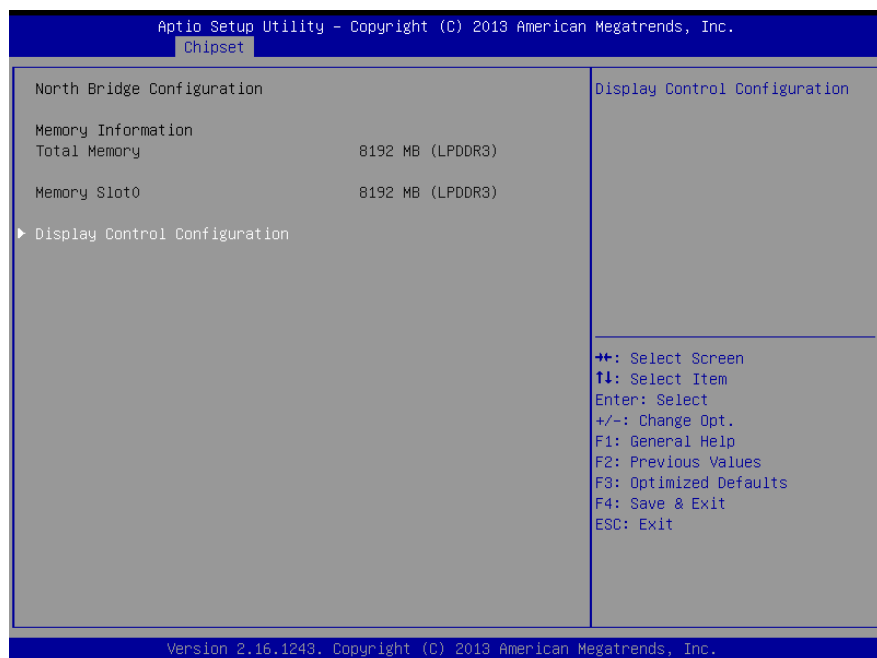

Use This Device	Disabled	Optimal Default, Failsafe Default
	Enabled	
En/Disable Serial Port (COM)		
Possible:	Use Automatic Settings	Optimal Default, Failsafe Default
	IO=2E8; IRQ=11;	
	IO=3E8; IRQ=11;	
Select an optimal setting for IO device		

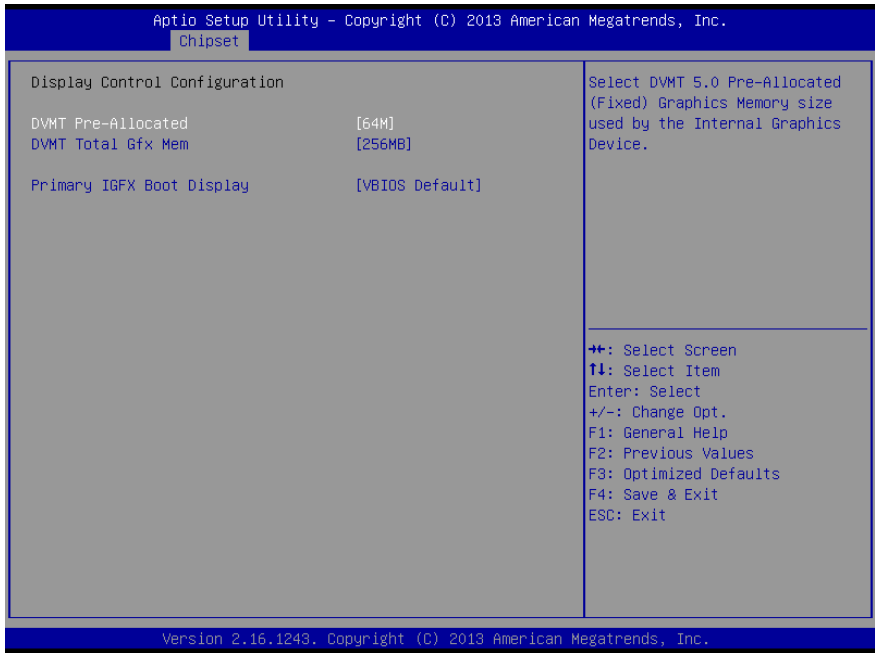

### 3.5 Setup submenu: Chipset

### 3.5.1 Chipset: North Bridge

### 3.5.1.1 North Bridge: Display Control Configuration

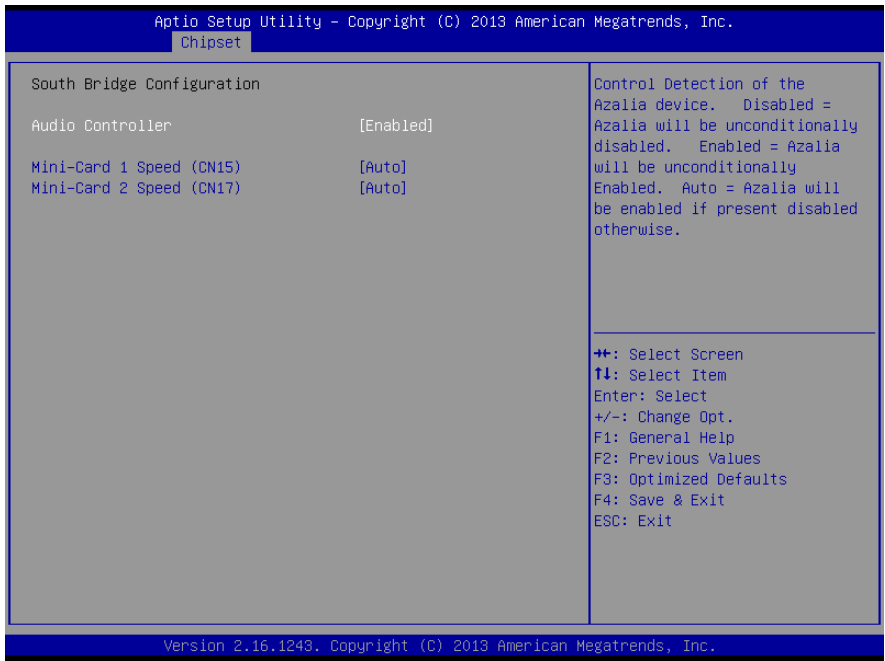

Options summary:

DVMT Pre-Allocated	64M	Optimal Default, Failsafe Default
	96M	
	128M	
	160M ...	
	512M	
Select DVMT 5.0 Pre-Allocated (Fixed) Graphics Memory size used by the Internal Graphics Device.		
DVMT Total Gfx Mem	128MB	Optimal Default, Failsafe Default
	256MB	
	Max	
Select DVMT 5.0 Total Graphics Memory size used by the Internal Graphics Device.		
Primary IGFX Boot Display	VBIOS Default	Optimal Default, Failsafe Default
	CRT	
	DP/HDMI	

Select the Video Device which will be activated during POST. This has no effect if external graphics present. Secondary boot display selection will appear based on your selection. VGA modes will be supported only on primary display		
Secondary IGFX Boot Display	Disabled	Optimal Default, Failsafe Default
	CRT	
	DP/HDMI	
Select Secondary Display Device		

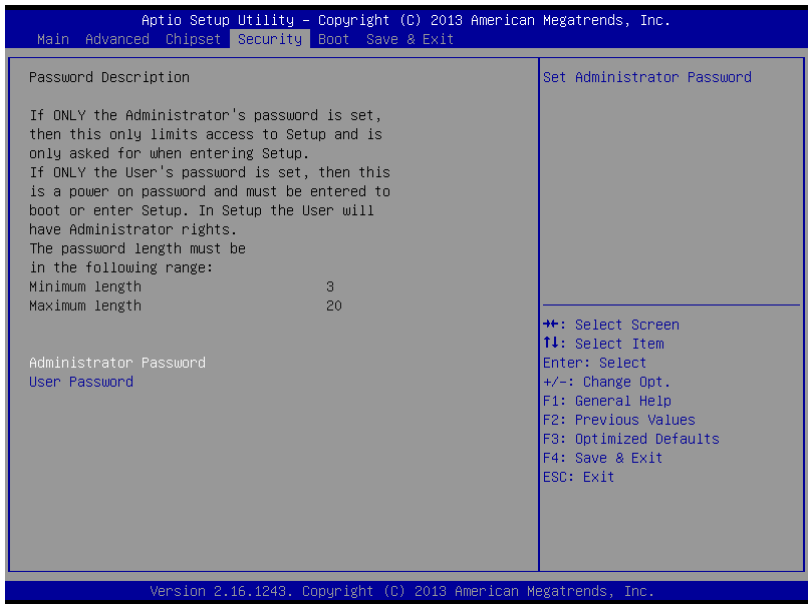

### 3.5.2 Chipset: South Bridge

Options summary:

Audio Controller	Enabled	Optimal Default, Failsafe Default
	Disabled	
Control Detection of the Azalia device. Disabled = Azalia will be unconditionally disabled. Enabled = Azalia will be unconditionally Enabled. Auto = Azalia will be enabled if present disabled otherwise.		
Mini-Card 1 Speed (CN15)	Auto	Optimal Default, Failsafe Default
	Gen 2	
	Gen 1	
Configure PCIe Port Speed		
Mini-Card 2 Speed (CN17)	Auto	Optimal Default, Failsafe Default
	Gen 2	
	Gen 1	
Configure PCIe Port Speed		

### 3.6 Setup submenu: Security

#### Change User/Administrator Password

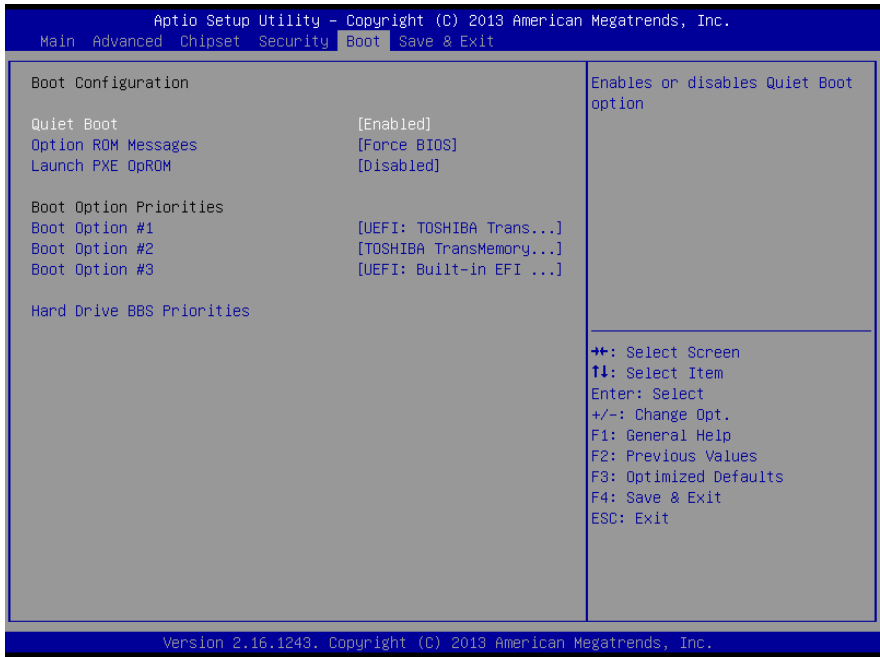

You can set a User Password once an Administrator Password. The password will be required during boot up, or when the user enters the Setup utility. Please Note that a User Password does not provide access to many of the features in the Setup utility.

Select the password you wish to set, press Enter to open a dialog box to enter your password (you can enter no more than six letters or numbers). Press Enter to confirm your entry, after which you will be prompted to retype your password for a final confirmation. Press Enter again after you have retyped it correctly.

#### Removing the Password

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

### 3.7 Setup submenu: Boot

Options summary:

Quiet Boot	Disabled	Default
	Enabled	
En/Disable showing boot logo.		
Option ROM Messages	Force BIOS	Default
	Keep Current	
Set display mode for Option ROM		
Launch PXE OpROM	Disabled	Default
	Enabled	
Controls the execution of LAN PXE OpROM		

### 3.7.1 Boot: BBS Priorities

Options summary:

Quiet Boot	Disabled	Default
	Enabled	
En/Disable showing boot logo.		
Option ROM Messages	Force BIOS	Default
	Keep Current	
Set display mode for Option ROM		
Launch PXE OpROM	Disabled	Default
	Enabled	
Controls the execution of LAN PXE OpROM		

### 3.8 Setup submenu: Save & Exit

# Chapter 4

---

Drivers Installation

## 4.1 Product CD/DVD

---

The BOXER-6313 comes with a product DVD that contains all the drivers and utilities you need to setup your product. Insert the DVD and follow the steps in the autorun program to install the drivers.

In case the program does not start, follow the sequence below to install the drivers.

### Step 1 – Install Chipset Driver

1. Open the **Step 1 - Chipset** folder followed by **SetupChipset.exe**
2. Follow the instructions
3. Drivers will be installed automatically

### Step 2 – Install Graphics Driver

1. Open the **Step 2 - Graphics** folder and select your OS
2. Open the **Setup.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

### Step 3 –Install LAN Driver

1. Open the **Step 3 - LAN** folder and select your OS
2. Open the **.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

### Step 4 –Install Audio Driver

1. Open the **Step 4 - AUDIO** folder followed by the **.exe** file

2. Follow the instructions
3. Drivers will be installed automatically

#### Step 5 –Install CAN Bus Driver

1. Open **Device Manager**
2. Right click on the device with the **exclamation mark** and select **Properties**
3. Go to the **Driver tab** and select **Update Drivers**
4. Select manual install and browse to the driver's directory
5. Confirm and drivers will be installed automatically

#### Step 6 – Install USB 3.0 Driver (Windows 7 only)

1. Open the **Step 6 – USB3.0** folder followed by **Setup.exe**
2. Follow the instructions
3. Drivers will be installed automatically

#### Step 7 – Install MBI Driver (Windows 8.1 only, optional)

1. Open the **Step 7 – MBI (Optional)** folder followed by **Setup.exe**
2. Follow the instructions
3. Drivers will be installed automatically

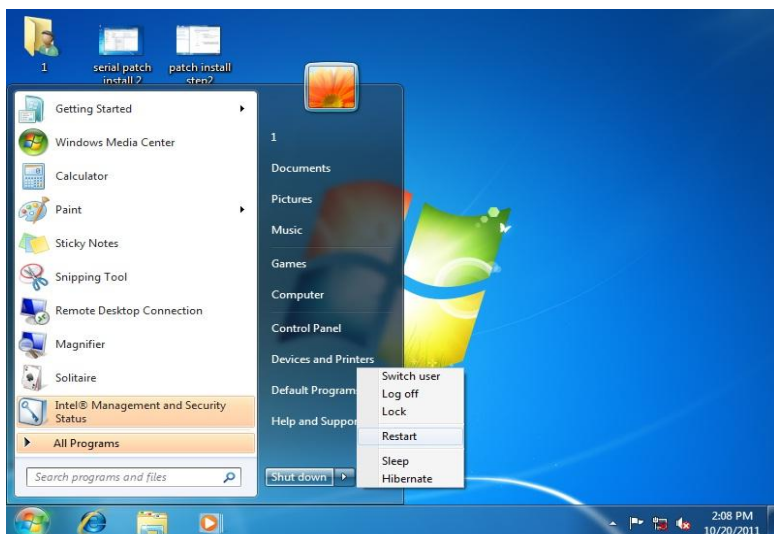

## Step 8 – Install Serial Port Driver (Optional)

For Windows 7:

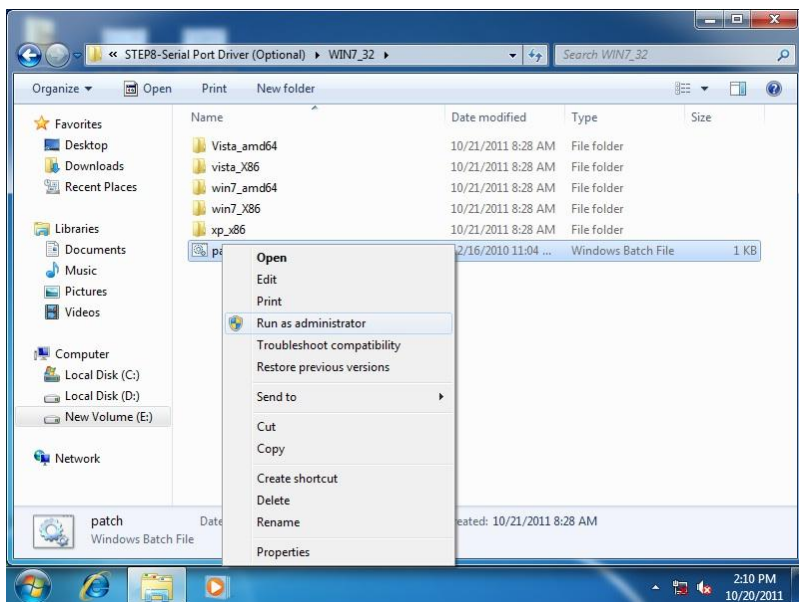

1. Change User Account Control settings to **Never notify**

2. Reboot and log in as administrator

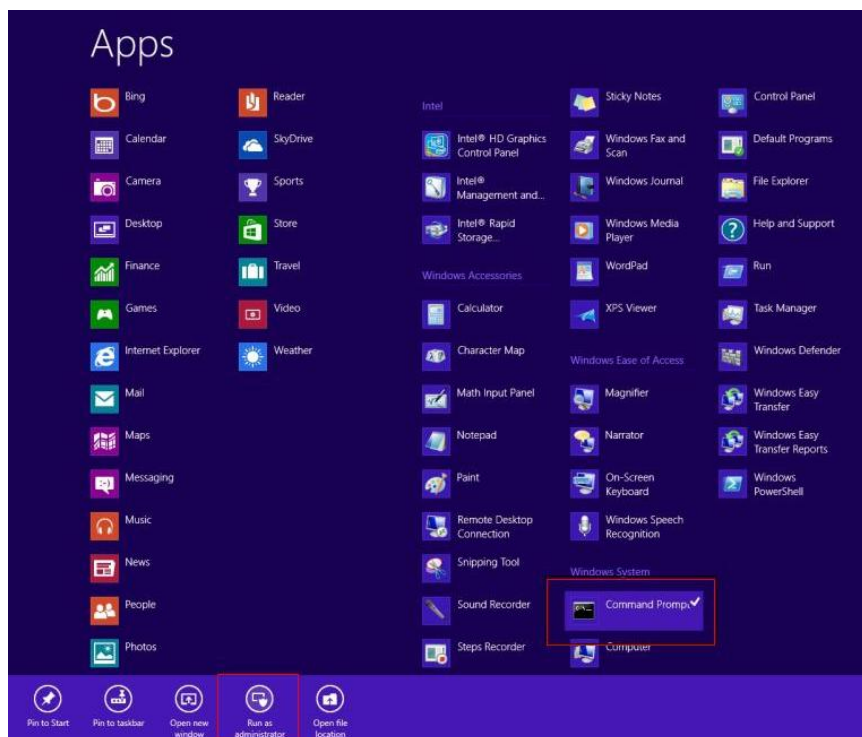

### 3. Run patch.bat as administrator

## For Windows 8:

1. Open the Apps Screen, right click on the **Command Prompt** tile and select **Run as Administrator**

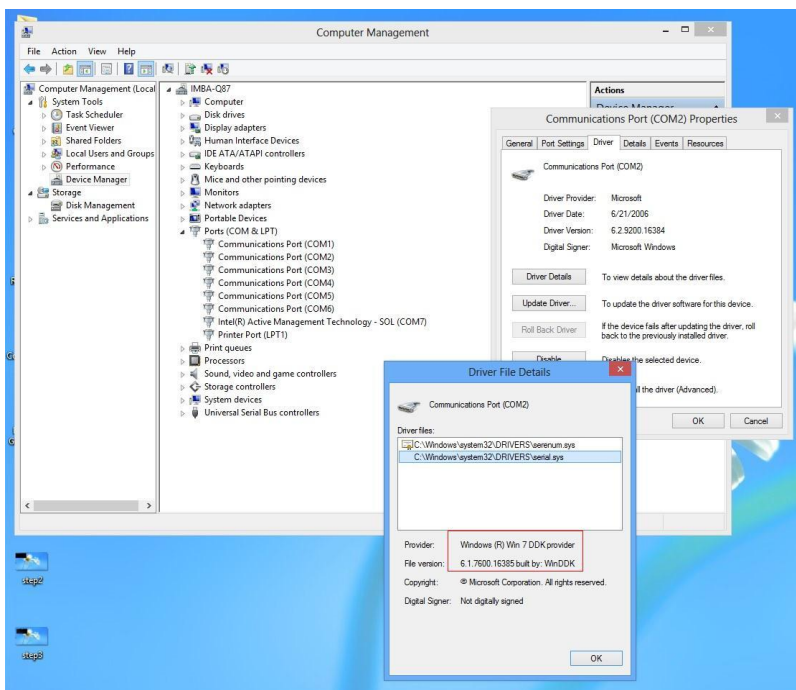

2. To install the driver (patch.bat), you will first have to locate the file in command prompt. To do that, go to the folder in which the file resides by entering **cd (file path)** eg: if the file is in a folder named abc in c drive, enter **cd c:\abc** (screenshot for reference only)
3. You are now at the folder where the file is located. Enter the **patch.bat** to open and install the drivers.

4. Reboot after installation completes.
5. To confirm the installation, go to Device Manager, expand the Ports (COM & LPT) tree and double click on any of the COM ports to open its properties. Go to the Driver tab, select Driver Details and click on **serial.sys**, you should see its provider as **Windows (R) Win 7 DDK Provider**.

### Step 9 – Install Touch Driver (optional)

1. Open the **Step 9 – PenMount Touch 6000 (Optional)** folder followed by **Setup.exe**
2. Follow the instructions
3. Drivers will be installed automatically

### Step 10 – Install GPS Driver (optional)

1. Open the **Step 10 – GPS (Optional)** folder and open both **.exe** files
2. Follow the instructions
3. Drivers will be installed automatically

# Appendix A

## Watchdog Timer Programming

## A.1 Watchdog Timer Initial Program

**Table 1 : SuperIO relative register table**

	Default Value	Note
Index	0x2E(Note1)	SIO MB PnP Mode Index Register 0x2E or 0x4E
Data	0x2F(Note2)	SIO MB PnP Mode Data Register 0x2F or 0x4F

**Table 2 : Watchdog relative register table**

	LDN	Register	BitNum	Value	Note
Timer Counter	0x07(Note3)	0xF6(Note4)		(Note24)	Time of watchdog timer (0~255) This register is byte access
Counting Unit	0x07(Note5)	0xF5(Note6)	3(Note7)	0(Note8)	Select time unit. 0: second 1: minute
Watchdog Enable	0x07(Note9)	0xF5(Note10)	5(Note11)	1(Note12)	0: Disable 1: Enable
Timeout Status	0x07(Note13)	0xF5(Note14)	6(Note15)	1	1: Clear timeout status
Output Mode	0x07(Note16)	0xF5(Note17)	4(Note18)	1(Note19)	Select WDTRST# output mode 0: level 1: pulse
WDTRST output	0x07(Note20)	0xFA(Note21)	0(Note22)	1(Note23)	Enable/Disable time out output via WDTRST# 0: Disable 1: Enable

```

Digital I/O Ports

## B.1 Electrical Specifications for Digital I/O Ports

GPIO50	DIO_0
GPIO51	DIO_1
GPIO52	DIO_2
GPIO53	DIO_3
GPIO54	DIO_4
GPIO55	DIO_5
GPIO56	DIO_6
GPIO57	DIO_7

## B.2 DIO Programming

---

The BOXER-6163 utilizes FINTEK F81866 chipset as its Digital I/O controller. Below are the procedures to complete its configuration. AAEON initial DI/O program is also attached for developing customized program for your application.

There are three steps to complete the configuration setup:

- (1) Enter the MB PnP Mode
- (2) Modify the data of configuration registers
- (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

## B.3 Digital I/O Register

Table 1 : SuperIO relative register table		
	Default Value	Note
Index	0x2E(Note1)	SIO MB PnP Mode Index Register 0x2E or 0x4E
Data	0x2F(Note2)	SIO MB PnP Mode Data Register 0x2F or 0x4F

Table 2 : Digital Input relative register table					
	LDN	Register	BitNum	Value	Note
DIO-1 Pin Status	0x06(Note3)	0xA2(Note4)	0(Note5)		GPIO50
DIO-2 Pin Status	0x06(Note6)	0xA2(Note7)	1(Note8)		GPIO51
DIO-3 Pin Status	0x06(Note9)	0xA2(Note10)	2(Note11)		GPIO52
DIO-4 Pin Status	0x06(Note12)	0xA2(Note13)	3(Note14)		GPIO53
DIO-5 Pin Status	0x06(Note15)	0xA2(Note16)	4(Note17)		GPIO54
DIO-6 Pin Status	0x06(Note18)	0xA2(Note19)	5(Note20)		GPIO55
DIO-7 Pin Status	0x06(Note21)	0xA2(Note22)	6(Note23)		GPIO56
DIO-8 Pin Status	0x06(Note24)	0xA2(Note25)	7(Note26)		GPIO57

Table 3 : Digital Output relative register table					
	LDN	Register	BitNum	Value	Note
DIO-1 Output Data	0x06(Note27)	0xA1(Note28)	0(Note29)	(Note30)	GPIO50
DIO-2 Output Data	0x06(Note31)	0xA1(Note32)	1(Note33)	(Note34)	GPIO51
DIO-3 Output Data	0x06(Note35)	0xA1(Note36)	2(Note37)	(Note38)	GPIO52
DIO-4 Output Data	0x06(Note39)	0xA1(Note40)	3(Note41)	(Note42)	GPIO53
DIO-5 Output Data	0x06(Note43)	0xA1(Note44)	4(Note45)	(Note46)	GPIO54
DIO-6 Output Data	0x06(Note47)	0xA1(Note48)	5(Note49)	(Note50)	GPIO55
DIO-7 Output Data	0x06(Note51)	0xA1(Note52)	6(Note53)	(Note54)	GPIO56
DIO-8 Output Data	0x06(Note55)	0xA1(Note56)	7(Note57)	(Note58)	GPIO57
