

# MiniCore™ RCM5700 Module

Ultra-Compact Serial to Ethernet Module

The MiniCore RCM5700 offers a low-cost, ultra-compact, pin-compatible Ethernet control and communications solution for your embedded design.

## Overview

The MiniCore RCM5700 family offers a solid cost-competitive solution in a small package. Base versions of the RCM5700 offer a cost-effective starting point for your embedded development, while the more feature rich RCM5750 and RCM5760 models allow you to use more memory and update firmware from anywhere in the world.

With six serial ports, four configurable as SPI, the RCM5700 can easily embed into any existing or new design and is pin-compatible with current and future MiniCore products, such as MiniCores offering Wi-Fi 802.11b/g. The embedded web server offers an added level of control and monitoring for today's intensive applications.

To evaluate and learn more about the MiniCore RCM5700, please visit [www.rabbit.com/products/rcm5700/](http://www.rabbit.com/products/rcm5700/).

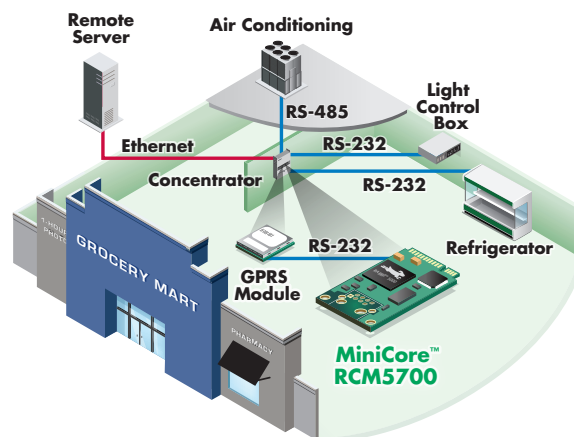

### Standard Development Kit

This affordable development kit includes everything you need to get started.

**\$99**

### Application Highlight

**Ideal Applications :** Remote energy management, Security and surveillance, Building automation, Gaming (player tracking), Test and measurement equipment

### Features and Benefits

- 10/100Base-T Ethernet
- Up to 640 KB SRAM for data, 1 MB flash memory for program storage, 2 MB serial flash for mass storage
- Up to 32 GPIO lines and 6 serial ports
- Serial to Ethernet bridge
- Embedded web server, Remote Firmware Update, open source code and royalty free
- Cost-competitive embedded solution
- Quick time to market

## Software

The Dynamic C® integrated development environment reduces the time and effort to write real-time software for embedded systems that use a Rabbit® microprocessor, enabling easy development of a wide range of applications.

Rabbit integrates editing, compiling, linking, loading and debugging into a single development environment as one function. There are no compatibility issues when moving from one stage to another. Once the design is complete, you can debug it on the target hardware and see how your code works. Because it is a dialect of C, the Dynamic C language has all the statements and constructions of traditional C, plus extensions that make it easier to write reliable, real-time multi-tasking software. The Dynamic C integrated development environment allows for easy hardware migration, moving from a single-board computer to chip level production.

Dynamic C also includes highly useful software components that can add functionality and value to your applications. This functionality includes web server capability, filing system, remote firmware updates, and wired and wireless security. Compatible software components are listed below.

### Software Components

Component		Description
 <b>RabbitWeb</b>	<b>RabbitWeb</b>	System of HTML tags used to easily create web interfaces to monitor and control embedded applications
 <b>RPU</b>	<b>Rabbit Program Update (RPU)</b>	Allows for remote firmware updates from anywhere in the world using an Internet connection
 <b>FAT</b>	<b>File Allocation Table (FAT)</b>	Popular network-accessible file system for flashed based memories
 <b>SSL</b>	<b>Secure Sockets Layer (SSL) / Transport Layer Security (TLS)</b>	The industry standard for web security in embedded applications
 <b>AES</b>	<b>Advanced Encryption Standard (AES)</b>	128-bit encryption for transferring sensitive data

## MiniCore™ RCM5700 Development Kits

### Standard Development Kit

### Deluxe Development Kit

The Standard and Deluxe Development Kits provide the essential tools needed to design your own microprocessor-based system.

#### The Standard Kit includes:

- RCM5700 module
- Interface board with standoffs/connectors
- Prototyping board with standoffs/connectors
- USB cable to program RCM5700 via interface board
- Dynamic C CD-ROM, including product documentation on disk
- Getting Started instructions
- Registration card

#### The Deluxe Development Kit includes everything in the Standard Development Kit, plus the following items:

- Universal AC adapter, 5 V DC, 2 A (includes Canada/Japan/ U.S., Australia/N.Z., U.K., and European style plugs)  
Development Kits sold in North America may contain an AC adapter with only a North American style plug
- Digital I/O and serial communication accessory boards for use with certain sample programs
- CAT 5/6 Ethernet cable and DB-9 to 10-pin header serial cable
- Rabbit 5000 Processor Easy Reference poster

# MiniCore™ RCM5700 Specifications

Features	RCM5700	RCM5710	RCM5750	RCM5760
Microprocessor	Rabbit® 5000 at 50 MHz			
Connectivity	10/100Base-T (Ethernet Signals Only)	10/100Base-T w/RJ-45 connector	10/100Base-T (Ethernet Signals Only)	10/100Base-T w/RJ-45 connector
Flash Memory (code)	1 MB parallel flash			
Program Execution SRAM	128K internal to Rabbit 5000		128K internal to Rabbit 5000; 512K external Fast SRAM	
Battery-Backable SRAM	None			
Mass Storage Option	None		2 MB serial flash	
Backup Battery	Connection for user-supplied backup battery (to be used for RTC)			
General Purpose I/O	Up to 32 parallel digital I/O			
Serial Ports	6 high-speed, CMOS-compatible ports: • All 6 configurable as asynchronous (with IrDA), 4 as clocked serial (SPI), and 2 as SDLC/HDLC • 1 asynchronous clocked serial port shared with programming port			
Serial Rate	Max. async = CLK/8, Max. sync = CLK/2			
Slave Interface	Slave port allows the RCM5700 to be used as an intelligent peripheral device slaved to a master processor			
Real-Time Clock	Yes			
Timers	Ten 8-bit timers (6 cascadable from the first), one 10-bit timer with 2 match registers, and one 16-bit timer with 4 outputs and 8 set/reset registers			
Watchdog/Supervisor	Yes			
Pulse-Width Modulators	4 channels synchronized PWM with 10-bit counter 4 channels variable-phase or synchronized PWM with 16-bit counter			
Power	3.15 - 3.45 V DC 70 mA @ 3.3 V (typical — without Ethernet) 200 mA @ 3.3 V (typical — with Ethernet)			
Operating Temperature	-40° C to +85° C			
Humidity	5% to 95% non-condensing			
Connectors	Edge connectors for 52-pin Mini PCI Express socket	Edge connectors for 52-pin Mini PCI Express socket RJ45 (Ethernet)	Edge connectors for 52-pin Mini PCI Express socket	Edge connectors for 52-pin Mini PCI Express socket , RJ45 (Ethernet)
Board Size	1.20"× 2.00"× 0.12" (30 mm × 51 mm × 3mm)			
Pricing				
(Qty. 1/100) Part Number	\$35/\$29.50 20-101-1235	\$45/\$39.50 20-101-1300	\$45/\$39.50 20-101-1306	\$55/\$49.50 20-101-1307
Standard Development Kit Part Number	\$99 101-1274			
Deluxe Development Kit Part Number	\$199 101-1275
