Second Generation GATEWAY

With Finder YESLY GATEWAY you can control your YESLY and the Smart BLISS2 Thermostat system remotely, wherever you are in the world. It is always possible, any time and anywhere, to check their status and make changes if necessary.

Moreover, through GATEWAY and cloud connectivity it is even possible to manage your system through voice commands using the GOOGLE Assistant or AMAZON ALEXA.

GATEWAY connects via the 2.4GHz Wi-Fi network of your home computer and communicates with YESLY and BLISS2 devices via Bluetooth or 868MHz RF transmissions.

In a situation where the Internet connection is lost the YESLY and BLISS2 devices installed in the system will continue to work as they are connected via Bluetooth or 868MHz RF transmissions to the GATEWAY.
