

Wiha Selector.

Change bits with a single hand.

Quick removal, firm stance:

The bit can easily be chosen with the Selector using the practical red slider and can be directly inserted in the machine via the innovative reverse slide-out – all with a single hand! The machine doesn't have to be set down, and the bit box doesn't have to be opened anymore. Therefore, the Wiha Selector is the ideal solution for work where you only have a single free hand and space is tight.

Furthermore, the Selector is prepared for every application situation: you can choose from a total of 8 configuration variations in two different qualities (standard and TiN bits) as well as an empty box that can be filled as desired. As the "little brother" of the proven Wiha XSelector and XLSelector, it is also characterised by a compact format and attractive design – and of course at a low price.

Wiha Selector.

- Fast, direct bit removal with a single hand
- Simple bit selection and removal via the red slider
- Equipped with space for 10 bits, optional with bit holder
- Practical pocket size (60 x 59 x 12 mm)
- Huge selection: available in 8 configuration varieties (from the entry-level set to the special set) or without bits
- Ideal for working on ladders or scaffolding

Standard bits.

79271-0201 Selector Standard, mixed, 10 pcs.

Housing: Box made of high-quality, durable plastic in a practical pocket size.
 Bits: 25 mm Standard bits.
 Application: Ideal for working on ladders or scaffolding.
 Extra: Simple bit selection and removal via the red slider.
