Nozzle Set

Desoldering Nozzle Set DX110 - DX115 for DSX 80 und DXV 80

The DSX series tools feature a novel threadless desoldering nozzle fixture system whereby the nozzle is inserted into the head and locked into place by applying a 1/4 turn. This patented feature allows the desoldering nozzles to be quickly and easily exchanged and also improves the rate of thermal transfer from the desoldering head to the desoldering nozzle providing the tools with a faster heat up time and recovery rate. Additionally, because there are no threads in the head to foul, maintenance and costs are reduced.

TOP ATTRIBUTES

Plating Longlife Iron, leadfree optimized

Packaging information

Shelf pack size (Units per shelf pack)	Single
---	--------

Technical Data

Hardening type	None
-----------------------	------

Corresponding Soldering tool family	DX
