

Tutorial Panels Uno Volta

UV-129

DC electric motor with permanent magnets

The Uno Volta tutorial panel is used to get you acquainted with several practical applications in the field of electrical engineering. The important part consists of electro-motors and their connection. The most common ones are DC motors, single-phase motors and three-phase motors. Therefore, the following electric motors are also a logical part of the offer.

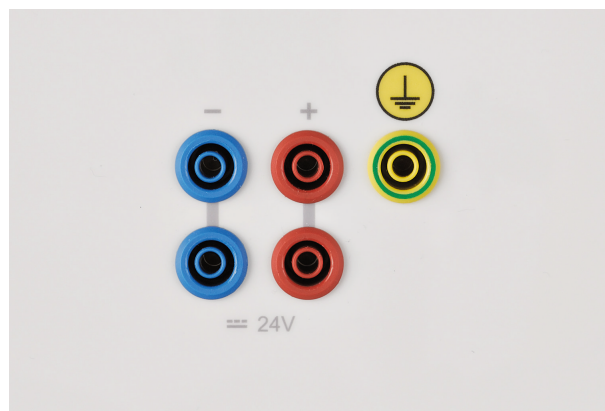

Motor Parameters:

Voltage: 24 V SS

Speed: 5800 rpm

DC electric motor with permanent magnets

Exaples of connections:

- Circuits with DC motors
- DC motor speed control circuits

Accessories:

- Power cord
- Operating Instructions

Optional accessories

- Security patch cords
- Protective bag
- Task book
