

### DESCRIPTION

These reed proximity switches operate when in the presence of magnetically conductive material. Instead of an actuating magnet, only a simple piece of iron is required to operate the sensor from the front or from above. The standard cable is UL listed and is round twin core 2 x 0.35 mm<sup>2</sup> (AWG22).

### APPLICATIONS

- Industrial applications
- End travel sensing limit switch in pneumatic cylinders
- Position control
- Control functions in plant and utility vehicles
- Security applications
- Door and window control
- Opening recognition contact
- Fire protection doors

### FEATURES

- Form A and B are available
- Other cables, connectors and colors available
- Activation from the front or from above
- Sabotage loop available

### DIMENSIONS

All dimensions in mm [inch]

Series  
MK02/0, MK02/1,  
MK02/2, MK02/3

Series  
MK02/5

### TERMINATION

<b>W</b>		<p>The cable cut length includes: 5 mm of wire stripped and tinned.</p>

For wire and termination details please consult factory.

## Ferromagnetic Metal Detection Sensors

### OPERATION EXAMPLE

For best operation it is recommended that you **DO NOT** mount these sensors on any ferromagnetic material **OR** use any ferromagnetic screws.

\* Dimension (mm): 3 x 12 x 32

The standard cable is a 4-wire round - core 4 x 0.14 mm<sup>2</sup> (cable sheath and wires are white) forming a sabotage loop. See example of this loop to the right.

(Sabotage loop for MK02/2, MK02/3.)
