

JBC ADS

for T210 & T245

ADS Stand works exclusively with T210 & T245 Handles and DI, DDE and DME Control Units.

JBC Intelligen Heat Management automatically detects the tool in the stand and reduces the tip temperature below the solder melting point. Hibernation cuts off power supply preventing oxidation. As a result, tip life lasts up to 5 times longer.

The stand includes **Tip Cleaner** with Brass Wool, as well as, splashguard and antispash membrane to keep the work area clean and free of solder particles. **Quick Cartridge Exchanger** enables a safe, easy and quick cartridge exchange which, combined with **Cartridge Holder**, allows you to store up to four cartridges.

Tool Holder position is easily adjustable to suit your needs and **Cable Collector** is designed for perfect movement adaptation and to keep cables away from the working area.

**Don't believe us...
TRY IT!**
