

The electronic housing is realized for connections up to 16 poles. The housing is designed to accept our **PV04-LDL/LSL-P** plug-in connector granting a wire section of 1,5sqmm. The wide inner space allows the use and mounting of a high number of electronic components. Special versions with closed holes are available on request. They allow the possibility to reduce the number of connections to 4, 8 or 12 poles maintaining a complete protection of inner components. Special colours, modifications on upper cover and imprints are available on request.
