

Data sheet Product KGR 2 100

Profile heatsinks and fluid coolers > Standard extruded heatsinks

Heatsinks KGR

- effective heatsink solutions machined out of solid aluminium material
- precise milled flat surfaces with very low surface roughness
- for free and forced convection
- very small thermal resistance
- designs made of copper material, different sizes, dimensions and special designs upon request

Features

thermal resistance:	1.35 - 0.8 K/W
height:	30 mm
width:	150 mm
length:	100 mm
plate thickness:	8 mm
material:	aluminium EN AW 6082
