User Manual edition 0.1, Nov. 30. 2016

Warning !

1. Battery
Batteries on board are consumables.
The life time of them are not guaranteed.
2. Fanless solution with HDD
The specification & limitation of HDD should be considered carefully when the fanless solution is implemented.
3. We will not give further notification in case of changes of product information and manual.
4. SATA interface does not support Hot SWAP function.
5. There might be a 20% inaccuracy of WDT at room temperature.
6. Please make sure the voltage specification meets the requirement of equipment before plugging in.
7. There are two types of SSD, commercial grade and industrial grade, which provide different read / write speed performance, operation temperature and life cycle. Please contact sales for further information before making orders.
8. Caution! Please notice that the heat dissipation problem could cause the MB system unstable. Please deal with heat dissipation properly when buying single MB set.
9. Please avoid approaching the heat sink area to prevent users from being scalded with fanless products.
10. If users repair, modify or destroy any component of product unauthorizedly, We will not take responsibility or provide warranty anymore.
11. DO NOT apply any other material which may reduce cooling performance onto the thermal pad.
12. It is important to install a system fan toward the CPU to decrease the possibility of overheating / system hanging up issues, or customer is suggested to have a fine cooling system to dissipate heat from CPU.

* Hardware Notice Guide

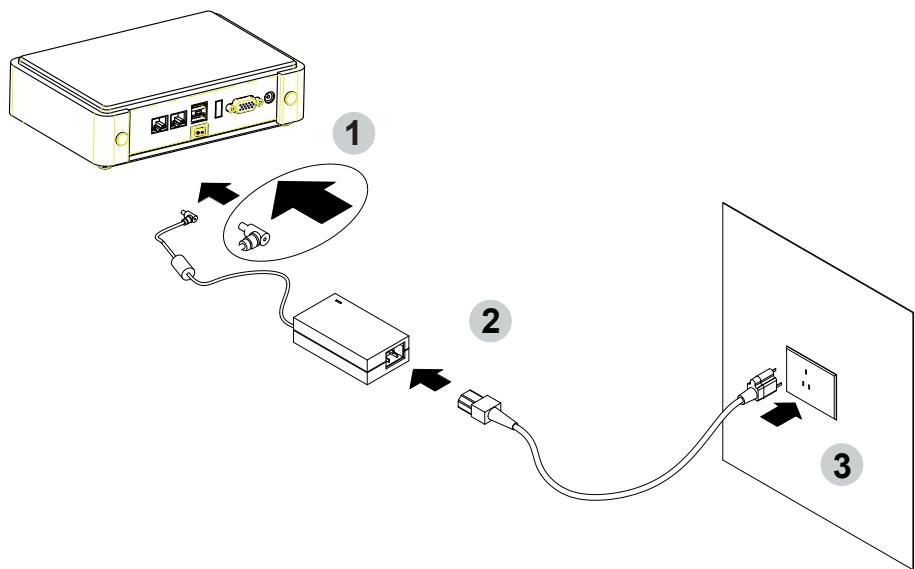

1. Before linking power supply with the motherboard, please attach DC-in adapter to the motherboard first. Then plug the adapter power to AC outlet.
Always shut down the computer normally before you move the system unit or remove the power supply from the motherboard. Please unplug the DC-in adapter first and then unplug the adapter from the AC outlet.
Please refer photo 1 as standard procedures.
2. In case of using DIRECT DC-in (without adapter), please check the allowed range for voltage & current of cables. And make sure you have the safety protection for outer issues such as short/broken circuit, overvoltage, surge, lightning strike.
3. In case of using DC-out to an external device, please make sure its voltage and current comply with the motherboard specification.
4. The total power consumption is determined by various conditions (CPU/motherboard type, device, application, etc.). Be cautious to the power cable you use for the system, one with UL standard will be highly recommended.
5. It's highly possible to burn out the CPU if you change/ modify any parts of the CPU cooler.
6. Please wear wrist strap and attach it to a metal part of the system unit before handling a component. You can also touch an object which is ground connected or attached with metal surface if you don't have wrist strap.
7. Please be careful to handle & don't touch the sharp-pointed components on the bottom of PCBA.
8. Remove or change any components form the motherboard will VOID the warranty of the motherboard.
9. Before you install / remove any components or even make any jumper setting on the motherboard, please make sure to disconnect the power supply first. (follow the aforementioned instruction guide)
10. "POWERON after PWR-Fail" function must be used carefully as below:
When the DC power adaptor runs out of power, unplug it from the DC current;
Once power returns, plug it back after 5 seconds.
If there is a power outage, unplug it from the AC current, once power returns, plug it back after 30 seconds. Otherwise it will cause system locked or made a severe damage.

Remark 1:

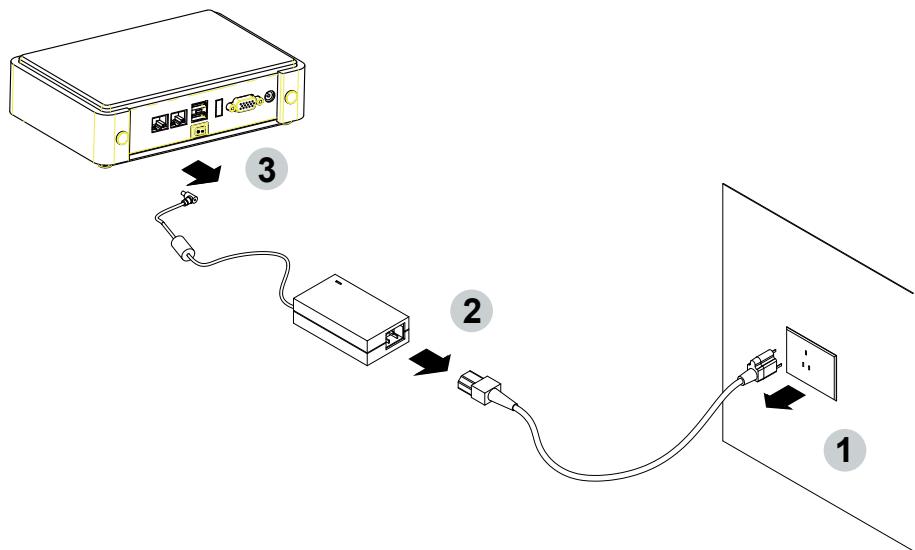

Always insert / unplug the DC-in horizontally & directly to / from the motherboard.
DO NOT twist, it is designed to fit snugly.
Moreover, erratic pull / push action might cause an unpredictable damage to the component & system unit.

Unplug

Chapter-1

General Information

The 1I385A is designed using 1.8 inches form factor and powered by Intel® Atom™ Bay Trail-I E3825 1.33GHz CPU (Dual-core processor) and Bay Trail-I Integrated Graphics chipset. E3825 processors which have low power features but also good performance computing, especially for multimedia capabilities compared to earlier generations. 1I385A motherboard is built in with onboard DDR3L SDRAM 2GB and up to 4GB Max. Memory DDR3 data transfer rate of 1066MT/s. The expendable interfaces include one full size PCIe Mini card for mSATA, PCIe and USB interface.

The 1I385A is a 1.8 inches compact size SBC with low power consumption (DC IN +5V) and high performance make these platforms well suited for many space-limited and thermally constrained market applications, such as healthcare, logistics, fleet management, digital signage and mobile security. The 1I385A supports one LAN ports of 10 / 100 / 1G Ethernet, one VGA port for display, USB3.0, 2 x USB 2.0, 4DI / DO and 2 COM ports.

1-1 Major Feature

1. Intel Bay Trail-I E3825 1.33GHz SOC (Dual core)
2. Intel Bay Trail-I Integrated Graphics chipset, 533MHz render clock frequency
3. On board DDR3L SDRAM 2GB (4GB Max) data transfer rate of 1066MT/s
4. Support 1 x 10 / 100 / 1000 Mbps Intel LAN ports
5. Support 2 x COM ports, 1 x USB 3.0 and 2 x USB 2.0
6. Support extended 1 x Mini PCIe card (full size)
7. Hardware digital Input & Output, 4 x DI / 4 x DO
Hardware Watch Dog Timer, 0~255 sec programmable
8. On board DC IN +5V
9. PCB Dimension: 84 x 55 mm (1.8 inches)
10. Support VGA display

1-2 Specification

1. **SOC:** Intel Bay Trail-I E3825 1.33GHz (Dual core)
2. **Memory:** DDR3L SDRAM 2GB, data transfer rate of 1066MT/s
3. **Graphics:** Intel Bay Trail-I Integrated Graphics chipset,
533MHz render clock frequency
4. **LAN:** 1 x INTEL I211-AT (option) / I210-IT LAN with 10 / 100 / 1000 Mbps
5. **Serial Port:** 2 x COM port (RS232 or 422 or 485) select by BIOS,
1 x RS232 and 1 x RS485 by default
6. **USB:** 1 x USB 3.0 (internal), 2 x USB 2.0 (1 external + 1 internal)
7. **WDT / DIO:** Hardware digital Input & Output, 4 x DI / 4 x DO
Hardware Watch Dog Timer, 0~255 sec programmable
8. **Expansion interface:** one full size PCIe Mini card for mSATA,
PCIe and USB interface
9. **BIOS:** Insyde UEFI BIOS
10. **Dimension:** 84 x 55 mm (1.8 inches)
11. **Power:** On board DC IN +5V

1-3 Directions for installing the Mini Card

1. Unscrew the screw on the board

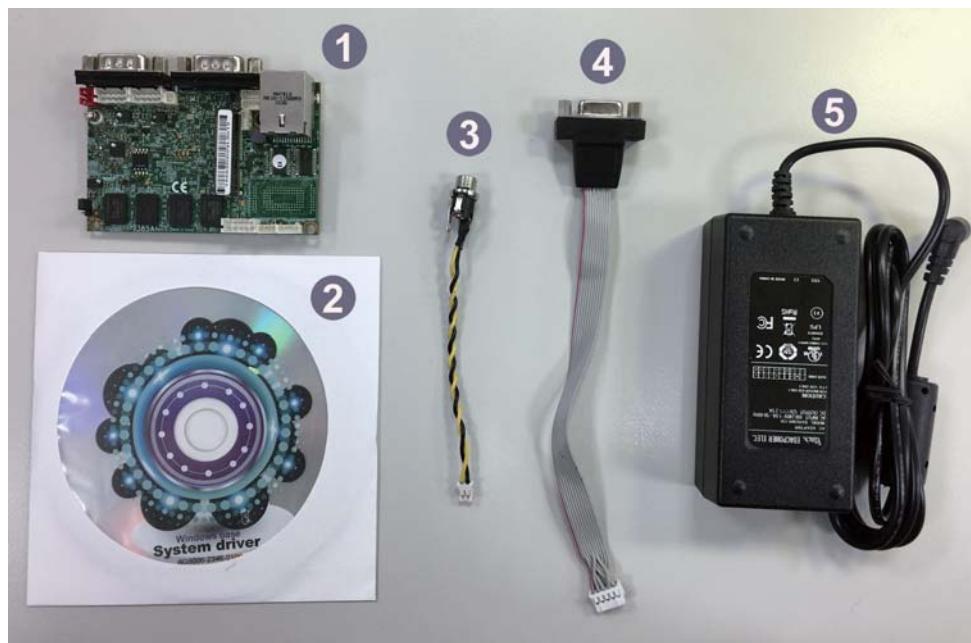

2. Plug in the Mini Card in a 45 angle

3. Gently push down the Mini Card and screw the screw back.

1-4 Packing List

	Material Code	Description	Detail Specification	Quantit
1	7G1901-1554002-0	MB-1I385A-I22-00-002	LF,1I385A-I22,Rev.:002	1
2	6G8006-2349-0100	LEX Product Driver DVD	LF, Intel Baytrail Driver,Windows 7/8.1 32/64	1
3	6G6003-7329-0100	Power Cable	LF,L=9cm,2.0 1*2/DC JK	1
4	6G6001-8404-0100	VGA FK	LF,L=15cm,2.0 2*5/ DB15pin,MI945/3V700D	1
5	6G5212-0252-0100	25W Power Adapter,5V/5A	LF,2.5/5.5/9.5,180' ,1000mm,FSP025- DPAN2,FSP	1

**Optional accessories (items in addition to motherboard)
are not included in the standard packing.
Please contact your dealer to purchase the optional accessories.**

Chapter-2

Hardware Installation

2-1 Unpacking Precaution

This chapter provides the information how to install the hardware of 1I385A.

Please follow section 1-5, 2-1 and 2-2 to check the delivery package and unpack carefully. Please follow the jumper setting procedure.

NOTE!

1. Do not touch the board or any other sensitive components without all necessary anti-static protection.
2. Please pay attention to the voltage limitation of DC-IN12V 5%. Overuse of DC-IN voltage limitation or change to another power adapter (not provided with this system) will VOID warranty.

You should follow these steps to protect the board from the static electric discharge whenever you handle the board:

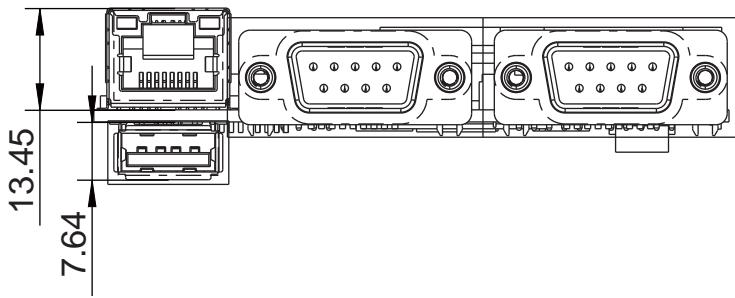

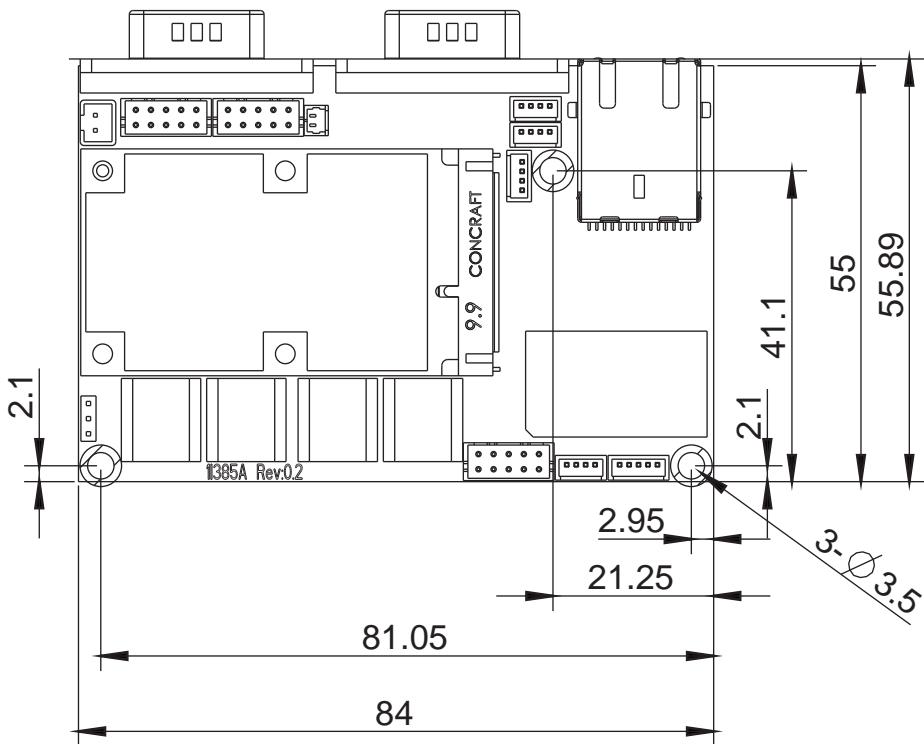

1. Ground yourself by a grounded wrist strap at all times when you handle the 1I385A.
Well secure the ALLIGATOR clip of the strap to the end of the shielded wire lead from a grounded object. Please put on and connect the strap before handling the 1I385A for harmlessly discharge any static electricity through the strap.
2. Please use anti-static pad to put any components, parts, or tools on the pad whenever you work on them outside the computer. You may also use the anti-static bag instead of the pad. Please ask your local supplier for necessary parts on anti-static requirement.
3. Do not plug any connector or set any jumper when the power is on.

2-2 Unpacking checkup

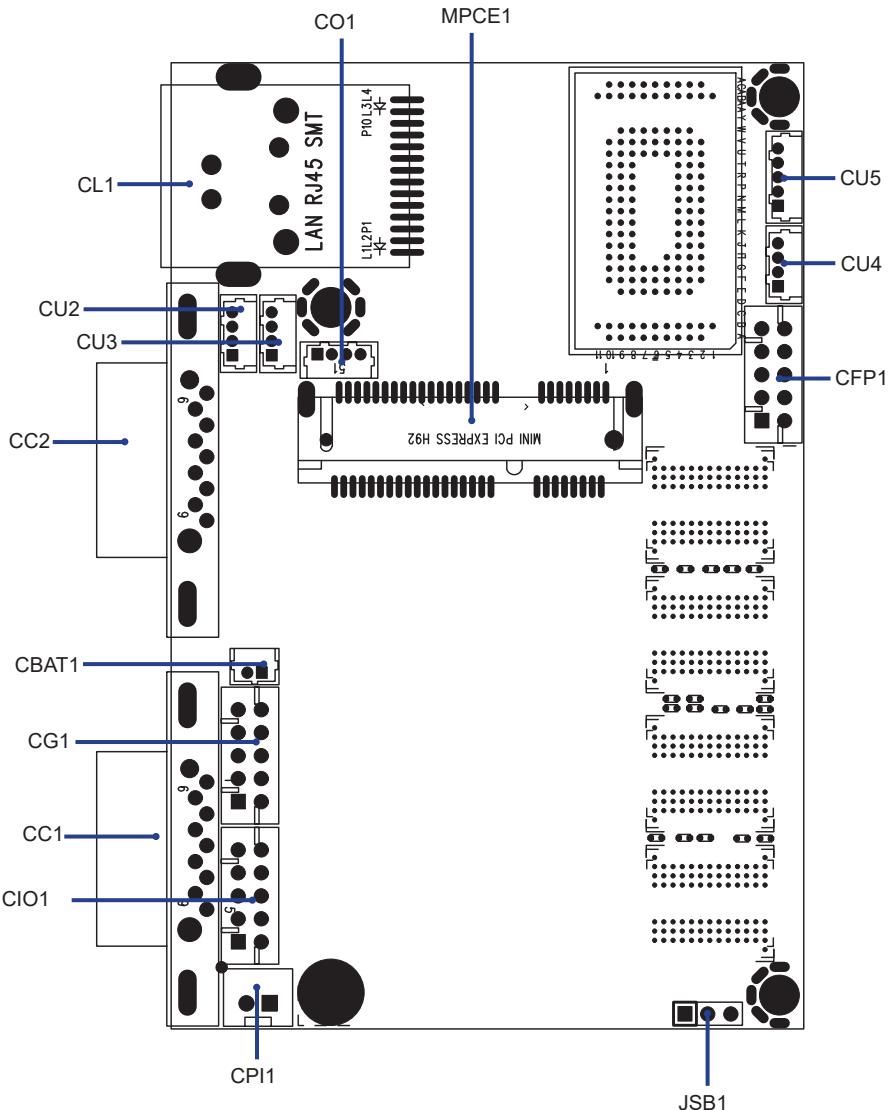

First of all, please follow all necessary steps of section 2-1 to protect 1I385A from electricity discharge. With reference to section 1-5 please check the delivery package again with following steps:

1. Unpack the 1I385A board and keep all packing material, manual and driver disc etc, do not dispose !
2. Is there any components lose or drops from the board?
DO NOT CONTINUE TO INSTALL THIS BOARD!
CONTACT THE DEALER YOU PURCHASED
THIS BOARD FROM, IMMEDIATELY.
3. Is there any visible damage on the board?
DO NOT CONTINUE TO INSTALL THIS BOARD!CONTACT
THE DEALER YOU PURCHASED THIS BOARD FROM, IMMEDIATELY.
4. Check your optional parts (i.e. DDR, CF etc.), all necessary jumpers setting to jumper pin-set, and CMOS setup correctly.
Please also refer to all information of jumper settings in this manual.
5. Check your external devices (i.e. Add-On-Card, Driver Type etc.) for complete add-in or connection and CMOS setup correctly.
Please also refer to all information of connector connection in this manual.
6. Please keep all necessary manual and driver disc in a good condition for future re-installation if you change your Operating System.

2-6 List of Jumpers

JSB1: CMOS DATA clear

2-7 Jumper Setting Description

A jumper is ON as a closed circuit with a plastic cap covering two pins. A jumper is OFF as an open circuit without the plastic cap. Some jumpers have three pins, labeled 1, 2, and 3. You could connect either pin 1 and 2 or 2 and 3.

The below figure 2.2 shows the examples of different jumper settings in this manual.

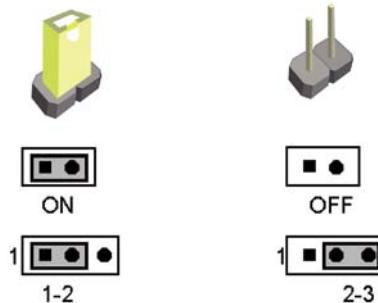

Figure 2.2

All jumpers already have its default setting with the plastic cap inserted as ON, or without the plastic cap as OFF. The default setting may be referred in this manual with a " * " symbol .

2-8 JSB1: CMOS Data Clear

A battery must be used to retain the motherboard configuration in CMOS RAM.

Close Pin1 and pin 2 of JSB1 to store the CMOS data.

To clear the CMOS,follow the procedures below:

1. Turn off the system and unplug teh AC power
2. Remove DC 5V power cable from DC 5V power connector
3. Locate JSB1 and close pin 1-2 for few seconds
4. Return to default setting by close pin 1-2
5. Connect DC 5V power cable back to DC 5V Power connector

JSB1	Description
*1-2	Normal set
2-3	CMOS data clear

Note: Do not clear CMOS unless

- 1. Troubleshooting***
- 2. Forget password***
- 3. You fail over-clocking system***

Chapter-3

Connection

This chapter provides all necessary information of the peripheral's connections, switches and indicators. Always power off the board before you install the peripherals.

3-1 List of Connectors

CBAT1 : Li 3V Battery 1x2pin (1.25mm) Wafer

CG1 : VGA 2x5pin (2.0mm) Wafer

CC1 : COM1 DB9 Connector

CC2 : COM2 DB9 Connector

CFP1 : Front Panel connector 2x5pin (2.0mm) wafer

CIO1 : DIO 2x5pin (2.0mm) Wafer

CL1 : LAN port 1 RJ45 Connector

CO1 : I²C Bus 1x4pin (1.25mm) Wafer

CPI1 : DC 5V-IN 1x2pin (2.0mm) Red wafer connector

CU1 : USB 2.0 Type A connector

CU2 : USB 2.0 port 1x4pin (1.25mm) Wafer

CU3 : USB 2.0 port 1x4pin (1.25mm) Wafer

CU4 : USB 2.0 port 1x4pin (1.25mm) Wafer(USB signal share with mini card)

CU5 : USB 3.0 port 1x5pin (1.25mm) Wafer

MPCE1 : Full size mini card port 1 sockets 52pin

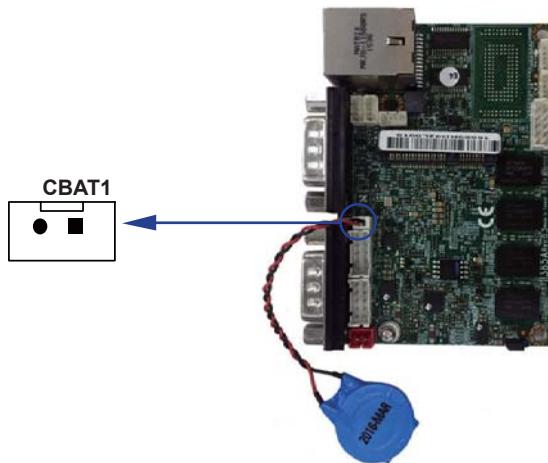

3-2 CMOS Battery connector

- **3V Battery wafer connector (1x2pin 1.25mm)**

PIN NO.	Description
1	GND
2	+3V

Battery use Li 3V / 40mAh (CR1220)

Note : 1.When board without Adaptor plug in, this board power RTC consumption 2.7uA
2.If adaptor always plug in RTC power consumption 0.1uA

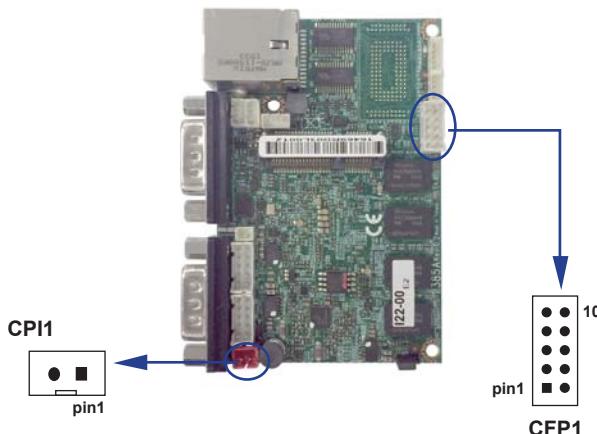

3-3 DC Power Input

- CPI1: DC-in (Red) Wafer connector (1x2 2.0mm)

PIN NO.	Description
1	DC-IN(5V)
2	GND

Note: Very important check Dc-in Voltage.

3-4 Front Panel Pin Header

- CFP1 Front Panel connector 2x5pin (2.0mm) wafer

PIN NO.	Description	PIN NO.	Description
1	Power button pin	2	GND
3	Reset pin	4	GND
5	Power LED -	6	Power LED +
7	HDD LED-	8	HDD LED+
9	LAN LED-	10	LAN LED+

3-5 COM interface

COM1/2 RS232 or RS485 or RS422 form BIOS select.
COM1 default support RS232.
COM2 default support RS485.

• CC1/CC2 COM1/2 DB9 Connector (RS232 Mode)

PIN NO.	Description	PIN NO.	Description
1	DCD	6	DSR
2	RXD	7	RTS
3	TXD	8	CTS

1	DI-0	2	DO-3
3	DI-1	4	DO-2
5	DI-2	6	DO-1
7	DI-3	8	DO-0
9	GND	10	+5V

Note: 1. DI pin default pull up 10KΩ to +5V
2. If use need isolate circuit to control external device
3. F75111N-1 I²C bus address 0x9c

• WDT For F75111N I²C watch dog timer device:

DC spec :

Input low Voltage (VIL):+0.8 Max ,

Input High Voltage(VIH) : +2V Min

Output low Current (IOL):10mA (Min) VOL=0.4V

Output High Current (IOH):-10mA (Min) VOH=2.4V

Watch Dog Time value 0~255 sec

The system will be issued reset. When WDT is enable the hardware start down counter to zero.

The reset timer have 10~20% tolerance upon the Temperature.

Note: If want to SDK support. Please contact to sales window.

Please refer to page 71 for APPENDIX C: F75111N I²C DIO DECICE

3-9 LAN Interface

- CL1: RJ45 LAN port Giga /100Mb(RJ45 Jack)

PIN NO.	Description	PIN NO.	Description

Chapter-4

Introduction of BIOS

The BIOS is a program located in the Flash Memory on the motherboard.

This program is a bridge between motherboard and operating system.

When you start the computer, the BIOS program gains control.

The BIOS first operates an auto-diagnostic test called POST (Power on Self Test) for all the necessary hardware, it detects the entire hardware devices and configures the parameters of the hardware synchronization. After these tasks are completed, BIOS will give control of the computer back to operating system (OS). Since the BIOS is the only channel for hardware and software to communicate with, it is the key factor of system stability and of ensuring your system performance at best.

In the BIOS Setup main menu, you can see several options. We will explain these options in the following pages. First, let us see the function keys you may use here:

Press <Esc> to quit the BIOS Setup.

Press ↑↓←→(up, down, left, right) to choose the option you want to confirm or modify.

Press <F10> to save these parameters and to exit the BIOS Setup menu after you complete the setup of BIOS parameters.

Press Page Up/Page Down or +/- keys to modify the BIOS parameters for the active option.

4-1 Enter Setup

Power on the computer and press key immediately to enter Setup.

If the message disappears before you respond but you still wish to enter Setup, restart the system by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart the system by simultaneously pressing <Ctrl>, <Alt> and <Delete> keys.

4-2 BIOS Menu Screen & Function Keys

BIOS Version	1I385A A1					
Build Date	05/06/2016					
Build Time	11:26:49					
Processor Type	Intel(R) Atom(TM) CPU E3825 @ 1.33GHz					
System Memory Speed	1066 MHz					
Cache RAM	1024 KB					
Total Memory	2048 MB					
System Time	[00:00:00]					
System Date	[01/01/2015]					
F1 Help	↑ ↓ Select	F5/F6 Change Values	F9 Setup Defaults			
Esc Exit	← Select Menu	Enter Select ▶ SubMenu	F10 Save and Exit			

In the above BIOS Setup main menu, you can see several options.

We will explain these options step by step in the following pages of this chapter, but let us first see a short description of the function keys you may use here:

- Press ←→ (left, right) to select screen;
- Press ↑↓ (up, down) to choose, in the main menu, the option you want to confirm or to modify.
- Press <Enter> to select.
- Press <+>/<-> or <F5>/<F6> keys when you want to modify the BIOS parameters for the active option.
- [F1]: General help.
- [F9]: Optimized defaults.
- [F10]: Save & Exit.
- Press <Esc> to quit the BIOS Setup.

4-3 Getting Help

InsydeH20 Setup Utility						Rev. 5.0
Main	Advanced	Security	Power	Boot	Exit	
[General Help]						
<p>The Setup Utility is a ROM-based configuration utility that displays the system's configuration status and provides users with a tool to set their system parameters. Setting incorrect values may cause system boot failure:</p> <p>Load setup default values to recover <Left/Right> Select Screen <Up/Down> Select Item <Enter> Select or Enter SubMenu <F9> Load Setup Default <F10> Save and Exit <ESC> Exit Setup <F1> key displays General Help(This Screen)</p>						
<p>Push Enter/ESC -- Levave Push PageUp -- previous Push PageDown -- Next Page</p>						
F1 Help	↑ ↓ Select	F5/F6 Change Values	F9 Setup Defaults			
Esc Exit	← Select Menu	Enter Select ▶ SubMenu	F10 Save and Exit			

Status Page Setup Menu/ Option Page Setup Menu

Press F1 to pop up a help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window, press <Esc>.

4-4 Menu Bars

There are six menu bars on top of BIOS screen:

Main To change system basic configuration

Advanced To change system advanced configuration

Security Password settings

Power PME & Power button settings

Boot Exit Save setting, loading and exit options.

User can press the right or left arrow key on the keyboard to switch from menu bar.

The selected one is highlighted.

IO=3E8h; IRQ=3,4

IO=2E8h; IRQ=3,4

IO=2F8h; IRQ=3,4

Serial Port 2 Base IO Address / Interrupt / Serial Mode

Use this item to select an optimal setting for super IO device.

The optional settings are:

IO=2F8h; IRQ=3(default)

IO=2E8h; IRQ=3,4

IO=3E8h; IRQ=3,4

IO=3F8h; IRQ=3,4

Serial Mode

Serial Port1 RS232 driver(default) : When Device Manager select to RS485 or RS422 mode, please enter to RS485 driver or RS422 driver, RS485 driver is the auto flow.

Serial Port2 RS485 driver(default) : When Device Manager select to RS232 or RS422 mode, please enter to RS232 driver or RS422 driver, RS485 driver is the auto flow.

Note.COM1/2 RS232/RS485/RS422 mode by BIOS select auto flow.

Power Failure

This item specifies whether your system will reboot after a power failure or interrupt occurs.

[Keep state] Restores the system to the status before power failure or interrupt occurred. (default)

[Always on] Leaves the computer in the power on state.

[Always off] Leaves the computer in the power off state.

4-11-2 Hardware Monitor

Hardware Monitor

Voltage

VCC3	3.344 V
VCORE	0.560 V
VGFX	0.920 V

Temperature

CPU (°C/F)	77°C/170°F
System (°C/F)	55°C/131°F

Press [Enter] to view PC health status.

This section shows the status of your CPU, Fan, and overall system.

This is only available when there is Hardware Monitor function onboard.

Chapter-5

DRIVER INSTALLATION

There is a system installation DVD in the package. This DVD does not only include all the drivers you need but also some other free application programs and utility programs. In addition, this DVD also includes an auto detect software telling you which hardware is installed and which driver is needed so that your system can function properly. We call this auto detect software SYSTEM INSTALL.

SYSTEM INSTALL Supports Windows 7(32bit/64bit) / Windows 8/8.1(32bit/64bit)

Insert the DVD into your DVD-ROM drive and the SYSTEM INSTALL menu should appear as below. If the menu does not appear, double-click MY COMPUTER and double-click DVD-ROM drive or click START, click RUN, and type X:\SETUP.EXE (assuming your DVD-ROM drive is X).

Make your selection from SYSTEM INSTALL menu:

1. Auto Detect Main board and OS to AUTOMATIC DRIVER INSTALLATION menu
2. Browse DVD to view the contents of the DVD
3. Exit to exit SYSTEM INSTALL menu

AUTOMATIC DRIVER INSTALLATION menu

Bay Trail for Windows 8.1 (x64)

| 1. INF | Install Intel Baytrail chipset driver |
| 2. VGA | Install onboard VGA driver |
| 3. Serial IO | Install Serial IO driver (FOR Win 7 only) |
| 4. xHCI | Install Intel USB 3.0 xHCI driver (FOR Win 7 only) |
| 5. HD Audio | Install HD Audio Codec driver |
| 6. MBI | Install MBI driver (FOR Win 8/8.1 only) |
| 7. LAN | To the LAN driver Readme file |
| 8. TXE Patch | Install Intel TXE patch (FOR Win 7 only) |
| 9. TXE | Install Intel TXE driver |

Each selection is illustrated below:

5-1 INF Install Intel Baytrail Chipset Driver (example for WIN8 64bit)

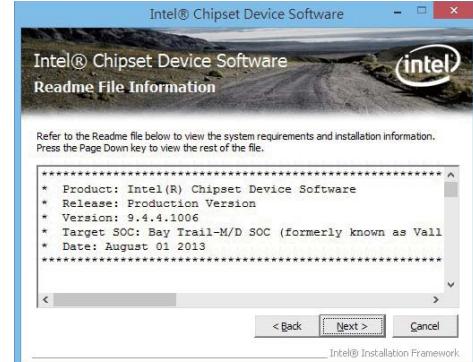

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "INF".

2. At the "Intel® Chipset Device Software" screen, click "Next".

3. At the "License Agreement" screen, click "Yes"

4. At the "Readme File Information" screen, Click "Next".

5. Click "Next"

6. Click "Finish" & restart computer.

NOTE: SYSTEM INSTALL will auto detect file path

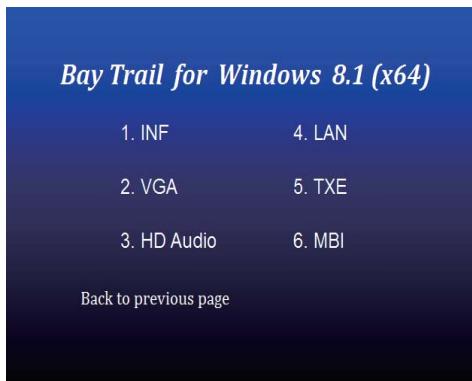

For Windows 7 64/32-bit,

X:\driver\INTEL\BAY\INF\WIN7\infinst_autol.exe

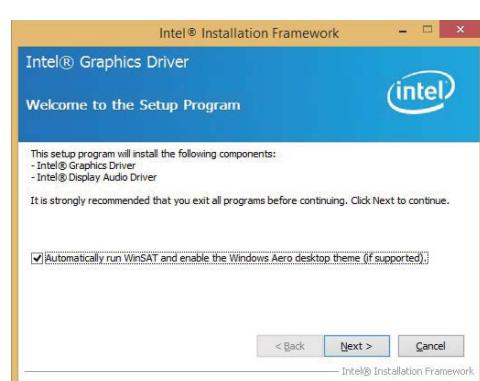

For Windows 8 / 8.1 32/64-bit

X:\driver\INTEL\BAY\INF\WIN_8_64\infinst_autol.exe

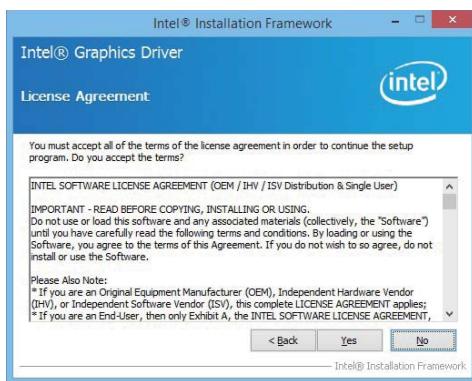

5-2 VGA Install Intel Baytrail VGA Driver (example for WIN8 64bit)

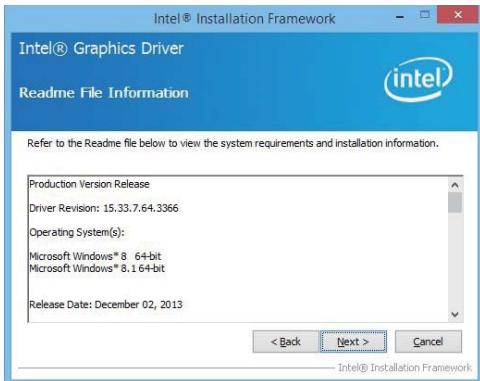

- At the "AUTOMATIC DRIVER INSTALLATION" menu"screen, click "VGA".

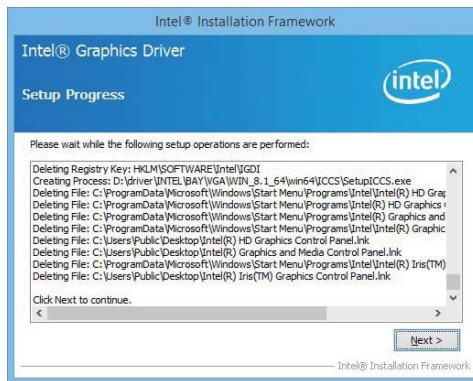

- At the "Welcome to the Setup Program" screen, Click "Next".

- At the "License Agreement" screen, Click "Yes"

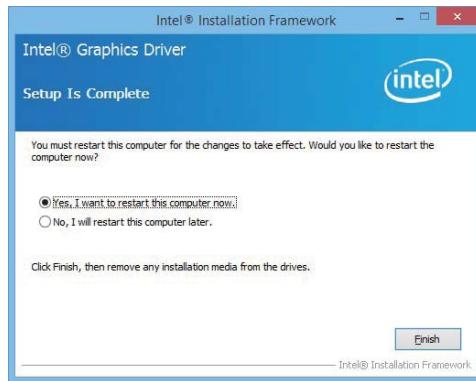

- At the "Readme File Information" screen, Click "Next"

5. At the "Setup Progress" screen,

Click "Next".

6. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 7 32-bit,

X:\driver\INTEL\BAY\VGA\WIN_7_32\Setup.exe

For Windows 7 64-bit

X:\driver\INTEL\BAY\VGA\WIN_7_64\Setup.exe

For Windows 8 / Windows 8.1 32-bit

X:\driver\INTEL\BAY\VGA\WIN_8_32\Setup.exe

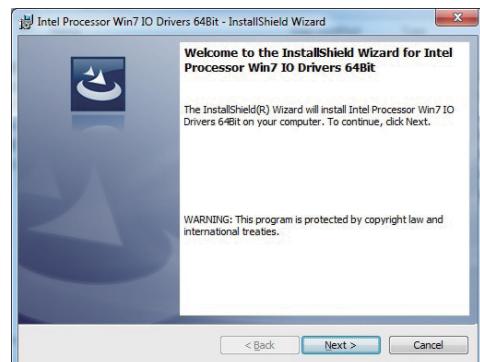

For Windows 8 / Windows 8.1 64-bit

X:\driver\INTEL\BAY\VGA\WIN_8_64\Setup.exe

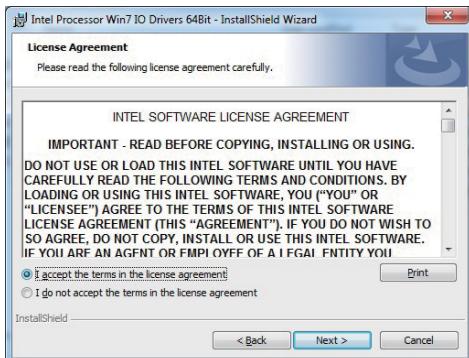

5-3 Serial IO Install Driver Baytrail Serial IO Driver (FOR Windows 7 only)

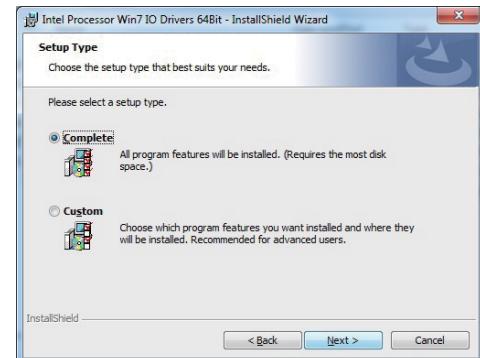

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "Serial IO".

2. At the "Welcome to the Setup Programscreen, Click "Next".

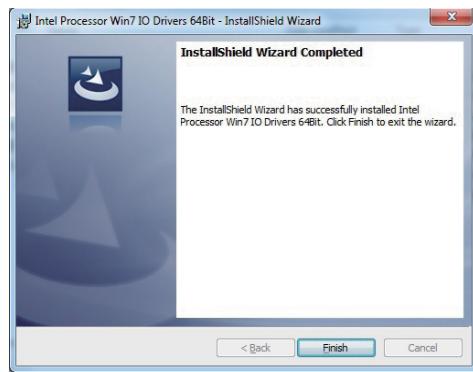

3. At the "License Agreement" screen, Click "Yes"

4. At the "Setup type" screen, select "complete" and Click "Next".

5. At the "Ready to install the program" screen,
Click "Install"

6. Click "Finish" and restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 7 32-bit,

X:\driver\INTEL\BAY\SERIALIO\WIN7_32Bit.msi

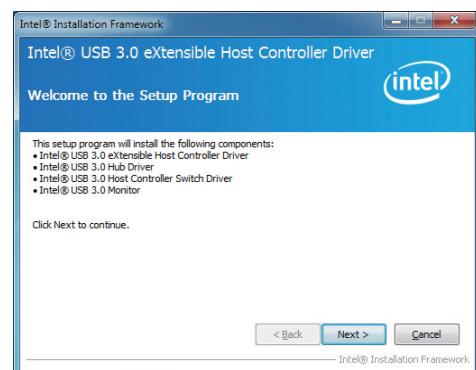

For Windows 7 64-bit

X:\driver\INTEL\BAY\SERIALIO\Win7_64Bit.msi

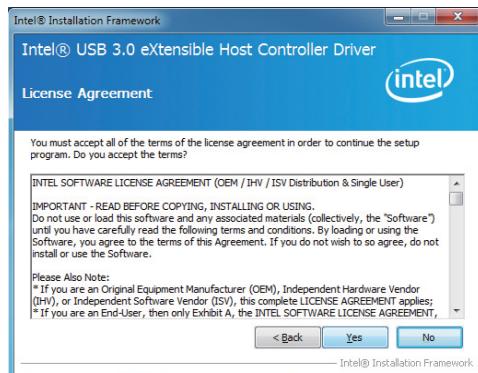

5-4 xHCI Install Intel USB 3.0 xHCI Driver (FOR Windows 7 only)

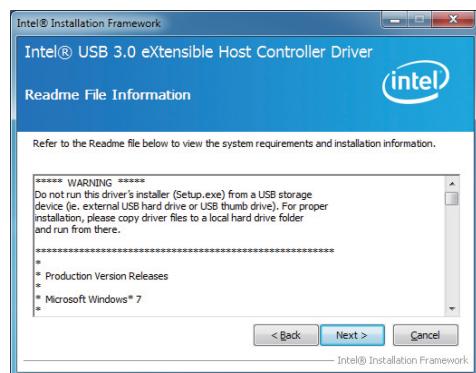

1. At the "AUTOMATIC DRIVER INSTALLATION menu" screen, click "xHCI".

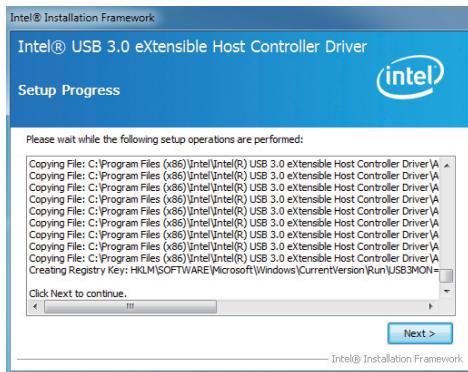

2. At the "Welcome to the Setup Program screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".

4. At the "Readme File Information" screen, Click "Next".

5. At the "Setup Progress" screen, Click "Next".

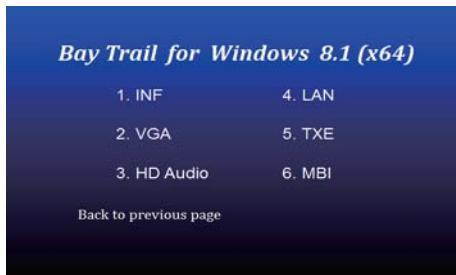

6. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 7 32 / 64-bit,

X:\driver\INTEL\BAY\XHCI\Driver_Installer\Setup.exe

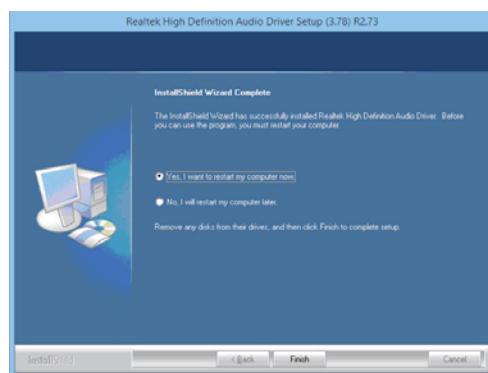

5-5 HD Audio Install High Definition Audio Driver (example for WIN8 64bit)

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "HD Audio"

2. Click "Next".

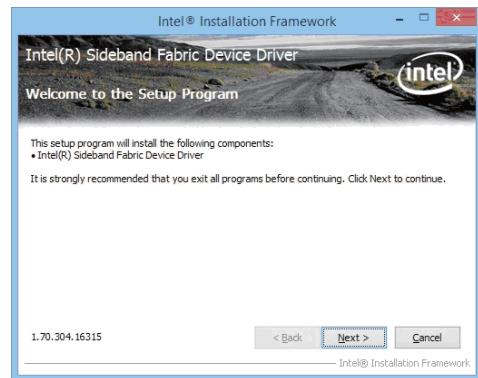

3. Click "Finish" to restart computer

NOTE: SYSTEM INSTALL will auto detect file path
For Windows 7 32 / 64-bit, Windows 8/8.1 32 / 64-bit
X:\driver\INTEL\BAY\SOUND\Win7_Win81_R273.exe

5-6 MBI Install Intel MBI Driver (FOR Win 8/8.1 only)

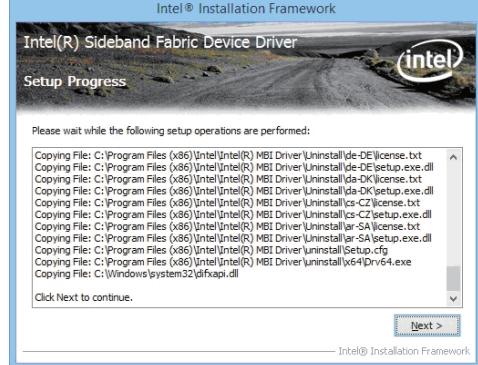

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "HD Audio"

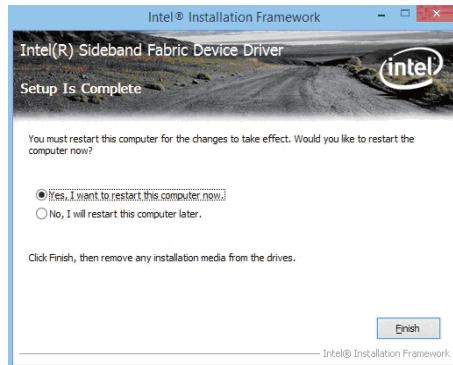

2. At the "Welcome to the Setup Program screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".

4. At the "Setup Progress" screen, Click "Next".

5. Click "Finish" to restart computer

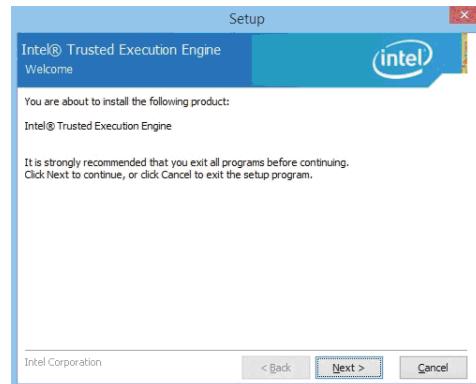

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 8/8.1 32 / 64-bit,

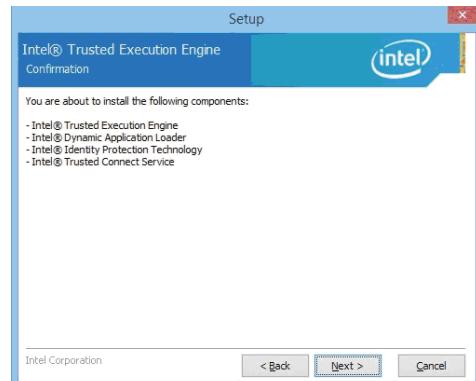

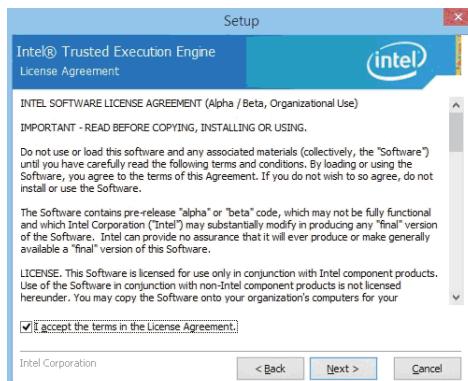

X:\driver\INTEL\BAY\MBI\Setup.exe

5-7 TXE Install Intel TXE driver

5-7-1 TXE Install for WIN8/WIN8.1

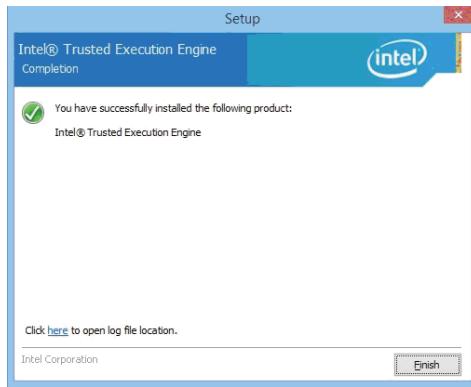

1. At the "AUTOMATIC DRIVER INSTALLATION menu", click "TXE"
2. At the "Setup" screen, Click "Next".

3. At the "License Agreement" screen, Click "Yes".

4. Click "Next".

5. Click "Finish" & restart computer

NOTE: SYSTEM INSTALL will auto detect file path

For Windows 8 32 / 64-bit,

5-8 How to update Insyde BIOS

Under DOS Mode

STEP 1. Prepare a bootable disc.

(Storage device could be USB FDD or USB pen drive.)

STEP 2. Copy utility program to your bootable disc. You may download it from our website.

STEP 3. Copy the latest BIOS for your LEX motherboard from our website to
your bootable disc.

STEP 4. (Here take 2I385AC as an example, please enter your motherboard's name)

Insert your bootable disc into X: (X could be C:, A: or others.)

It depends on which type of storage device you use.)

Start the computer and type

X:\: H2OFFT-D.EXE 1I385ACA2.ROM -BIOS -ALL

1I385ACA2.ROM is the file name of the latest BIOS.

It may be 1I385ACA1.ROM or 1I385ACA2.ROM, etc.

Please leave one space between .ROM & -BIOS -ALL

By Bay Trail series mainboard, please type

X:\: H2OFFT-D.EXE 1I385ACA2.ROM -BIOS -ALL

-BIOS : Flash BIOS region

-ALL : Flash all

STEP 5. Press ENTER and the BIOS will be updated,

Computer will restart automatically.

Appendix A: Power Consumption Test

Condition

Item	Spec
CPU	E3825 1.33 Ghz
Memory	DDR3L 1066 2GB
Operating System	Windows 7 / SP1
Test Program	3D Mark 06
mSATA	32GB

Test Result for reference only !

How to use this Demo Application

- 1.Boot Ms-Dos Operating System
- 2.execute "75WDT.EXE" binary file
- 3.Input 1 to Enable WDT timer or input 0 to Disable it.
- 4.input numbers of second for chip countdown and Reset Computer

F75111 Layout Picture

Introduction

How to use this Demo Application

```
Writel2CByte(I2CADDR, CONFIG, 0x03);//Set Watch Dog Timer function  
Writel2CByte(I2CADDR, WDT_TIMER, timer);//Set Watch Dog Timer range from 0-255.  
Writel2CByte(I2CADDR, WDT_TIMER_CTL, 0x73);//Enable Watch Dog Timer in second and pulse mode
```

How to use this Demo Application

```
Writel2CByte(I2CADDR, WDT_TIMER_CTL, 0x00);
```

How to use this Demo Application

```
void pause(int time)  
{  
    asm mov ah,0h; //Ah = 00 Read System Time Counter  
    asm int 1ah; //read time from Time Counter and store it in DX register  
    asm add dx,time;  
    asm mov bx,dx;  
    label:  
    asm int 1ah;  
    asm cmp bx,dx;  
    asm jne label;  
}
```

USERNAME & PASSWORD: sf

We do the demo test with a test tool which Dlx connect to DOx with Relay.

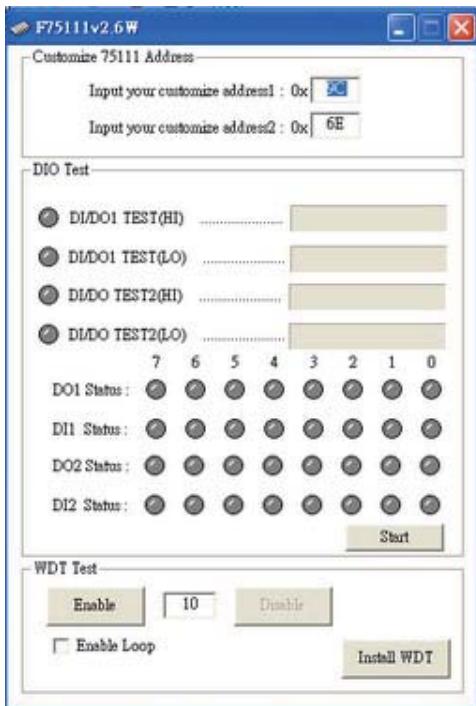

How to use this Demo Application

one F75111

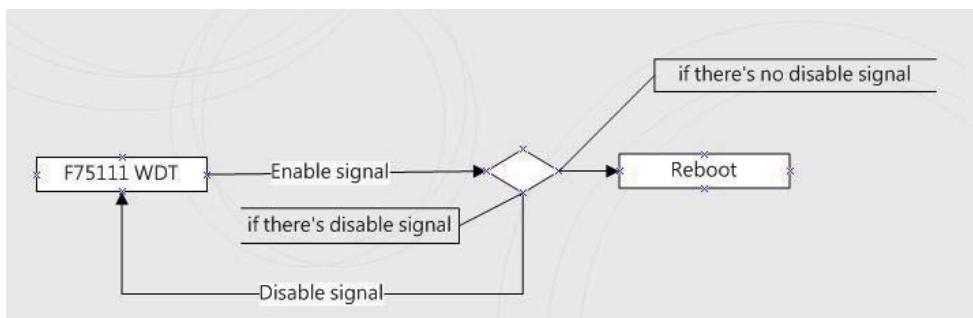

two F75111

Attention Please: You must be install vcredist_x86.exe when first time you run the F75111_DIO.exe DEMO AP, The vcredist_x86.exe include all required DLL file.

WARNING: win7 system architecture, use the system administrator to open DIO utility

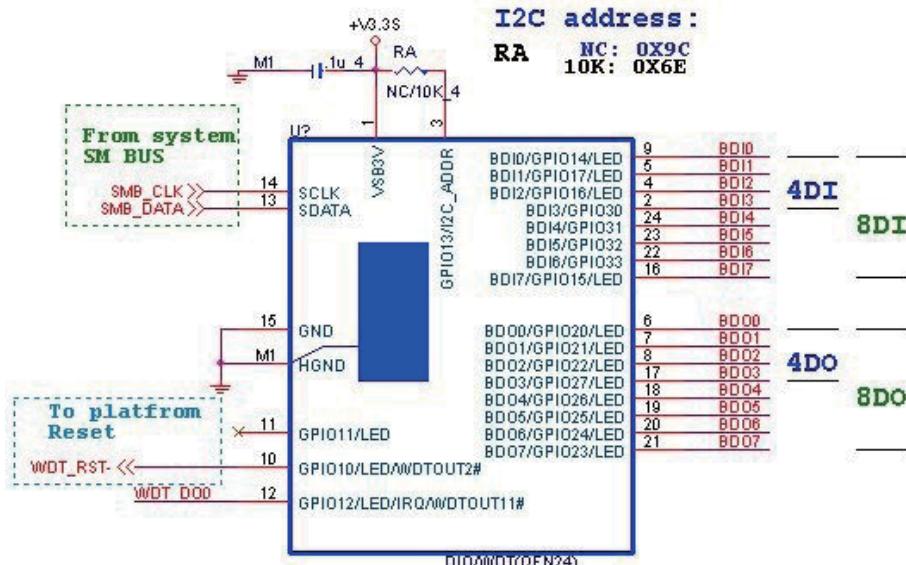

1. Press the "Start" button to test DIO function
2. Press the "Enable" button to test WDT function
3. Press the "Disable" button to disable WDT
4. Check the "Enable Loop" box and press "Enable" to do WDT loop test
5. Press "Install WDT" to set the system to autorun this application when booting, press again to remove this application when booting.
6. If WDT enable, system icon will be . if disable, system icon will be

p.s.

f75111 send "F75111_SetWDTEnable(BYTE byteTimer)" including a parameter "timer",
 if there's no disable signal (F75111_SetWDTDisable()) to stop it before timer countdown to 0, System will reboot.
 if there's disable signal received, reset Enable WDT signal, for a loop to prevent from reboot

F75111 Layout Picture

Introduction

Initial Internal F75111 port address (0x9c)

define GPIO1X, GPIO2X, GPIO3X to input or output
 and Enable WDT function pin

Set F75111 DI/DO (sample code as below Get Input value/Set output value)

DO: InterDigitalOutput(BYTE byteValue))
 DI: InterDigitalInput()

Enable/Disable WDT

```
Enable : F75111_SetWDTEnable (BYTE byteTimer)  
Disable: F75111_SetWDTDisable ()
```

PULSE mode

Sample to setting GP33, 32, 31, 30 output 1mS low pulse signal.

```
{  
    this->Write_Byte(F75111_INTERNAL_ADDR, GPIO3X_PULSE_CONTROL, 0x00); //This is setting low pulse output  
    this->Write_Byte(F75111_INTERNAL_ADDR, GPIO3X_PULSE_WIDTH_CONTROL, 0x01); //This selects the pulse width to 1mS  
    this->Write_Byte(F75111_INTERNAL_ADDR, GPIO3X_CONTROL_MODE, 0x0F); //This is setting the GP33, 32, 31, 30 to output function.  
    this->Write_Byte(F75111_INTERNAL_ADDR, GPIO3X_Output_Data, 0x0F); //This is setting the GP33, 32, 31, 30 output data.  
}
```

Initial internal F75111

```
void F75111::InitInternalF75111()  
{  
    this->Write_Byte(F75111_INTERNAL_ADDR,GPIO1X_CONTROL_MODE ,0x00); //set GPIO1X to Input function  
    this->Write_Byte(F75111_INTERNAL_ADDR,GPIO3X_CONTROL_MODE ,0x00); //set GPIO3X to Input function  
    this->Write_Byte(F75111_INTERNAL_ADDR,GPIO2X_CONTROL_MODE ,0xFF); //set GPIO2X to Output function  
  
    this->Write_Byte(F75111_INTERNAL_ADDR,F75111_CONFIGURATION, 0x03); //Enable WDT OUT function  
}
```

Set output value

```
void F75111::InterDigitalOutput(BYTE byteValue)  
{  
    BYTE byteData = 0;  
    byteData = (byteData & 0x01 )? byteValue + 0x01 : byteValue;  
    byteData = (byteData & 0x02 )? byteValue + 0x02 : byteValue;  
    byteData = (byteData & 0x04 )? byteValue + 0x04 : byteValue;  
    byteData = (byteData & 0x80 )? byteValue + 0x08 : byteValue;  
    byteData = (byteData & 0x40 )? byteValue + 0x10 : byteValue;  
    byteData = (byteData & 0x20 )? byteValue + 0x20 : byteValue;  
    byteData = (byteData & 0x10 )? byteValue + 0x40 : byteValue;  
    byteData = (byteData & 0x08 )? byteValue + 0x80 : byteValue; // get value bit by bit  
  
    this->Write_Byte(F75111_INTERNAL_ADDR,GPIO2X_OUTPUT_DATA,byteData); // write byteData value via GPIO2X output pin  
}
```

Get Input value

```
BYTE F75111::InterDigitalInput()
{
    BYTE byteGPIO1X = 0;
    BYTE byteGPIO3X = 0;
    BYTE byteData    = 0;

    this->Read_Byte(F75111_INTERNAL_ADDR,GPIO1X_INPUT_DATA,&byteGPIO1X); // Get value from GPIO1X
    this->Read_Byte(F75111_INTERNAL_ADDR,GPIO3X_INPUT_DATA,&byteGPIO3X); // Get value from GPIO3X

    byteGPIO1X = byteGPIO1X & 0xF0;                                // Mask unuseful value
    byteGPIO3X = byteGPIO3X & 0XF;                                // Mask unuseful value

    byteData = ( byteGPIO1X & 0x10 )? byteData + 0x01 : byteData;
    byteData = ( byteGPIO1X & 0x80 )? byteData + 0x02 : byteData;
    byteData = ( byteGPIO1X & 0x40 )? byteData + 0x04 : byteData;
    byteData = ( byteGPIO3X & 0x01 )? byteData + 0x08 : byteData;

    byteData = ( byteGPIO3X & 0x02 )? byteData + 0x10 : byteData;
    byteData = ( byteGPIO3X & 0x04 )? byteData + 0x20 : byteData;
    byteData = ( byteGPIO3X & 0x08 )? byteData + 0x40 : byteData;
    byteData = ( byteGPIO1X & 0x20 )? byteData + 0x80 : byteData;           // Get correct DI value from GPIO1X & GPIO3X

    return byteData;
}
```

Enable WatchDog

```
void F75111_SetWDTEnable (BYTE byteTimer)
{
    WriteByte(F75111_INTERNAL_ADDR,WDT_TIMER_RANGE ,byteTimer);          // set WatchDog range and timer
    WriteByte(F75111_INTERNAL_ADDR,WDT_CONFIGURATION,WDT_TIMEOUT_FLAG | WDT_ENABLE | WDT_PULSE | WDT_PSWIDTH_100MS); // Enable WatchDog, Setting WatchDog configure
}
```

Disable WatchDog

```
void F75111_SetWDTDisable ()
{
    WriteByte(F75111_INTERNAL_ADDR,WDT_CONFIGURATION,0x00);           // Disable WatchDog
}
```

How to use this Demo Application

- A Function - Choose your motherboard model
- B Function - Enable WDT timer ,Key-in the value by seconds then system will reboot after value which you key-in in left text box !!
- C Function - Disable WDT timer ,Push down the button then WDT timer value will be clear !!
- D Function - Set DO Value ,Key-in the DO value by hex then push the button !!
- E Function - Check DI Value ,The right side two text box will display DI 1X & 2X Value when you push down the button!!

SDK Function Introduction

Function EnableWDT

```
Function EnableWDT(timer As Integer)
```

```
Call Writel2CByte(&H3, &H3)
Call Writel2CByte(&H37, timer)
Call Writel2CByte(&H36, &H73)
```

```
End Function
```

Function DisableWDT

```
Function DisableWDT()
```

```
Call Writel2CByte(&H36, &H0)
```

```
End Function
```

Function SetDOValue

```
Function SetDOValue(dovalue As Integer)
```

```
Dim Data As Integer  
Dim Value As Integer
```

```
Data = 0  
Value = dovalue
```

```
If (Value And &H1) <> 0 Then  
    Data = Data + &H1  
End If
```

```
If (Value And &H2) <> 0 Then  
    Data = Data + &H2  
End If
```

```
If (Value And &H4) <> 0 Then  
    Data = Data + &H4  
End If
```

```
If (Value And &H80) <> 0 Then  
    Data = Data + &H8  
End If
```

```

1-4 IO Device: F75111 under linux

The Sample code source you can download from

Source file: F75111v2.4L_SRC.tar.gz

http://tprd.info/lexwiki/index.php/IO_Device:F75111_under_linux

Binary file: F75111v2.4L_BIN.tar.gz

USERNAME & PASSWORD: sf

How to compile source code

1. Compile source code with Code::Blocks

download and install the Code::Block with command "apt-get install codeblocks"

Open an exist project(F75111.cbp) in Code::Blocks, click the compile button

(add an option 'pkg-config --libs gtk+-2.0 gthread-2.0' in "Project->Build Option->Linker Setting->Other linker option")

2. Compile source code with "make"

1. cd F75111

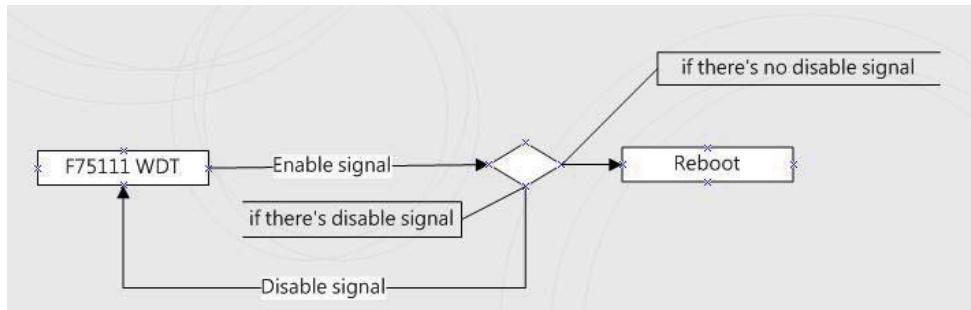

1. make

1. src/f75111 // execute the binary file

How to use this Demo Application

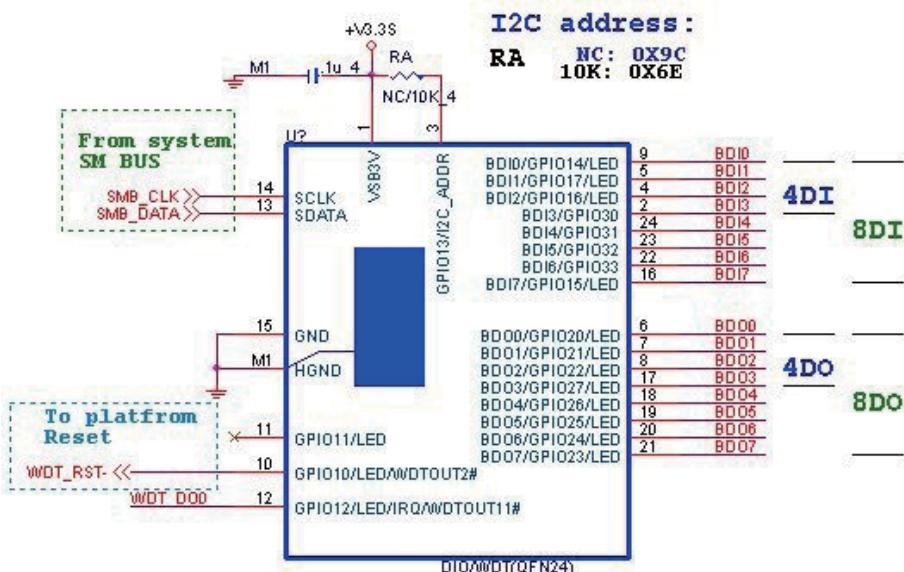

1. Press the "Start" button to test DIO function
2. Press the "Enable" button to test WDT function
3. Press the "Disable" button to disable WDT
4. Check the "Enable Loop" box and press "Enable" to do WDT loop test
5. Press "Install" to set the system to autorun this application when booting, press "Uninstall" to remove this application when booting.
6. If WDT enable, system icon will be blinking.

p.s.

f75111 send "F75111_SetWDTEnable(BYTE byteTimer)" including a parameter "timer", if there's no disable signal (F75111_SetWDTDisable()) to stop it before timer countdown to 0, System will reboot. if there's disable signal received, resent Enable WDT signal, for a loop to prevent from reboot p.s.

F75111 Layout Picture

Introduction

IO function In file SMBus.c

```
void SMBusIoWrite(BYTE byteOffset,BYTE byteData)
{
    outb( byteData , m_SMBusMapIoAddr + byteOffset);
}

BYTE SMBusIoRead(BYTE byteOffset)
{
    DWORD dwAddrVal;

    dwAddrVal = inb(m_SMBusMapIoAddr + byteOffset);
    return (BYTE)(dwAddrVal & 0x0FF);
}
```

Initial internal F75111

```
