Warning !

1. Battery
Batteries on board are consumables.
The life time of them are not guaranteed.
2. Fless solution with HDD
The specification & limitation of HDD should be considered carefully when the fanless solution is implemented.
3. We will not give further notification in case of changes of product information and manual.
4. SATA interface does not support Hot SWAP function.
5. There might be a 20% inaccuracy of WDT at room temperature.
6. Please make sure the voltage specification meets the requirement of equipment before plugging in.
7. There are two types of SSD, commercial grade and industrial grade, which provide different read/write speed performance, operation temperature and life cycle. Please contact sales for further information before making orders.
8. Caution! Please notice that the heat dissipation problem could cause the MB system unstable. Please deal with heat dissipation properly when buying single MB set.
9. Please avoid approaching the heat sink area to prevent users from being scalded with fanless products.
10. If users repair, modify or destroy any component of product unauthorizedly, We will not take responsibility or provide warranty anymore.
11. DO NOT apply any other material which may reduce cooling performance onto the thermal pad.
12. It is important to install a system fan toward the CPU to decrease the possibility of overheating / system hanging up issues, or customer is suggested to have a fine cooling system to dissipate heat from CPU.

* Hardware Notice Guide

1. Before linking power supply with the motherboard, please attach DC-in adapter to the motherboard first. Then plug the adapter power to AC outlet.
Always shut down the computer normally before you move the system unit or remove the power supply from the motherboard. Please unplug the DC-in adapter first and then unplug the adapter from the AC outlet.
Please refer photo 1 as standard procedures.
2. In case of using DIRECT DC-in (without adapter), please check the allowed range for voltage & current of cables. And make sure you have the safety protection for outer issues such as short/broken circuit, overvoltage, surge, lightning strike.
3. In case of using DC-out to an external device, please make sure its voltage and current comply with the motherboard specification.
4. The total power consumption is determined by various conditions (CPU/motherboard type, device, application, etc.). Be cautious to the power cable you use for the system, one with UL standard will be highly recommended.
5. It's highly possible to burn out the CPU if you change/ modify any parts of the CPU cooler.
6. Please wear wrist strap and attach it to a metal part of the system unit before handling a component. You can also touch an object which is ground connected or attached with metal surface if you don't have wrist strap.
7. Please be careful to handle & don't touch the sharp-pointed components on the bottom of PCBA.
8. Remove or change any components from the motherboard will VOID the warranty of the motherboard.
9. Before you install/remove any components or even make any jumper setting on the motherboard, please make sure to disconnect the power supply first. (follow the aforementioned instruction guide)
10. "POWERON after PWR-Fair" function must be used carefully as below:
When the DC power adaptor runs out of power, unplug it from the DC current;
Once power returns, plug it back after 5 seconds.
If there is a power outage, unplug it from the AC current, once power returns, plug it back after 30 seconds. Otherwise it will cause system locked or made a severe damage.

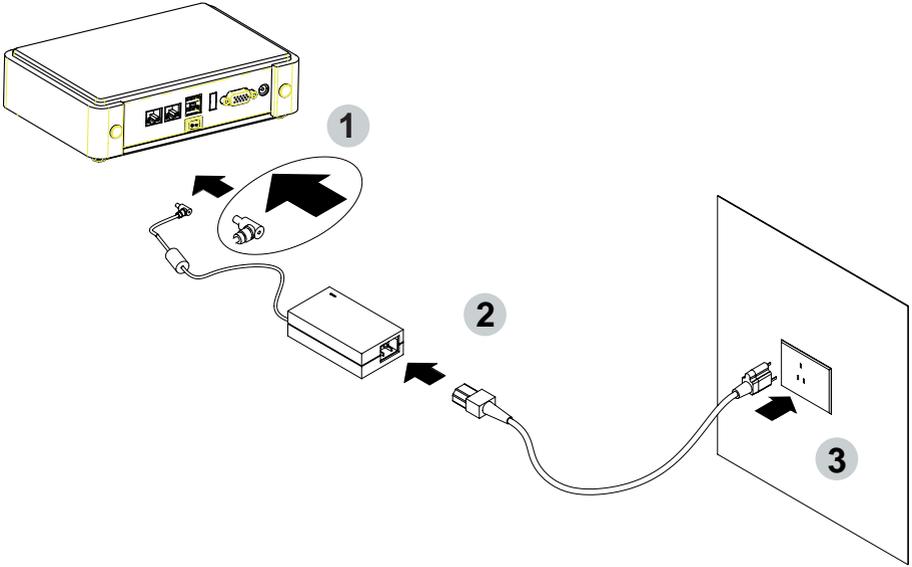

Remark 1:

Always insert/unplug the DC-in horizontally & directly to/from the motherboard. DO NOT twist, it is designed to fit snugly.

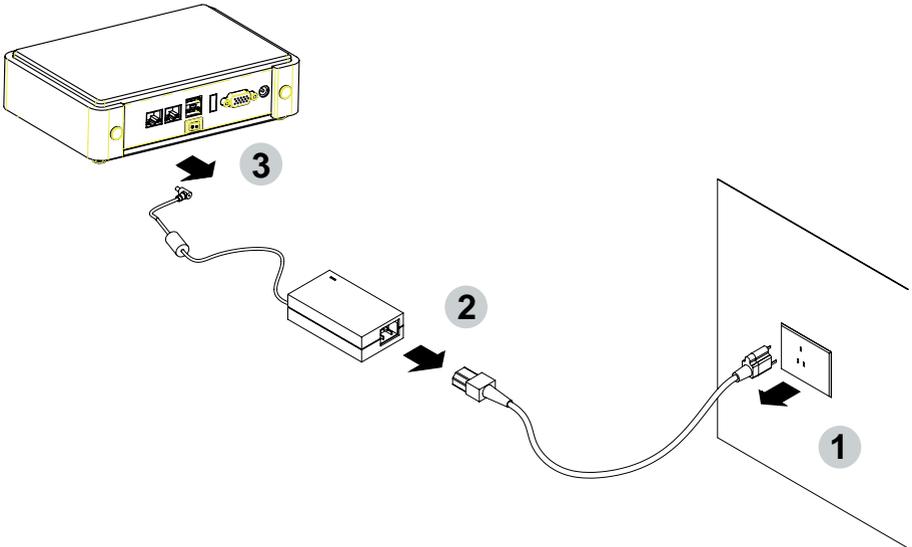

Moreover, erratic pull / push action might cause an unpredictable damage to the component & system unit.

General Information

The 2I385PW is a 2.5 inches form factor with LEX PICO Express® technology (160-pin expansion connectors) SBC Board. LEX PICO Express® is a board-to-board expansion capability provides cableless system and project-oriented IO options. 2I385PW's PICO Express® design & Evaluation carrier boards is also the ideal solution for embedded application developers to get up and running quickly on their customized carrier boards for different OEM/ODM projects.

The 2I385PW SBC board is with Intel BayTrail-I E3825 1.33GHz / E3845 1.91GHz CPU (Daul / Quad core processor), Intel BayTrail-I E3825/E3845 chipset and BayTrail-I Integrated Graphics chipset. This integrated platform offers superb performance and PC specification in the industry. Despite the limited space of 2I385PW, it supports 4 COM ports, 1 port USB 3.0 and 5 ports of Hi-Speed USB 2.0 to enhance the host controller interface which will ensure the high performance level and flexible expansion.

The 2I385PW supports two LAN ports of 10/100/1G Ethernet for various and seamless broadband connectivity. With Wake-On LAN function and the PXE function in BIOS, these are perfect control boards for networking devices. The built-in LAN is Intel I210IT LAN chipset for PCIe x 1 V2.1 interface, integrated 10/100/1000 transceiver.

The 2I385PW motherboard is built in with onboard DDR3L SDRAM 2GB/4GB, E3825 / E3845 Memory DDR3 data transfer rate of 1066MT/s / 1333MT/s. The expendable interfaces include one full size PCIe Mini card for mSATA, PCIe and USB interface, one full size PCIe Mini card for mSATA interface.

The supported display interfaces include VGA and LVDS touch screen. LVDS and touch function only for E3845 model. The board has a small footprint of only 102 x 73 mm (2.5 inch) and advanced performance in both computing and graphics.

2I385PW's PICO Express® design & Evaluation carrier boards is also the ideal solution for embedded application developers to get up and running quickly on their customized carrier boards for different OEM/ODM projects.

1-1 Major Feature

1. Intel Bay-Trail-I E3825 1.33GHz / E3845 1.91GHz SOC (Daul / Quad core)
2. Intel Bay-Trail-I Integrated Graphics chipset, E3825 533 MHz /
E3845 542 MHz render clock frequency
3. On board DDR3L SDRAM 2GB / 4GB Memory,
data transfer rate of 1066MT/s / 1333MT/s
4. Support 2 x 10/100/1000 Mbps Intel LAN ports
5. Support 4 x COM ports 1 x USB3.0 and 5 x USB 2.0
6. Support extended 2 x Mini PCIe card (2 x full size)
7. Support one SATA connector with independent DMA operation supported
8. Hardware digital Input & Output, 4 x DI / 4 x DO
Hardware Watch Dog Timer, 0~255 sec programmable
9. On board DC + 9V ~36V
10. PCB Dimension: 102 x 73 mm (2.5 inch)
11. Display interfaces include VGA & LVDS (24/48 bits), LVDS for E3845 model only.
12. COM interface Touch screen controller, support 4-, 5-, 8- wire Analog Resistive
touch screen. Resolution is up to 2048 x 2048, Touch function for E3845 model only.

1-2 Specification

1. SOC: Intel Bay-Trail-I E3825 1.33GHz / E3845 1.91GHz (Daul / Quad core)
2. Memory: DDR3L SDRAM 2GB / 4GB Memory, data transfer rate of 1066MT/s / 1333MT/s
3. Graphics: Intel Bay-Trail-I Integrated Graphics chipset, E3825 533 MHz / E3845 542 MHz render clock frequency
4. Expansion Function

PICO Express® 80-pin connector A	COM	3 x RS232 or RS422 or RS485
	USB	4 x USB 2.0, 1 x USB 3.0
	PS2	KB / MS
	Expansion	1 x PCIe
	LED	HDD or LAN or Power LED
	Switch	Power / Reset

PICO Express® 80-pin connector B	Power	Wide Range DC-IN +9~36V
	Display	1 x HDMI & 1 x VGA
	USB	2 x USB 2.0
	Audio	Line-out / Mic-in
	COM	1 x RS232 or RS422 or RS485
	LAN	2 x Intel 10 / 100 / 1000 Mbps

5. SATA: One SATA connector with independent DMA operation supported
6. Sound: ALC886 HD Audio Specification 1.0 Two channel sound chipset
7. Audio Amplifier: TPA2011D1 Class-D 2.5W/4Ω or 1.5W/8Ω chipset
8. WDT/DIO: Hardware digital Input & Output, 4 x DI / 4 x DO
Hardware Watch Dog Timer, 0~255 sec programmable
9. Expansion interface: one full size PCIe Mini card for mSATA, PCIe and USB interface, one Full size PCIe Mini card for mSATA interface
10. BIOS: Insyde UEFI BIOS
11. Dimension: 102 x 73 mm (2.5 inch)
12. Power: On board DC +9V ~ 36V
13. LVDS: 24/48 bits (E3845)
14. Touch function: C8051F321 COM interface Touch screen controller, support 4-, 5-, 8- wire Analog Resistive touch screen.
Resolution is up to 2048 x 2048 (E3845)

1-3 Directions for installing the Mini Card

1. Unscrew the screw on the board

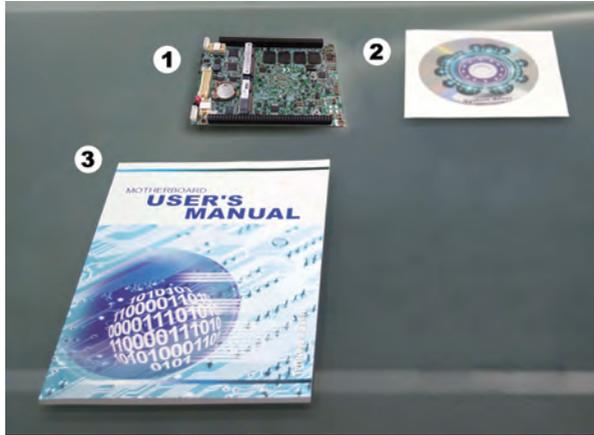

2. Plug in the Mini Card in a 45 angle

3. Gently push down the Mini Card and screw the screw back.

1-4 Packing List

	Material Code	Description	Detail Specification	Quantit
1	7G1901-1600001-0	MB-2I385PW-I44-001	LF,2I385PW-I44,Rev.:001	1
2	6G8006-2349-0100	LEX Product Driver DVD	LF, Intel Baytrail Driver,Windows 7/8.1 32/64	1
3	6G8001-2198-0400	Manual	LF,M/B,2I385PW	1

*The packing list above is for the users who purchase single motherboard. The users who purchase the board with chassis may refer to the packing list in the Assembly Guide.

Please contact with your dealer if any of these items is missing or damaged on delivery. And please keep all parts of the delivery package with packing materials in case if you need to deliver or store the product in the future.

Chapter-2

Hardware Installation

2-1 Unpacking Precaution

This chapter provides the information how to install the hardware of 2I385PW. Please follow section 1-4, 2-1 and 2-2 to check the delivery package and unpack carefully. Please follow the jumper setting procedure.

NOTE!

1. Do not touch the board or any other sensitive components without all necessary anti-static protection.
2. Please pay attention to the voltage limitation of DC-IN12 V 5 %.
Overuse of DC-IN voltage limitation or change to another power adapter (not provided with this system) will VOID warranty.

You should follow these steps to protect the board from the static electric discharge whenever you handle the board:

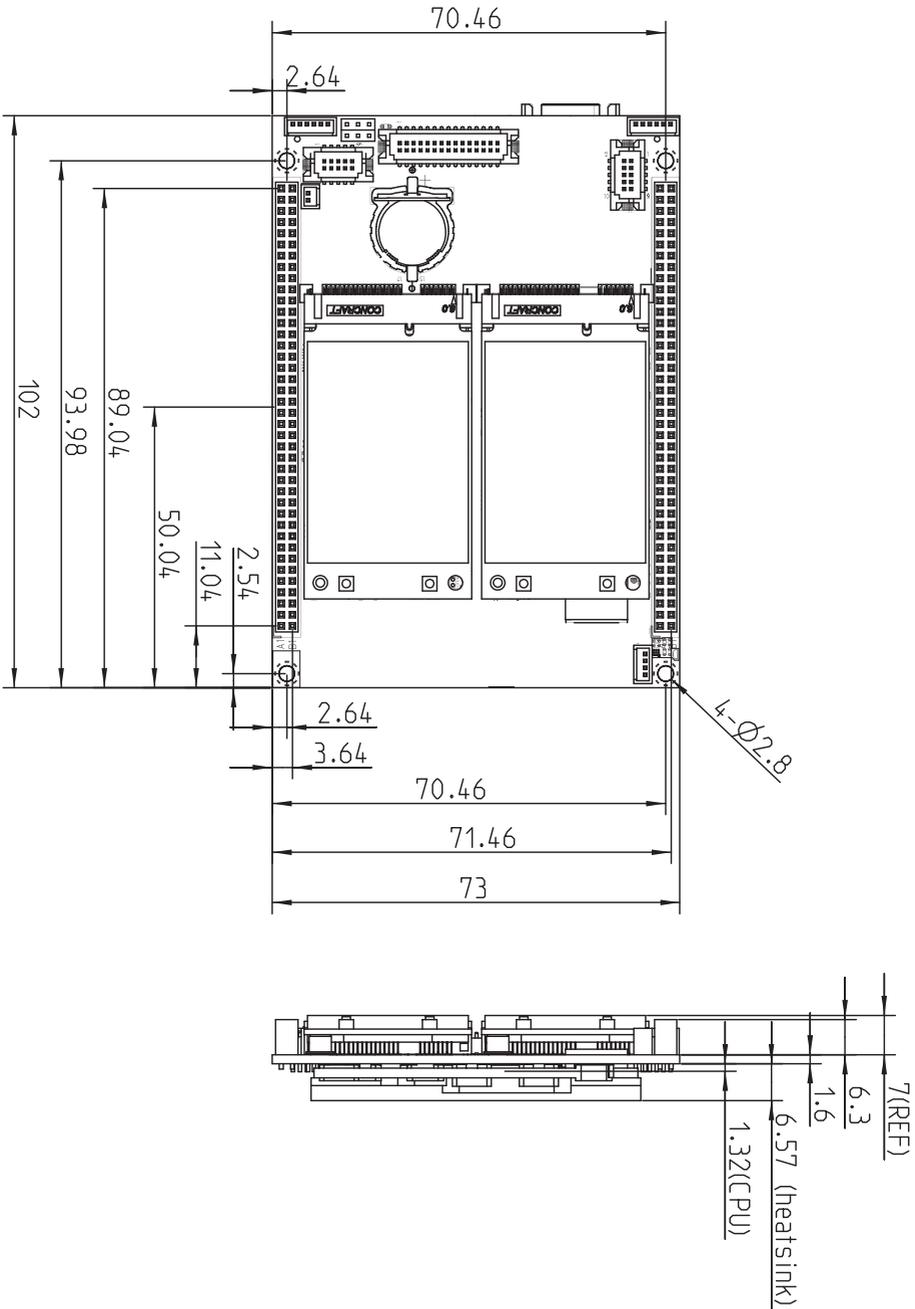

1. Ground yourself by a grounded wrist strap at all times when you handle the 2I385PW. Well secure the ALLIGATOR clip of the strap to the end of the shielded wire lead from a grounded object. Please put on and connect the strap before handling the 2I385PW for harmlessly discharge any static electricity through the strap.
2. Please use anti-static pad to put any components, parts, or tools on the pad whenever you work on them outside the computer. You may also use the anti-static bag instead of the pad. Please ask your local supplier for necessary parts on anti-static requirement.
3. Do not plug any connector or set any jumper when the power is on.

2-2 Unpacking checkup

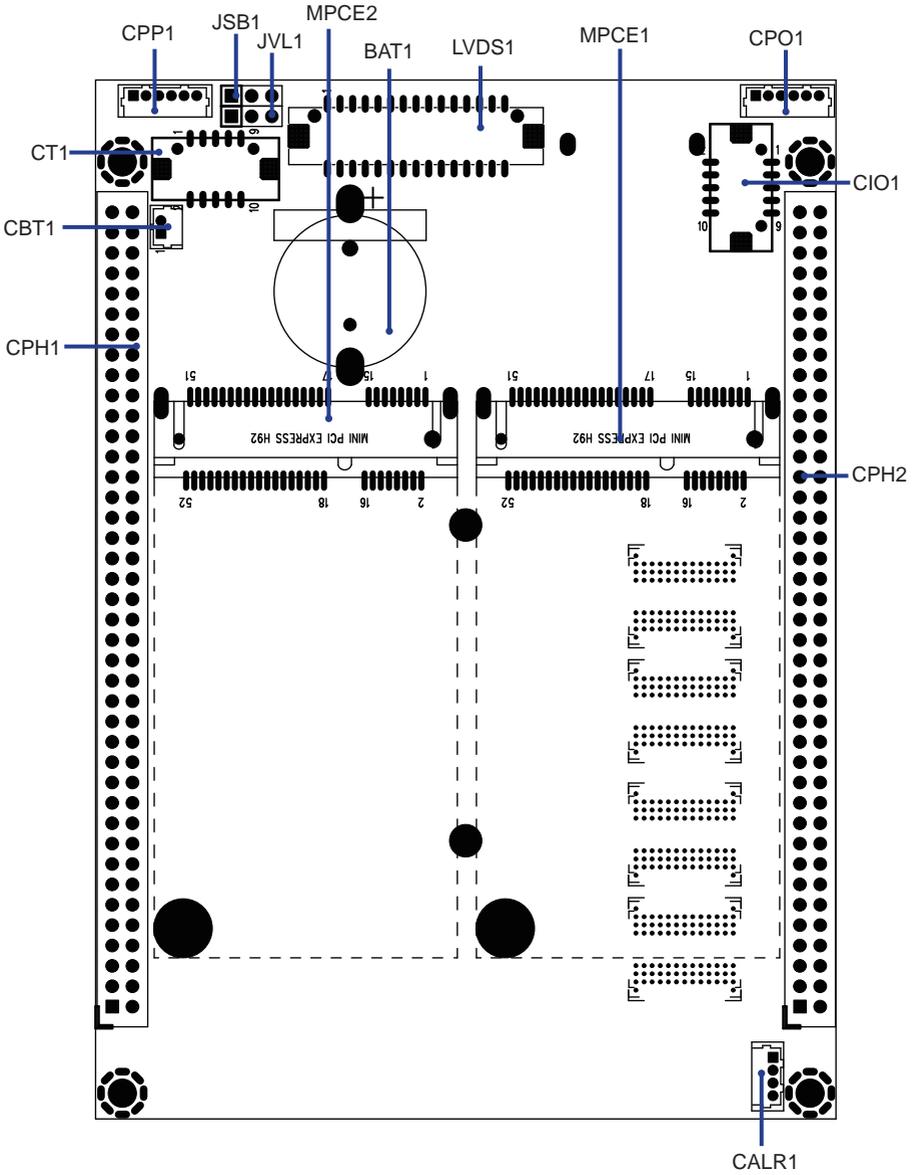

First of all, please follow all necessary steps of section 2-1 to protect 2I385PW from electricity discharge. With reference to section 1-4 please check the delivery package again with following steps:

1. Unpack the 2I385PW board and keep all packing material, manual and driver disc etc, do not dispose !
2. Is there any components lose or drops from the board?
DO NOT CONTINUE TO INSTALL THIS BOARD!
CONTACT THE DEALER YOU PURCHASED THIS BOARD FROM, IMMEDIATELY.
3. Is there any visible damage on the board?
DO NOT CONTINUE TO INSTALL THIS BOARD!CONTACT THE DEALER YOU PURCHASED THIS BOARD FROM, IMMEDIATELY.
4. Check your optional parts (i.e. DDR, CF etc.), all necessary jumpers setting to jumper pin-set, and CMOS setup correctly.
Please also refer to all information of jumper settings in this manual.
5. Check your external devices (i.e. Add-On-Card, Driver Type etc.) for complete add-in or connection and CMOS setup correctly.
Please also refer to all information of connector connection in this manual.
6. Please keep all necessary manual and driver disc in a good condition for future re-installation if you change your Operating System.

2-7 List of Jumpers

JSB1: CMOS DATA clear

JVL1: LVDS panel power select

2-8 Jumper Setting Description

A jumper is ON as a closed circuit with a plastic cap covering two pins. A jumper is OFF as an open circuit without the plastic cap. Some jumpers have three pins, labeled 1, 2, and 3. You could connect either pin 1 and 2 or 2 and 3.

The below figure 2.2 shows the examples of different jumper settings in this manual.

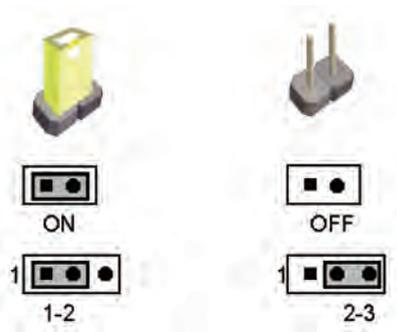

Figure 2.2

All jumpers already have its default setting with the plastic cap inserted as ON, or without the plastic cap as OFF. The default setting may be referred in this manual with a " * " symbol .

2-9 JSB1: CMOS Data Clear

A battery must be used to retain the motherboard configuration in CMOS RAM. Close Pin1 and pin 2 of JSB1 to store the CMOS data.

To clear the CMOS, follow the procedures below:

1. Turn off the system and unplug the AC power
2. Remove DC 12V power cable from DC 12V power connector
3. Locate JSB1 and close pin 1-2 for few seconds
4. Return to default setting by close pin 1-2
5. Connect DC 12V power cable back to DC 12V Power connector

Note: 1. DI pin default pull up 10K Ω to +5V
2. If use need isolate circuit to control external device
3. F75111N-1 I²C bus address 0x9c

• WDT For F75111N I²C watch dog timer device:

DC spec :

Input low Voltage (VIL):+0.8 Max ,

Input High Voltage(VIH) : +2V Min

Output low Current (IOL):10mA (Min) VOL=0.4V

Output High Current (IOH):-10mA (Min) VOH=2.4V

Watch Dog Time value 0~255 sec

The system will be issued reset. When WDT is enable the hardware start down counter to zero.

The reset timer have 10~20% tolerance upon the Temperature.

Chapter-4

Introduction of BIOS

The BIOS is a program located in the Flash Memory on the motherboard.

This program is a bridge between motherboard and operating system.

When you start the computer, the BIOS program gains control.

The BIOS first operates an auto-diagnostic test called POST (Power on Self Test) for all the necessary hardware, it detects the entire hardware devices and configures the parameters of the hardware synchronization. After these tasks are completed, BIOS will give control of the computer back to operating system (OS).

Since the BIOS is the only channel for hardware and software to communicate with, it is the key factor of system stability and of ensuring your system performance at best.

In the BIOS Setup main menu, you can see several options. We will explain these options in the following pages. First, let us see the function keys you may use here:

Press <Esc> to quit the BIOS Setup.

Press ↑↓←→(up, down, left, right) to choose the option you want to confirm or modify.

Press <F10> to save these parameters and to exit the BIOS Setup menu after you complete the setup of BIOS parameters.

Press Page Up/Page Down or +/- keys to modify the BIOS parameters for the active option.

4-1 Enter Setup

Power on the computer and press key immediately to enter Setup.

If the message disappears before your respond but you still wish to enter Setup, restart the system by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart the system by simultaneously pressing <Ctrl>, <Alt> and <Delete> keys.

This item is OS serial port with sharing mode issue.

If use Linux OS this item should be ISA mode

If use Windows OS this item should be PCI mode

Note: Windows don't set to ISA mode.

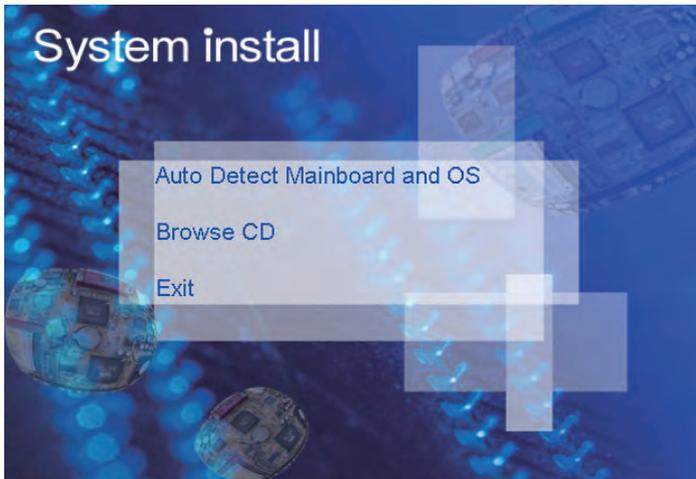

Chapter-5

DRIVER INSTALLATION

There is a system installation DVD in the package. This DVD does not only include all the drivers you need but also some other free application programs and utility programs. In addition, this DVD also includes an auto detect software telling you which hardware is installed and which driver is needed so that your system can function properly. We call this auto detect software SYSTEM INSTALL.

SYSTEM INSTALL Supports Windows 7(32bit/64bit) / Windows 8/8.1(32bit/64bit)

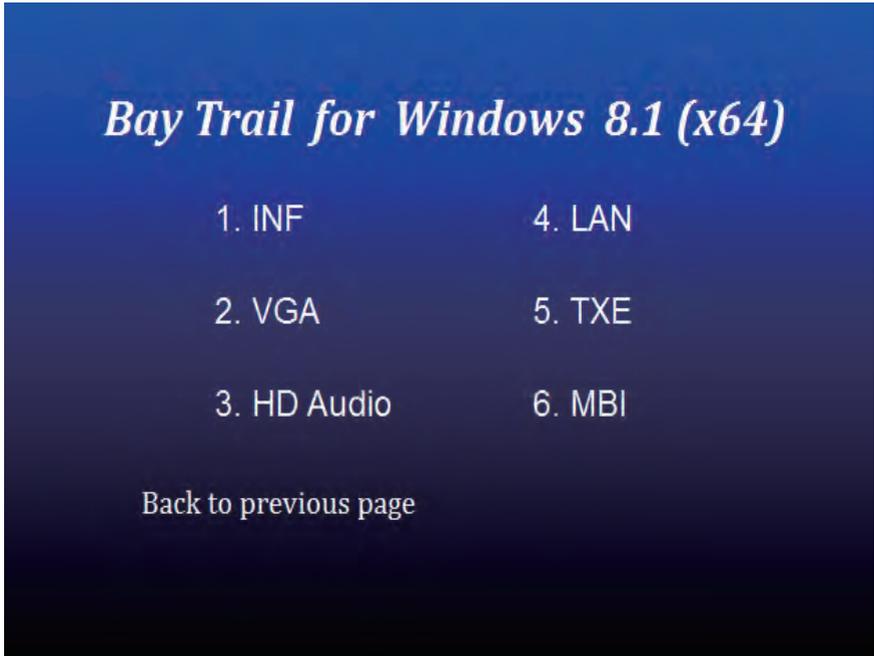

Insert the DVD into your DVD-ROM drive and the SYSTEM INSTALL menu should appear as below. If the menu does not appear, double-click MY COMPUTER and double-click DVD-ROM drive or click START, click RUN, and type X:\SETUP.EXE (assuming your DVD-ROM drive is X).

Make your selection from SYSTEM INSTALL menu:

1. Auto Detect Main board and OS to AUTOMATIC DRIVER INSTALLATION menu
2. Browse DVD to view the contents of the DVD
3. Exit to exit SYSTEM INSTALL menu

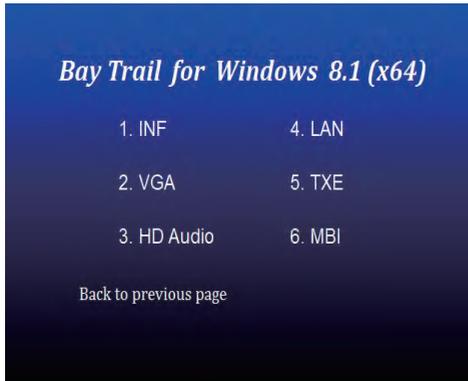

AUTOMATIC DRIVER INSTALLATION menu

- 1. INF Install Intel Baytrail chipset driver
- 2. VGA Install onboard VGA driver
- 3. Serial IO Install Serial IO driver (FOR Win 7 only)
- 4. xHCI Install Intel USB 3.0 xHCI driver (FOR Win 7 only)
- 5. HD Audio Install HD Audio Codec driver
- 6. MBI Install MBI driver (FOR Win 8/8.1 only)
- 7. LAN To the LAN driver Readme file
- 8. TXE Patch Install Intel TXE patch (FOR Win 7 only)
- 9. TXE Install Intel TXE driver

Each selection is illustrated below:

5-1 INF Install Intel Baytrail Chipset Driver (example for WIN8 64bit)

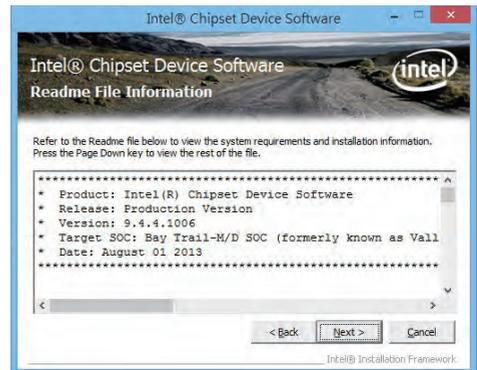

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "INF".

2. At the "Intel® Chipset Device Software" screen, click "Next".

3. At the "License Agreement" screen, click "Yes"

4. At the "Readme File Information" screen, Click "Next".

5. Click "Next"

6. Click "Finish" & restart computer.

NOTE: SYSTEM INSTALL will auto detect file path

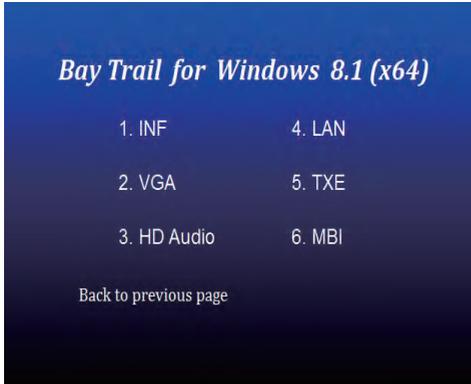

For Windows 7 64/32-bit,

X:\driver\INTEL\BAY\INF\WIN7\infinst_autol.exe

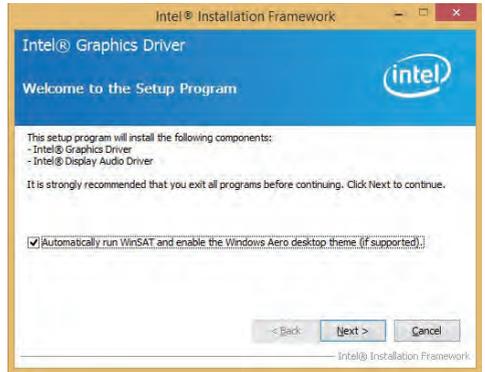

For Windows 8 / 8.1 32/64-bit

X:\driver\INTEL\BAY\INF\WIN_8_64\infinst_autol.exe

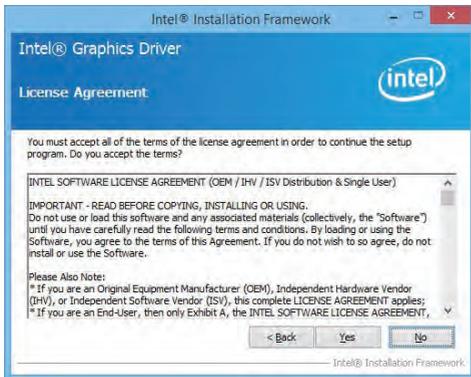

5-2 VGA Install Intel Baytrail VGA Driver (example for WIN8 64bit)

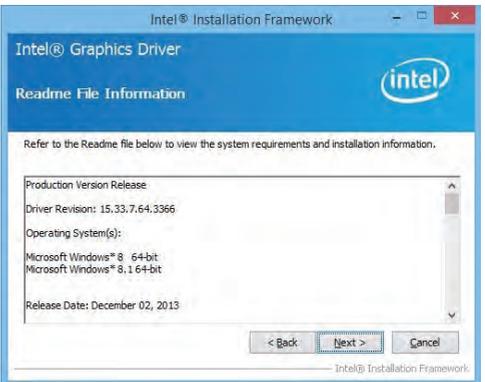

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "VGA".

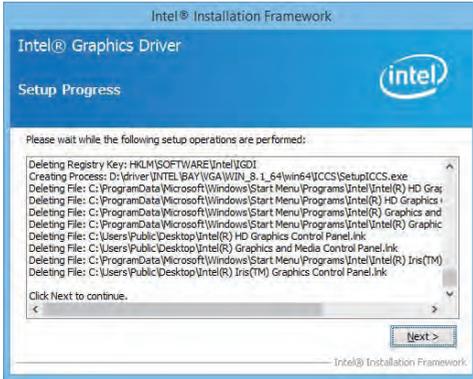

2. At the "Welcome to the Setup Program screen, Click "Next".

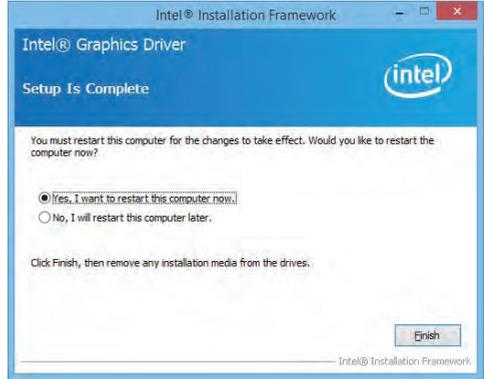

3. At the "License Agreement" screen, Click "Yes"

4. At the "Readme File Information" screen, Click "Next"

5. At the "Setup Progress" screen,
Click "Next".

6. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 7 32-bit,

X:\driver\INTEL\BAY\VGA\WIN_7_32\Setup.exe

For Windows 7 64-bit

X:\driver\INTEL\BAY\VGA\WIN_7_64\Setup.exe

For Windows 8 / Windows 8.1 32-bit

X:\driver\INTEL\BAY\VGA\WIN_8_32\Setup.exe

For Windows 8 / Windows 8.1 64-bit

X:\driver\INTEL\BAY\VGA\WIN_8_64\Setup.exe

5-3 Serial IO Install Driver Baytrail Serial IO Driver (FOR Windows 7 only)

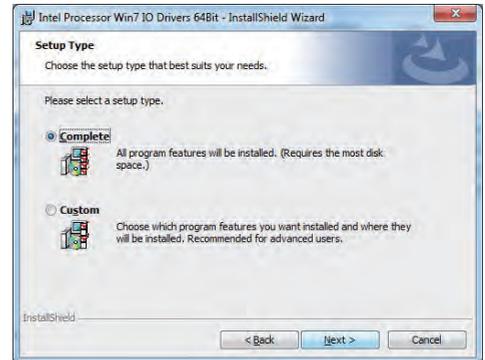

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "Serial IO".

2. At the "Welcome to the Setup Programs screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes"

4. At the "Setup type" screen, select "complete" and Click "Next".

5. At the "Ready to install the program" screen, Click "Install"
6. Click "Finish" and restart computer

NOTE: SYSTEM INSTALL will auto detect file path
For Windows 7 32-bit,
X:\driver\INTEL\BAY\SERIALIO\WIN7_32Bit.msi
For Windows 7 64-bit
X:\driver\INTEL\BAY\SERIALIO\Win7_64Bit.msi

5-4 xHCI Install Intel USB 3.0 xHCI Driver (FOR Windows 7 only)

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "xHCI".

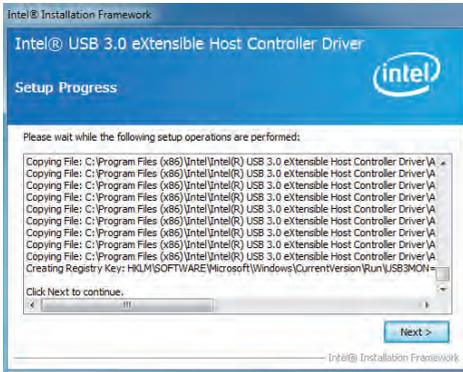

2. At the "Welcome to the Setup Program screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".

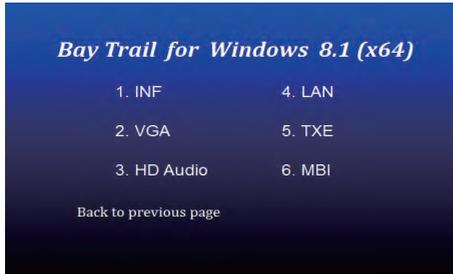

4. At the "Readme File Information" screen, Click "Next".

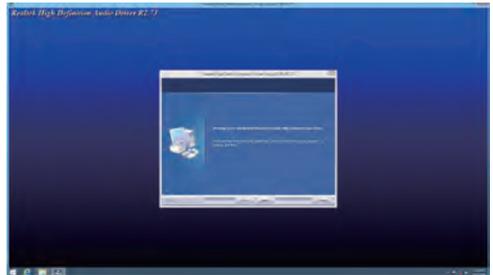

5. At the "Setup Progress" screen, Click "Next". 6. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path
For Windows 7 32 / 64-bit,
X:\driver\INTEL\BAY\XHC\Driver_Installer\Setup.exe

5-5 HD Audio Install High Definition Audio Driver (example for WIN8 64bit)

1. At the "AUTOMATIC DRIVER INSTALLATION" menu, click "HD Audio"

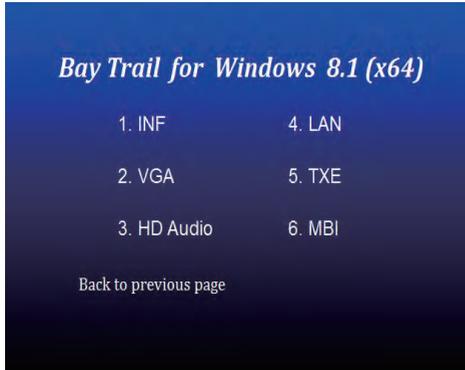

2. Click "Next".

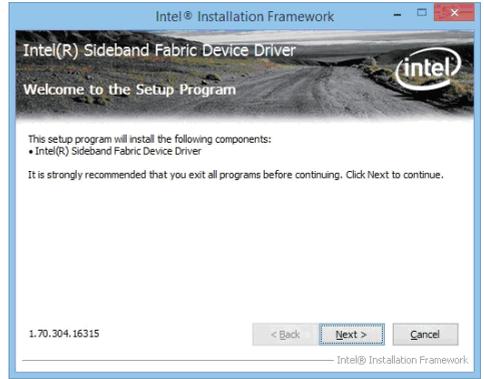

3. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path
For Windows 7 32 / 64-bit, Windows 8/8.1 32 / 64-bit
X:\driver\INTEL\BAY\SOUND\Win7_Win8_Win81_R273.exe

5-6 MBI Install Intel MBI Driver (FOR Win 8/8.1 only)

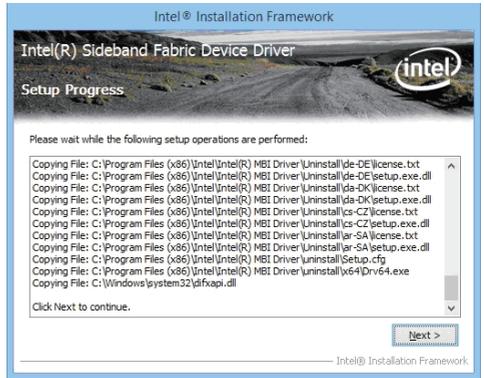

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "HD Audio"

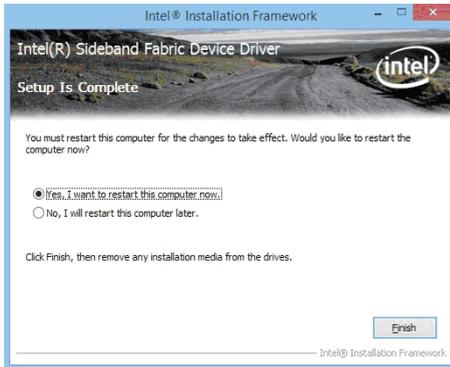

2. At the "Welcome to the Setup Program screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".

4. At the "Setup Progress" screen, Click "Next".

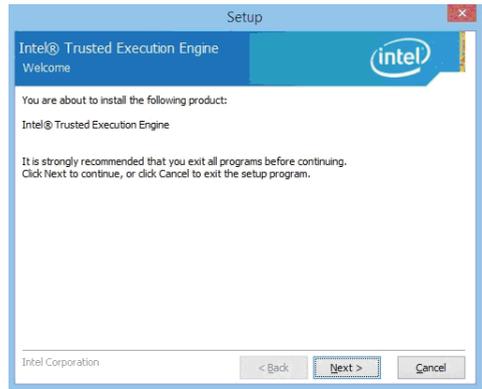

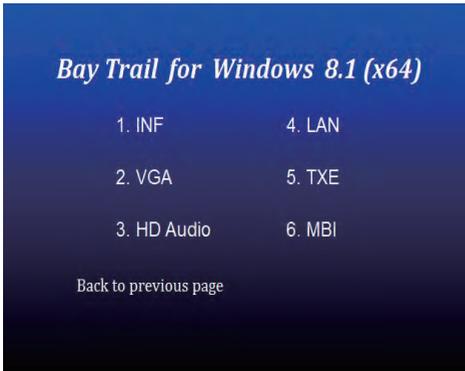

5. Click "Finish" to restart computer

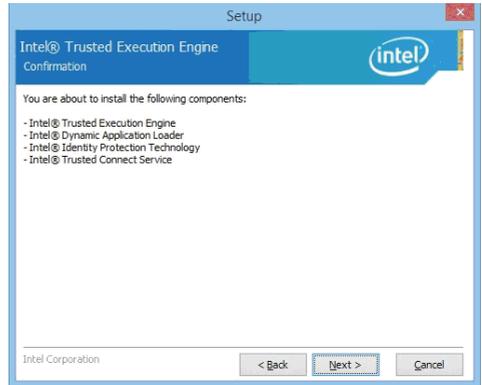

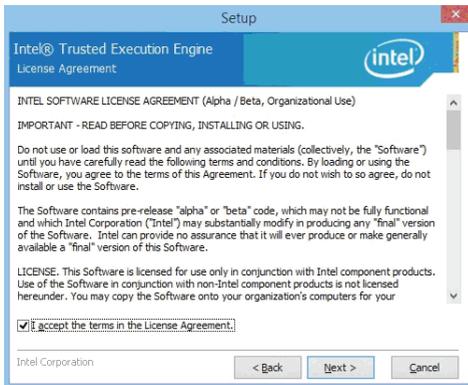

**NOTE: SYSTEM INSTALL will auto detect file path
For Windows 8/8.1 32 / 64-bit,
X:\driver\INTEL\BAY\MBI\Setup.exe**

5-7 TXE Install Intel TXE driver

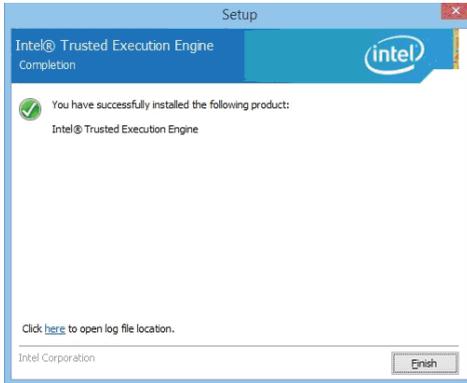

5-7-1 TXE Install for WIN8/WIN8.1

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "TXE"
2. At the "Setup" screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".
4. Click "Next".

5. Click "Finish" & restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 8 32 / 64-bit,

X:\driver\INTEL\BAY\TXE\WIN_8\SetupTXE.exe

For Windows 8.1 32 / 64-bit,

X:\driver\INTEL\BAY\TXE\WIN_8.1\SetupTXE.exe

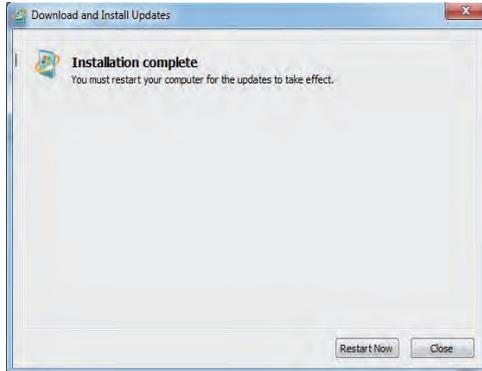

5-7-2 TXE Install for WIN7

Please install PXE Patch first.

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "TXE Patch "

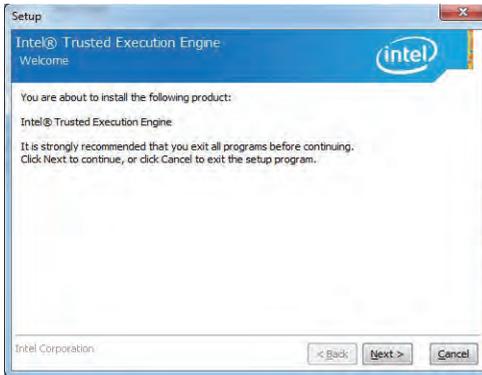

2. At the "Windows Update" screen, Click "Yes".

3. Click "Finish" & restart computer

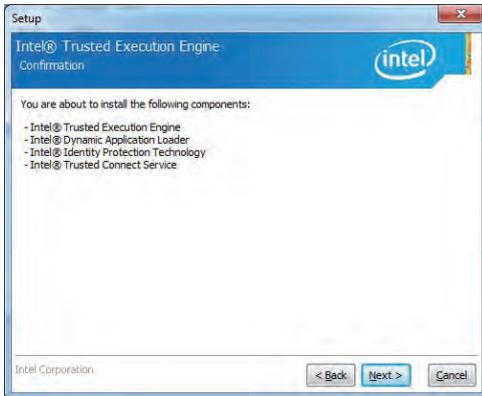

4. At the "AUTOMATIC DRIVER INSTALLATION menu", click "TXE "

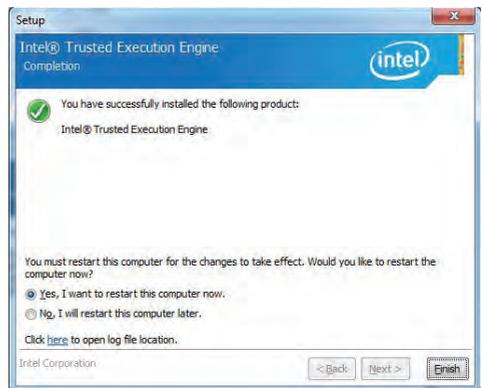

5. At the "TXE Setup" screen, Click "Next".

6. At the "License Agreement" screen, Click "Yes".

7. Click "Next".

8. Click "Finish" & restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 7 32 / 64-bit,

5-8 How to update Insyde BIOS

Under DOS Mode

STEP 1. Prepare a bootable disc.

(Storage device could be USB FDD or USB pen drive.)

STEP 2. Copy utility program to your bootable disc. You may download it from our website.

STEP 3. Copy the latest BIOS for your LEX motherboard from our website to your bootable disc.

STEP 4. (Here take 2I385PW as an example, please enter your motherboard's name)

Insert your bootable disc into X: (X could be C:, A: or others.

It depends on which type of storage device you use.)

Start the computer and type

X:\: H2OFFT-D.EXE 2I385PA2.ROM -BIOS -ALL

2I385PA2.ROM is the file name of the latest BIOS.

It may be 2I385PA1.ROM or 2I385PA2.ROM, etc.

Please leave one space between .ROM & -BIOS -ALL

By Bay Trail series mainboard, please type

X:\: H2OFFT-D.EXE 2I385PA2.ROM -BIOS -ALL

-BIOS : Flash BIOS region

-ALL : Flash all

STEP 5. Press ENTER and the BIOS will be updated,

Computer will restart automatically.

How to use this Demo Application

- A Function - Choose your motherboard model
- B Function - Enable WDT timer ,Key-in the value by seconds then system will reboot after value which you key-in in left text box !!
- C Function - Disable WDT timer ,Push down the button then WDT timer value will be clear !!
- D Function - Set DO Value ,Key-in the DO value by hex then push the button !!
- E Function - Check DI Value ,The right side two text box will display DI 1X & 2X Value when you push down the button!!

How to compile source code

1. Compile source code with Code::Blocks

download and install the Code::Block with command "apt-get install codeblocks"

Open an exist project(F75111.cbp) in Code::Blocks, click the compile button

(add an option 'pkg-config --libs gtk+-2.0 gthread-2.0' in "Project->Build Option->Linker Setting->Other linker option")

2. Compile source code with "make"

1. cd F75111

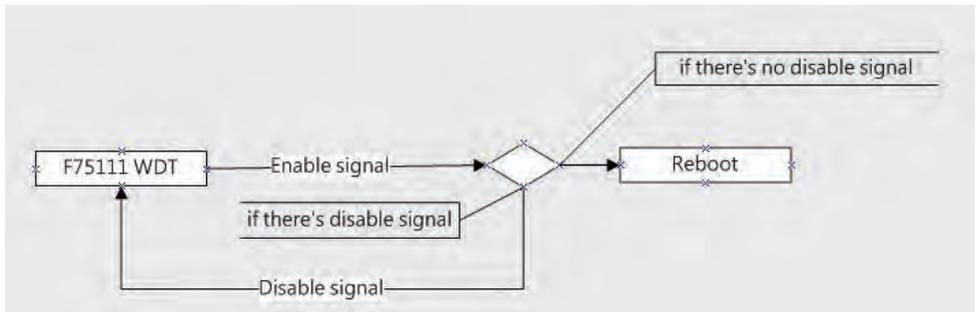

1. make

1. src/f75111 // execute the binary file

How to use this Demo Application

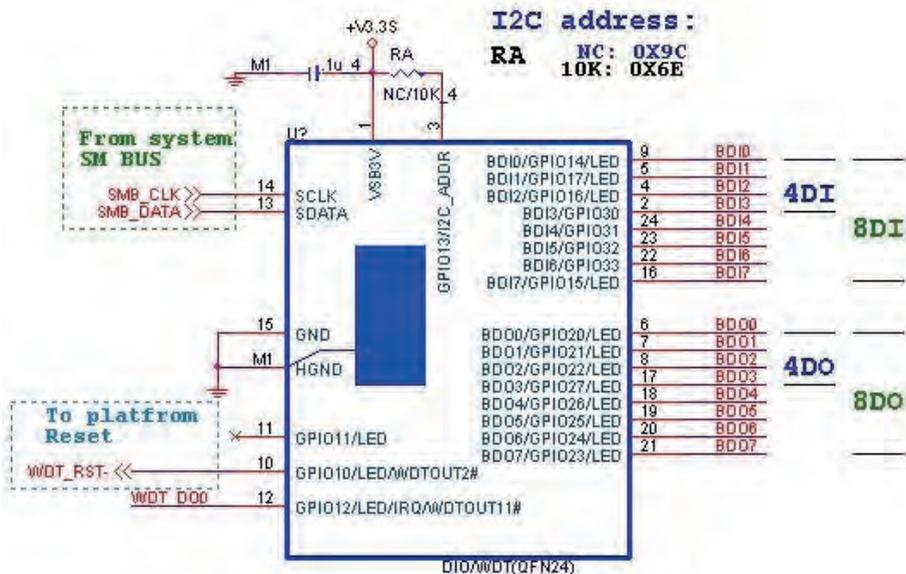

1. Press the "Start" button to test DIO function
2. Press the "Enable" button to test WDT function
3. Press the "Disable" button to disable WDT
4. Check the "Enable Loop" box and press "Enable" to do WDT loop test
5. Press "Install" to set the system to autorun this application when booting, press "Uninstall" to remove this application when booting.
6. If WDT enable, system icon will be blinking.

p.s.
 f75111 send "F75111_SetWDTEnable(BYTE byteTimer)" including a parameter "timer",
 if there's no disable signal (F75111_SetWDTDisable()) to stop it before timer countdown to 0, System will reboot.
 if there's disable signal received, resent Enable WDT signal, for a loop to prevent from reboot p.s.
